HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 exam test torrent & HCL-DOM-AADM-12 updated training vce & HCL-DOM-AADM-12 test study dumps

In the past ten years, we always hold the belief that it is dangerous if we feel satisfied with our HCL-DOM-AADM-12 study engine and stop renovating. Luckily, we still memorize our initial determination. We are proud that our HCL-DOM-AADM-12 learning questions are so popular in the market. Please remember that all experiences will become your valuable asset in life. And it is never

too late to learn more and something new. Just buy our HCL-DOM-AADM-12 Exam Braindumps, you will find that you can reach your dream easily.

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q70-Q75):

NEW QUESTION # 70

How can administrators be proactively alerted about issues in the Domino environment?

- A. By configuring event generators in DDM
- B. By disabling SMTP routing
- C. By running the Domino Setup Utility daily
- D. By updating the server notes.ini file

Answer: A

Explanation:

Domino Domain Monitoring (DDM) is the primary tool for proactive alerting within a Domino environment. By configuring event generators in DDM, administrators can set specific thresholds for server health, mail routing delays, and security events. When these thresholds are met, DDM generates an alert in the ddm.nsf database, which can then be configured to send notifications (such as emails) to administrators, allowing them to resolve issues before they impact end users.

NEW QUESTION # 71

Which two types of replication modes are supported by Domino? (Choose two)

- A. HTTP over DAOS
- B. Pull replication
- C. Push replication
- D. Time-based replication

Answer: B,C

Explanation:

Domino replication occurs in two primary directions: Push and Pull . In Pull replication, the local server asks the remote server for changes. In Push replication, the local server sends its changes to the remote server.

Most standard Connection documents are configured for "Push-Pull" replication, which is a bidirectional exchange ensuring both replicas become identical during the task.

NEW QUESTION # 72

Which requirement must be met before installing HCL Domino on a Linux server?

- A. The system libraries required by Domino must be pre-installed
- B. The hostname must resolve through IPv6 only
- C. The server must use UEFI boot mode
- D. The root password must be less than 8 characters

Answer: A

Explanation:

Before running the HCL Domino installer on a Linux platform, the administrator must ensure that all required system libraries are pre-installed . Domino relies on specific OS-level packages (such as libcap, glibc, and libstdc++) to function correctly. If these dependencies are missing, the installation may fail, or server tasks may not launch properly after configuration.

NEW QUESTION # 73

Which of the following is required to enable DAOS on a Domino server?

- A. Modification of the server document and compact with DAOS enabled
- B. A dedicated DAOS license file
- C. Creation of the daoscat.nsf manually
- D. Server-based archiving configuration

Answer: A

Explanation:

To enable the Domino Attachment and Object Service (DAOS), an administrator must first enable it in the Server document (under the DAOS tab) by specifying a base path and the minimum attachment size. Once the server-level setting is active, the administrator must then enable DAOS on individual databases and run the compact -c -daos on command. This process converts the internal database structure to move attachments into the DAOS repository.

NEW QUESTION # 74

Which two tasks are typically configured using a Mail Policy in Domino? (Choose two)

- A. Enable full-text indexing globally
- B. Define message disclaimer text
- C. Force mail database encryption
- D. Set mailbox quota limits

Answer: B,D

Explanation:

Mail Policies allow administrators to push consistent settings to users' mail files automatically. Two of the most common administrative tasks performed here include setting mailbox quota limits to manage server storage growth and defining message disclaimer text, which ensures that legal or corporate signatures are appended to all outgoing messages. While encryption can be managed, quotas and disclaimers are standard policy-driven configurations for mail environments.

NEW QUESTION # 75

.....

Under the tremendous stress of fast pace in modern life, sticking to learn for a HCL-DOM-AADM-12 certificate becomes a necessity to prove yourself as a competitive man. Nowadays, people in the world gulp down knowledge with unmatched enthusiasm, they desire new things to strength their brains. Our HCL-DOM-AADM-12 Practice Questions have been commonly known as the most helpful examination support materials and are available from global internet storefront. As long as you study with our HCL-DOM-AADM-12 exam questions, you are going to pass the exam without doubt.
