

FCSS_EFW_AD-7.4 Reliable Real Test | FCSS_EFW_AD-7.4 Reliable Test Pdf

BTW, DOWNLOAD part of Prep4sures FCSS_EFW_AD-7.4 dumps from Cloud Storage: <https://drive.google.com/open?id=166ZcPJFJkjh1cYKLRoKiQTFJ61o6oi>

Our FCSS_EFW_AD-7.4 practice exams lower the likelihood of failing and are optimal for self-evaluation. You can access the web-based FCSS - Enterprise Firewall 7.4 Administrator (FCSS_EFW_AD-7.4) practice exam online without having to install any software. All browsers and operating systems support our web-based FCSS_EFW_AD-7.4 Practice Test. Every Windows computer supports our desktop Fortinet FCSS_EFW_AD-7.4 practice exam software, enabling you to prepare for the FCSS_EFW_AD-7.4 test without an active internet connection. You can customize the time and types of these Fortinet Questions.

Fortinet FCSS_EFW_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> VPN: This section of the exam measures the skills of Network Security Engineers and covers the implementation of secure communication tunnels for enterprise environments. Candidates will learn to configure IPsec VPN with IKE version 2 to establish encrypted connections. The section also includes the implementation of ADVPN to enable on-demand VPN tunnels between different sites, ensuring secure and dynamic connectivity.
Topic 2	<ul style="list-style-type: none"> Central Management: This section of the exam measures the skills of Security Administrators and focuses on implementing central management for Fortinet security solutions. It includes configuring and managing devices centrally to streamline network security operations. Candidates will understand how to maintain consistency in security policies and automate deployments for efficient management of large-scale enterprise environments.

Topic 3	<ul style="list-style-type: none"> • System Configuration: This section of the exam measures the skills of Network Security Engineers and covers the implementation of the Fortinet Security Fabric, ensuring seamless integration across security solutions. It also includes configuring hardware acceleration on FortiGate devices to optimize performance. Candidates will learn to set up different operation modes for high-availability clusters and implement enterprise networks using VLANs and VDOMs. Additionally, it covers various use case scenarios that demonstrate how Fortinet solutions contribute to secure network environments.
Topic 4	<ul style="list-style-type: none"> • Routing: This section of the exam measures the skills of Security Administrators and covers the implementation of advanced routing protocols to manage enterprise traffic effectively. Candidates will gain expertise in configuring Open Shortest Path First (OSPF) for dynamic routing and Border Gateway Protocol (BGP) to facilitate communication between different networks, ensuring efficient traffic flow across enterprise environments.
Topic 5	<ul style="list-style-type: none"> • Security Profiles: This section of the exam measures the skills of Network Security Engineers and focuses on managing security inspection profiles, including SSL and SSH inspections. Candidates will learn to apply a combination of web filtering, application control, and Internet Service Database (ISDB) to enhance network security. The section also covers integrating Intrusion Prevention Systems (IPS) to monitor and mitigate threats within enterprise networks.

Quiz Accurate FCSS_EFW_AD-7.4 - FCSS - Enterprise Firewall 7.4 Administrator Reliable Real Test

Some people worry that our aim is not to FCSS - Enterprise Firewall 7.4 Administrator guide torrent but to sell their privacy information to the third part to cause serious consequences. But we promise to you our privacy protection is very strict and we won't sell the client's privacy to others for our own benefits. Our aim to sell the FCSS_EFW_AD-7.4 test torrent to the client is to help them pass the exam and not to seek illegal benefits. For that time is extremely important for the learners, everybody hope that they can get the efficient learning. So clients can use our FCSS_EFW_AD-7.4 Test Torrent immediately is the great merit of our product. When you begin to use, you can enjoy the various functions and benefits of our product such as it can simulate the exam and boosts the timing function.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22

An administrator wants to simplify a new hub-and-spoke network deployment with the BGP recommended configuration. Which two sections on FortiManager must the administrator use? (Choose two.)

- A. Automation Stitch
- B. Metadata Variables
- C. Provisioning Templates
- D. Meta Fields

Answer: B,C

NEW QUESTION # 23

Which two conditions must be met for a statistic route to be active in the routing table? (Choose two.)

- A. The next-hop IP address is up.
- B. There is no other route, to the same destination, with a higher distance.
- C. The link health monitor (if configured) is up.
- D. The outgoing interface is up.

Answer: C,D

NEW QUESTION # 24

Refer to the exhibit, which shows the FortiGuard Distribution Network of a FortiGate device.
FortiGuard Distribution Network on FortiGate

Entitlement	Status
Advanced Malware Protection	Licensed (Expiration Date: 2025/11/10)
Attack Surface Security Rating	Licensed (Expiration Date: 2025/11/10)
IoT Detection Definitions	Version 0.00000 Upgrade Database
Outbreak Package Definitions	Version 5.00036
Security Rating & CIS Compliance	Licensed (Expiration Date: 2025/11/10)
Data Loss Prevention (DLP)	Not Licensed
DLP Signatures	Version 0.00000
Intrusion Prevention	Licensed (Expiration Date: 2025/11/10)
IPS Definitions	Version 28.00821 Actions
IPS Engine	Version 7.00539
Malicious URLs	Version 1.00001
Botnet IPs	Version 7.03758 View List
Botnet Domains	Version 3.00847 View List
Operational Technology (OT) Security Service	Licensed (Expiration Date: 2025/11/10)
Web Filtering	Licensed (Expiration Date: 2025/11/10)
Blocked Certificates	Version 1.00487
DNS Filtering	Licensed (Expiration Date: 2025/11/10)
Video Filtering	Licensed (Expiration Date: 2025/11/10)
SD-WAN Network Monitor	Not Licensed Purchase
SD-WAN Overlay as a Service	Not Licensed Purchase

An administrator is trying to find the web filter database signature on FortiGate to resolve issues with websites not being filtered correctly in a flow-mode web filter profile. Why is the web filter database version not visible on the GUI, such as with IPS definitions?

