

# Free PDF CompTIA - 220-1201 Perfect New Exam Labs

BONUS!!! Download part of RealVCE 220-1201 dumps for free: <https://drive.google.com/open?id=1annt2K7Q8QP5VoEm3OyhdIbarnN0DaQAA>

The purchase process of our 220-1201 question torrent is very convenient for all people. In order to meet the needs of all customers, our company is willing to provide all customers with the convenient purchase way. If you buy our 220-1201 study tool successfully, you will have the right to download our 220-1201 Exam Torrent in several minutes, and then you just need to click on the link and log on to your website's forum, you can start to learn our 220-1201 question torrent. At the same time, we believe that the convenient purchase process will help you save much time.

If you feel that you purchase RealVCE CompTIA 220-1201 exam training materials, and use it to prepare for the exam is an adventure, then the whole of life is an adventure. Gone the furthest person is who are willing to do it and willing to take risks. Not to mention that RealVCE CompTIA 220-1201 exam training materials are many candidates proved in practice. It brings the success of each candidate is also real and effective. Dreams and hopes are important, but more important is to go to practice and prove. The RealVCE CompTIA 220-1201 Exam Training materials will be successful, select it, you have no reason unsuccessful !

## Choosing New 220-1201 Exam Labs - No Worry About CompTIA A+ Core 1 Exam (2026)

You choosing RealVCE to help you pass CompTIA certification 220-1201 exam is a wise choice. You can first online free download RealVCE's trial version of exercises and answers about CompTIA Certification 220-1201 Exam as a try, then you will be more confident to choose RealVCE's product to prepare for CompTIA certification 220-1201 exam. If you fail the exam, we will give you a full refund.

## CompTIA A+ Core 1 Exam (2026) Sample Questions (Q160-Q165):

### NEW QUESTION # 160

A technician is setting up a new SOHO wireless router. According to security best practices, which of the following should the technician do first?

- A. Assign a static IP.
- B. Reset the router.
- C. Enable encryption.
- D. Change the default password.

**Answer: D**

Explanation:

The first security step after deploying a new router is to change the default administrative password. Default credentials are well known and pose a security risk if left unchanged.

From CompTIA A+ 220-1101 Official Study Guide, Objective 2.3 - Secure a wireless network:

"Always change default administrative credentials before further configuration to prevent unauthorized access." Verified Source: CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 2: Wireless Security CompTIA Exam Objectives 220-1101, Domain 2.3

### NEW QUESTION # 161

An engineer must implement a solution to facilitate and maintain an organization's legacy application until it is retired. The application is currently hosted on three physical servers. Which of the following is the most suitable concept for this purpose?

- A. FaaS
- B. SAN
- C. Configuration management platform
- **D. Virtualization**

**Answer: D**

Explanation:

Virtualization is the most suitable solution for maintaining a legacy application that is currently running on multiple physical servers. According to CompTIA Core 1 (220-1201) virtualization concepts, virtualization allows physical servers to be consolidated into virtual machines (VMs) that run on a single or reduced number of physical hosts while preserving the original operating systems and application environments.

Legacy applications often rely on older operating systems, specific hardware configurations, or outdated dependencies. Virtualization enables the organization to encapsulate the legacy environment, reducing hardware dependency and simplifying maintenance until the application can be fully retired. This approach also lowers power consumption, hardware costs, and physical space requirements while improving manageability and backup options.

A SAN (Storage Area Network) provides shared storage but does not address application hosting or server consolidation. FaaS (Function as a Service) is a cloud-native, event-driven computing model that requires application redesign and is unsuitable for legacy systems. A configuration management platform is used to manage and automate system configurations but does not replace physical servers or host applications.

CompTIA highlights virtualization as a key strategy for supporting legacy systems, improving flexibility, and extending the lifespan of applications during transition periods.

### NEW QUESTION # 162

A technician wants to upgrade a computer to a new Windows version. The Windows Upgrade Advisor states that the computer is not compatible with the new Windows version due to a lack of TPM 2.0 support. Which of the following should the technician do next?

- A. Install an HSM in the computer.
- B. Perform a clean Install of the new Windows version.
- **C. Enable the module in the UEFI BIOS.**
- D. Implement BitLocker on the computer.

**Answer: C**

Explanation:

TPM 2.0 (Trusted Platform Module) is often disabled by default in the UEFI BIOS. Enabling it is necessary to meet the requirements for certain Windows installations, including Windows 11.

Why Not B (Install an HSM): A Hardware Security Module (HSM) is a separate device used for cryptographic functions and is not related to TPM on the motherboard.

Why Not C (Perform a clean install): A clean installation will not bypass the TPM 2.0 requirement.

Why Not D (Implement BitLocker): BitLocker requires TPM but does not resolve its absence or lack of activation.

CompTIA A+ Exam Reference: Core 1 (220-1201), Section 3.4, BIOS/UEFI configuration.

### NEW QUESTION # 163

A new directive mandates the use of a security component to securely allow users to authenticate to systems, access sensitive data,

and enter the office. The component must provide an additional factor of authentication alongside user accounts and cannot be something the user owns.

Which of the following components best meets these requirements?

- A. NFC scanner
- B. Secure token
- C. Fingerprint reader
- **D. Smart card**

**Answer: D**

Explanation:

A smart card provides an additional factor of authentication by storing secure credentials, such as certificates, that cannot be guessed or replicated. It complements user accounts and is "something you have".

#### **NEW QUESTION # 164**

A user is having trouble with the location services on their smartphone. Location-based applications show incorrect positions when the user is traveling. This issue affects the user's ability to navigate and use location-dependent applications. Which of the following is the best way to resolve this issue?

- A. Downloading a third-party mapping application
- **B. Enabling Wi-Fi to assist GPS**
- C. Restarting the smartphone
- D. Resetting the network settings

**Answer: B**

Explanation:

Wi-Fi assistance in mobile devices helps improve location accuracy by using nearby wireless networks to triangulate the device's position, even when GPS signals are weak (like indoors or in dense areas).
