

Top Dumps 1Z1-182 Vce | Pass-Sure Printable 1Z1-182 PDF: Oracle Database 23ai Administration Associate 100% Pass

DOWNLOAD the newest Itcertmaster 1Z1-182 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1AQLh_759ModQ3Yu_g95J4F2p8zSYLKR-

The Oracle Database 23ai Administration Associate (1Z1-182) PDF dumps format can be accessed from any smart device such as laptops, tablets, and smartphones. Itcertmaster regularly updates the 1Z1-182 PDF Questions to reflect the latest Oracle 1Z1-182 exam content. All test questions in the 1Z1-182 exam PDF format are real and latest.

Oracle 1Z1-182 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.
Topic 2	<ul style="list-style-type: none"> Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.
Topic 3	<ul style="list-style-type: none"> Employ Oracle-Supplied Database Tools: This section evaluates the abilities of Database Engineers and Support Specialists in identifying and using Oracle-supplied tools for managing databases. It focuses on leveraging tools to monitor, troubleshoot, and optimize database performance effectively.
Topic 4	<ul style="list-style-type: none"> Managing Tablespaces and Datafiles: This section assesses the abilities of Storage Administrators in creating, modifying, and describing tablespaces. It also covers recognizing data storage requirements and understanding datafile placement for efficient storage management.
Topic 5	<ul style="list-style-type: none"> Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.
Topic 6	<ul style="list-style-type: none"> Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).
Topic 7	<ul style="list-style-type: none"> Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting.

Topic 8	<ul style="list-style-type: none"> • Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.
Topic 9	<ul style="list-style-type: none"> • Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.
Topic 10	<ul style="list-style-type: none"> • Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.
Topic 11	<ul style="list-style-type: none"> • Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.

Download Oracle 1Z1-182 Exam Questions and Start Your Preparation journey Today

By practicing under the real exam scenario of this Oracle 1Z1-182 web-based practice test, you can cope with exam anxiety and appear in the final test with maximum confidence. You can change the time limit and number of questions of this Oracle 1Z1-182 web-based practice test. This customization feature of our Oracle Database 23ai Administration Associate (1Z1-182) web-based practice exam aids in practicing as per your requirements. You can assess and improve your knowledge with our Oracle 1Z1-182 practice exam.

Oracle Database 23ai Administration Associate Sample Questions (Q41-Q46):

NEW QUESTION # 41

You execute this command: CREATE SMALLFILE TABLESPACE sales DATAFILE '/u01/app/oracle/sales01.dbf' SIZE 5G SEGMENT SPACE MANAGEMENT AUTO; Which two statements are true about the SALES tablespace?

- A. It uses the database default block size.
- B. It must be smaller than the smallest BIGFILE tablespace.
- C. Free space is managed using freelists.
- D. It is a locally managed tablespace.
- E. Any data files added to the tablespace must have a size of 5 gigabytes.

Answer: A,D

Explanation:

A . Free space is managed using freelists.False. The SEGMENT SPACE MANAGEMENT AUTO clause specifies Automatic Segment Space Management (ASSM), which uses bitmaps to track free space, not freelists (used in Manual Segment Space Management).

B . It uses the database default block size.True. The BLOCKSIZE clause is not specified in the command, so the tablespace inherits the database's default block size (typically 8K unless altered via DB_BLOCK_SIZE).

C . It must be smaller than the smallest BIGFILE tablespace.False. There's no such restriction; SMALLFILE and BIGFILE tablespaces differ in structure (multiple vs. single data file), not mandated size relationships.

D . It is a locally managed tablespace.True. In Oracle 23ai, all tablespaces created without an explicit EXTENT MANAGEMENT

DICTIONARY clause are locally managed by default, using extent allocation bitmaps in the data file headers.

E. Any data files added to the tablespace must have a size of 5 gigabytes. False. The initial data file is 5G, but additional data files can have different sizes when added using ALTER TABLESPACE ... ADD DATAFILE.

NEW QUESTION # 42

Which three actions are ways to apply the principle of least privilege?

- A. Revoking execute privilege on UTL_SMTP, UTL_TCP, UTL_HTTP, and UTL_FILE from the roles/users (assuming typo for duplicate option).
- B. Setting the REMOTE_OS_AUTHENT parameter to TRUE.
- C. Using Access Control Lists (ACLs).
- D. Setting the O7_DICTIONARY_ACCESSIBILITY parameter to TRUE.
- E. Enabling Unified Auditing.