- A. The web filter database is stored locally, but the administrator must run over CLI diagnose autoupdate versions.
- B. The web filter database is only accessible after manual syncing with a valid FDS server using diagnose test update info.
- C. The web filter database is stored locally on FortiGate, but it is hidden behind the GUI. It requires enabling debug mode to make it visible.
- D. The web filter database is not hosted on FortiGate: FortiGate queries FortiGuard or FortiManager for web filter ratings on demand.

Answer: D

Explanation:

Unlike IPS or antivirus databases, FortiGate does not store a full web filter database locally.

Instead, FortiGate queries FortiGuard (or FortiManager, if configured) dynamically to classify and filter web content in real time.

Key points:

Web filtering works on a cloud-based model:

When a user requests a website, FortiGate queries FortiGuard servers to check its category and reputation.

The response is then cached locally for faster lookups on repeated requests.

No local web filter database version:

Unlike IPS and antivirus, which download and store signature updates locally, web filtering relies on cloud-based queries.

This is why no database version appears in the GUI.

Flow mode vs Proxy mode:

In proxy mode, FortiGate can cache some web filter data, improving performance. In flow mode, all queries happen dynamically, with no locally stored database.

NEW QUESTION # 25

Refer to the exhibits.

Root FortiGate - System Administrator Configuration

System Administrator	
admin	super_admin
AdminSSO	super_admin_readonly

Downstream FortiGate - Security Fabric settings

Security Fabric role: Standalone Serve as Fabric Root Join Existing Fabric

Allow other Security Fabric devices to join: ☒

Upstream FortiGate IP/FQDN: 10.10.254

Allow downstream device REST API access: ☐

SAML Single Sign-On: Auto Manual Advanced Options

Mode: Service Provider (SP)

Default login page: Normal Single Sign-On

Default admin profile: super_admin_readonly

Management IP/FQDN: Use WAN IP Specify 10.10.100

Management port: Use Admin Port Specify 443

The Administrators section of a root FortiGate device and the Security Fabric Settings section of a downstream FortiGate device are shown.

When prompted to sign in with Security Fabric in the downstream FortiGate device, a user enters the AdminSSO credentials. What is the next status for the user?

- A. The user is prompted to create an SSO administrator account for AdminSSO.
- B. The user receives an authentication failure message.
- C. The user accesses the downstream FortiGate with super_admin privileges.
- D. The user accesses the downstream FortiGate with super_admin_readonly privileges.

Answer: D

Explanation:

From the Root FortiGate - System Administrator Configuration exhibit:

The AdminSSO account has the super_admin_readonly role.

From the Downstream FortiGate - Security Fabric Settings exhibit:

The Security Fabric role is set to Join Existing Fabric, meaning it will authenticate with the root FortiGate.

SAML Single Sign-On (SSO) is enabled, and the default admin profile is set to super_admin_readonly.

When the AdminSSO user logs into the downstream FortiGate using SSO, the authentication request is sent to the root FortiGate, where AdminSSO has super_admin_readonly permissions.

Since the downstream FortiGate inherits this permission through the Security Fabric configuration, the user will be granted super_admin_readonly access.

NEW QUESTION # 26

Refer to the exhibit, which shows an OSPF network.

Which configuration must the administrator apply to optimize the OSPF database?

- A. Set an access list in the AS boundary FortiGate.
- B. Set a route map in the AS boundary FortiGate.
- **C. Set the area 0.0.0.1 to the type STUB in the area border FortiGate.**
- D. Set the area 0.0.0.1 to the type NSSA in the area border FortiGate.

Answer: C

Explanation:

The OSPF database optimization is necessary to reduce unnecessary routing information and improve network performance. In the given topology, Area 0.0.0.1 is a non-backbone area connected to Area 0.0.0.0 (the backbone area) through an Area Border Router (ABR).

To optimize OSPF in this scenario, configuring Area 0.0.0.1 as a Stub Area will:

Reduce the size of the OSPF database by preventing external routes (from outside OSPF) from being injected into Area 0.0.0.1.

Allow only intra-area and inter-area routes, meaning routers in Area 0.0.0.1 will rely on a default route for external destinations.

Improve convergence time and reduce router processing load since fewer LSAs (Link-State Advertisements) are exchanged.

NEW QUESTION # 27

.....

The FCSS_EFW_AD-7.4 learning materials are of high quality, mainly reflected in the adoption rate. As for our FCSS_EFW_AD-7.4 exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our FCSS_EFW_AD-7.4 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our FCSS_EFW_AD-7.4 Quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our FCSS_EFW_AD-7.4 exam question is 99%. So our FCSS_EFW_AD-7.4 study guide is a good choice for you.
