## SAFe Practice Consultant SPC (6.0) cexamkiller Praxis Dumps & SAFe-SPC Test Training Überprüfungen

Um die Interessen zu schützen, bietet unsere Website die online Prüfungen zur Scaled Agile SAFe-SPC Zertifizierungsprüfung von EchteFrage, die von den erfahrungsreichen IT-Experten nach den Bedürfnissen bearbeitet werden. Sie werden Ihnen nicht nur helfen, die Scaled Agile SAFe-SPC Prüfung zu bestehen und auch eine bessere Zukunft zu haben.

### Scaled Agile SAFe Practice Consultant SPC (6.0) SAFe-SPC Prüfungsfragen mit Lösungen (Q42-Q47):

#### 42. Frage

According to John Kotter, why is it important to build a guiding coalition?

- A. It can build connections between Business and IT
- **B. It can help lead the transformation**
- C. It creates a cross-functional team
- D. It enables better exploration of customer needs

**Antwort: B**

Begründung:

John Kotter's model for organizational change, which is adopted in SAFe, emphasizes the need to build a "guiding coalition." This group has the influence, authority, and credibility to lead the transformation and sustain change. They guide, coordinate, and communicate the transformation vision, making it possible to overcome resistance and drive enterprise-wide change.

#### 43. Frage

(select 2) What are the benefits of cadence and synchronization?

- **A. Synchronization enables multiple perspectives to be understood, resolved, and integrated at the same time.**
- B. Synchronization enables reduction in WIP.
- C. Cadence enables variability and makes wait times predictable.
- D. They enable systems builders to operate reliably and with certainty within a safety buffer.
- **E. Cadence limits variance.**

**Antwort: A,E**

#### 44. Frage

Where are Capabilities managed?

- A. In the Value Stream planning board.
- B. In the Portfolio Kanban.
- C. In the ART Kanban.
- **D. In the Value Stream Kanban.**

**Antwort: D**

#### 45. Frage

Once an Epic is approved, an Epic Owner tracks the Epic through implementation.

- **A. True**
- B. False

**Antwort: A**

Begründung:

After an Epic is approved through the Portfolio Kanban system, the Epic Owner is responsible for shepherding the Epic through implementation-tracking progress, facilitating collaboration, and ensuring the intended outcomes are realized.

"The Epic Owner works with stakeholders to define the Epic, shepherds it through the Portfolio Kanban, and, once approved, tracks its implementation through completion." (Source: SAFe 6.0 Framework: Epic Owner; SPC 6.0 Guide, "Exploring Lean Portfolio Management")

#### 46. Frage

What description best represents Capabilities as defined in SAFe?

- **A. Capabilities are simply a level of abstraction above Features, exhibiting largely the same characteristics and practices.**
- B. Capability is a different name for Features, one that is preferred by some organizations.
- C. Capabilities are simply a different kind of Epic, exhibiting largely the same characteristics and practices.
- D. Capabilities are simply a level of abstraction above Epics, exhibiting largely the same characteristics and practices.

**Antwort: A**

Begründung:

In SAFe 6.0, Capabilities are defined as "higher-level solution behaviors that typically span multiple ARTs." They are maintained in the Solution Train Backlog and are sized and split into Features for implementation by individual ARTs. The SAFe 6.0 guidance specifically states:

"Capabilities are larger solution behaviors that often span multiple Agile Release Trains. They are typically sized to be delivered in a Planning Interval (PI) and are broken down into Features to facilitate implementation." This distinguishes Capabilities from Epics and Features. Unlike Epics, which require Lean Business Cases and approval through Portfolio Kanban, Capabilities follow a breakdown path to Features for execution.

Therefore, they are a level above Features, not a synonym for Epics or Features.