Answer: A,C,E

Explanation:

A. True. Auditing tracks privilege use, enforcing least privilege.

B. True. Revoking unnecessary PL/SQL access limits capabilities.

C. True. ACLs restrict network access precisely.

D. False. TRUE relaxes dictionary access, violating least privilege.

E. False. TRUE allows risky OS auth, weakening security.

NEW QUESTION # 43

Which three relationships between instances and Oracle databases are possible without using Multi-tenant?

- A. One instance on one server mounting and opening one database.
- B. One instance on one server that has no database mounted.
- C. Two or more instances on separate servers all mounting and opening the same database.
- D. One instance on one server mounting and opening multiple databases.
- E. One instance on one server mounting multiple databases.

Answer: A,B,C

Explanation:

A. False. One instance can't mount multiple DBs without multitenant.

B. True. RAC allows multiple instances to share one DB.

C. False. Same as A; not possible without CDB.

D. True. An instance can start in NOMOUNT with no DB.

E. True. Standard single-instance configuration.

NEW QUESTION # 44

What memory structure caches the data dictionary providing access to all database user processes?

- A. The Java Pool
- B. The Shared Pool
- C. The Large Pool
- D. The Streams Pool

Answer: B

Explanation:

D. True. The Shared Pool caches data dictionary metadata (e.g., table definitions) in the Library Cache and Dictionary Cache, accessible to all processes. Others serve different purposes (e.g., Large Pool for backups).

NEW QUESTION # 45

Which three statements are true about roles?

- **A. Roles may be granted to other roles.**
- B. Object privileges may not be granted to roles.
- C. Roles must be password protected.
- **D. The SET ROLE statement can disable one or more roles for a session.**
- E. All roles granted to a user are set on default when the user logs in.
- **F. The SET ROLE statement can enable one or more roles for a session.**

Answer: A,D,F

Explanation:

Roles in Oracle manage privileges efficiently. Let's dive into each option:

A . Roles must be password protected.

False. Roles can be password-protected (e.g., CREATE ROLE mgr IDENTIFIED BY secret), but it's optional. Non-protected roles (default) are enabled automatically if granted, requiring no password.

Mechanics: Password-protected roles need SET ROLE mgr IDENTIFIED BY secret, enhancing security for sensitive privileges.

B . Roles may be granted to other roles.

True. Roles can form hierarchies (e.g., GRANT clerk TO mgr), allowing nested privilege management.

Mechanics: A user with mgr inherits clerk privileges indirectly. Revoking clerk from mgr cascades appropriately.

Practical Use: Simplifies complex privilege structures in large organizations.

C . The SET ROLE statement can enable one or more roles for a session.

True. SET ROLE role1, role2; activates specified roles for the session, assuming they're granted and not password-protected (or password is provided).

Mechanics: Enabled roles grant their privileges immediately within the session scope.

D . Object privileges may not be granted to roles.

False. Object privileges (e.g., GRANT SELECT ON emp TO clerk) are a primary use of roles, making this statement incorrect.

Why Incorrect: Roles are designed for this purpose, contradicting the option.

E . All roles granted to a user are set on default when the user logs in.

False. Only roles marked as DEFAULT ROLE (via ALTER USER ... DEFAULT ROLE role1) are enabled at login. Non-default roles require SET ROLE.

Mechanics: Check via SELECT * FROM DBA_ROLE_PRIVS WHERE DEFAULT_ROLE='YES'.

F . The SET ROLE statement can disable one or more roles for a session.

True. SET ROLE NONE disables all roles, or SET ROLE role1 implicitly disables others not listed, providing granular control.

Practical Use: Useful for testing or restricting privileges temporarily.

NEW QUESTION # 46

.....

The price for 1Z1-182 study guide is quite reasonable, no matter you are a student or employee in the company, you can afford them. Just think that, you only need to spend some money, you can get a certificate as well as improve your ability. Besides, we also pass guarantee and money back guarantee for you fail to pass the exam after you have purchasing 1Z1-182 Exam Dumps from us. We can give you free update for 365 days after your purchasing. If you have any questions about the 1Z1-182 study guide, you can have a chat with us.
