

Free PDF 2026 Oracle 1Z0-1072-25 Questions Answers

P.S. Free & New 1Z0-1072-25 dumps are available on Google Drive shared by CramPDF: <https://drive.google.com/open?id=19FE98wdK4w6vbJY8Gq6uxxyav5nRJRk>

In the past few years, our 1Z0-1072-25 study materials have helped countless candidates pass the Oracle Cloud Solutions Infrastructure exam. After having a related certification, some of them encountered better opportunities for development, some went to great companies, and some became professionals in the field. 1Z0-1072-25 Study Materials have stood the test of time and market and received countless praises. Through the good reputation of word of mouth, more and more people choose to use 1Z0-1072-25 study torrent to prepare for the 1Z0-1072-25 exam, which makes us very gratified.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 2	<ul style="list-style-type: none"> • Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources
Topic 3	<ul style="list-style-type: none"> • Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN • FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.

Topic 4	<ul style="list-style-type: none"> • Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block • File • Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.

Most-rewarded 1Z0-1072-25 Exam Prep: Oracle Cloud Infrastructure 2025 Architect Associate offers you accurate Preparation Dumps - CramPDF

If without a quick purchase process, users of our 1Z0-1072-25 quiz guide will not be able to quickly start their own review program. So, our company employs many experts to design a fast sourcing channel for our 1Z0-1072-25 exam prep. All users can implement fast purchase and use our 1Z0-1072-25 learning materials. We have specialized software to optimize the user's purchase channels, if you decide to purchase our 1Z0-1072-25 prepare questions, you can achieve the 1Z0-1072-25 exam questions content even if the update service and efficient and convenient user experience and you will pass the exam for sure.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which TWO statements are TRUE about Private IP addresses in Oracle Cloud Infrastructure (OCI)?

- A. By default, the primary VNIC of an instance in a subnet has one primary private IP address and one secondary private IP address.
- B. Each VNIC can only have one private IP address.
- C. By default, the primary VNIC of an instance in a subnet has one primary private IP address.
- D. A private IP can have an optional public IP assigned to it if it resides in a public subnet.

Answer: C,D

Explanation:

In Oracle Cloud Infrastructure (OCI), understanding how private IP addresses work is crucial for configuring network interfaces and managing instances within your Virtual Cloud Network (VCN).

Primary VNIC and Private IP Address:

When an instance is launched in OCI, it is attached to a Virtual Network Interface Card (VNIC). The primary VNIC, which is automatically created during the instance launch, is associated with a primary private IP address by default. This private IP address is essential for the instance to communicate within the VCN. The primary private IP address is automatically assigned and cannot be removed from the primary VNIC while the instance is running. This supports the statement C.

Additional Private IPs:

Contrary to statement B, each VNIC can indeed have multiple private IP addresses, but by default, the primary VNIC comes with only one primary private IP. You can manually add secondary private IPs if needed. However, the additional IPs are not assigned by default; hence, A is incorrect.

Public IP Association:

For instances requiring internet access, a public IP address can be optionally assigned to the private IP address if the instance is in a public subnet. This is critical for scenarios where an instance needs to communicate with the internet or external networks. This aligns with statement D.

Relevant OCI Documentation:

Oracle Cloud Infrastructure Networking Overview

VNICs and Private IPs

These references provide additional context and detail on how private IP addresses work within OCI and clarify the correct statements.

NEW QUESTION # 17

Which OCI Object Storage tier is suitable for storing the backup to minimize cost while meeting the requirements of immediate accessibility and retention of 31 days?

- A. Archive tier
- B. Standard tier
- C. Auto-Tiering tier
- **D. Infrequent Access tier**

Answer: D

Explanation:

The Infrequent Access tier in OCI Object Storage is suitable for storing backups that need to be immediately accessible and retained for a specific period, such as 31 days, while also minimizing costs. This tier offers a balance between cost and accessibility, charging lower storage costs compared to the Standard tier but still allowing quick access to the data.

Use Case: The Infrequent Access tier is designed for data that is not frequently accessed but must remain readily available when needed, making it ideal for backup storage.

Oracle Cloud Infrastructure Documentation: Object Storage Tiers

NEW QUESTION # 18

Which TWO statements about the Oracle Cloud Infrastructure (OCI) File Storage Service are accurate?

- **A. File systems use Oracle-managed keys by default.**
- B. Customers can encrypt the communication to a mount target via export options.
- C. Communication with file systems in a mount target is encrypted via HTTPS.
- **D. Customers can encrypt data in their file system using their own Vault encryption key.**

Answer: A,D

Explanation:

Oracle Cloud Infrastructure (OCI) File Storage Service offers robust encryption capabilities to ensure data security.

B. Customer-Managed Encryption: Customers can choose to encrypt their data using their own keys stored in the OCI Vault service. This gives customers control over their encryption keys and enhances data security.

D. Oracle-Managed Encryption: By default, all data stored in OCI File Storage is encrypted using Oracle-managed keys. This ensures that data is encrypted at rest without requiring any action from the customer.

Incorrect Statements:

A. Communication is not encrypted via HTTPS when accessing file systems; instead, encryption in transit is typically managed via NFS over TLS.

C. Encryption of communication to a mount target is handled via network configurations, not through export options.

Reference:

Oracle Cloud Infrastructure Documentation: File Storage Encryption

NEW QUESTION # 19

Which image option allows you to create identical instances with minimal effort?

- A. Bring your own image
- **B. Create a custom image**
- C. Select an image from the OCI Marketplace
- D. Use Oracle-provided images

Answer: B

Explanation:

When you need to create identical instances with minimal effort, creating a custom image is the best option.

Custom Images: A custom image captures the exact configuration of an instance, including the OS, software, configurations, and data. By using a custom image, you can easily replicate the same setup across multiple instances, ensuring consistency and reducing the need for manual configuration each time.

Other Options:

Bring Your Own Image: This allows you to import your custom OS image into OCI, but it's more suited for cases where you are

migrating from another environment.

Select an Image from the OCI Marketplace: This provides pre-configured images from Oracle or third parties, but they may require additional setup to match your specific requirements.

Use Oracle-Provided Images: These are basic images provided by Oracle, which may not include the specific customizations you need.

Relevant OCI Documentation:

Custom Images Overview

This resource explains how to create and use custom images for quickly deploying identical instances.

NEW QUESTION # 20

How many capacity reservations would you create to meet the requirement for high availability and distribution across Availability Domains?

- A. Three
- B. Four
- C. One
- D. Two

Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), to ensure high availability and distribution across Availability Domains (ADs), the recommended approach is as follows:

Capacity Reservations for High Availability: To achieve high availability, especially across all three Availability Domains in a region, you should create three capacity reservations. Each reservation corresponds to one AD, ensuring that your instances or resources are evenly distributed and resilient to AD-level failures.

Why Three: This setup provides redundancy and load distribution across the ADs, meeting the high availability requirements.

Relevant OCI Documentation:

Capacity Reservations

This document outlines how to create and manage capacity reservations to meet high availability and fault tolerance requirements.

NEW QUESTION # 21

.....

If you are occupied with your study or work and have little time to prepare for your exam, then you can choose us. 1Z0-1072-25 training materials are edited by skilled professional experts, and therefore they are high-quality. You just need to spend about 48 to 72 hours on study, you can pass the exam. We are pass guarantee and money back guarantee for 1Z0-1072-25 Exam Materials, if you fail to pass the exam, you just need to send us your failure scanned to us, we will give you full refund, and no other questions will be asked. Online and offline service is available, if you have any questions for 1Z0-1072-25 exam materials, don't hesitate to consult us.
