**JN0-351 Dump Torrent | JN0-351 New Study Questions**

For years our team has built a top-ranking brand with mighty and main which bears a high reputation both at home and abroad. The sales volume of the JN0-351 Test Practice guide we sell has far exceeded the same industry and favorable rate about our products is approximate to 100%. Why the clients speak highly of our JN0-351 exam dump? Our dedicated service, high quality and passing rate and diversified functions contribute greatly to the high prestige of our products. We provide free trial service before the purchase, the consultation service online after the sale, free update service and the refund service in case the clients fail in the test.

## Juniper JN0-351 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Tunnels: The fundamentals of IP tunneling are emphasized, highlighting their requirements and functionalities. Mastery in configuring, monitoring, and troubleshooting tunnels equips professionals to meet the demands of the JN0-351 exam.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Spanning Tree: Networking professionals explore the principles and advantages of the Spanning Tree Protocol (STP) to ensure loop-free topologies in Layer 2 networks.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Layer 2 Switching or VLANs: This topic deepens the understanding of Layer 2 switching operations within the Junos OS, including VLAN concepts and benefits. Experienced networking professionals gain insights into configuration, monitoring, and troubleshooting techniques essential for network segmentation and efficiency.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• OSPF: The concepts and operational details of OSPF are explored, providing tools for routing efficiency. Configuration and troubleshooting mastery ensure readiness for both the exam and complex enterprise environments.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Layer 2 Security: This topic introduces Layer 2 protection mechanisms and firewall filters to fortify network security. Practical skills in configuring, monitoring, and troubleshooting these features prepare candidates to address exam objectives and real-world challenges effectively.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>• BGP: This topic focuses on the operational and conceptual elements of BGP, a cornerstone in enterprise networks.</li></ul>

## Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q128-Q133):

### NEW QUESTION # 128

Which statement is correct about the configuration shown in the exhibit?

□

- A. The ge-0/0/0 and ge-0/0/1 interfaces are operating in trunk mode.
- **B. All three interfaces are operating in access mode.**
- C. The configuration will not complete the commit check process and will error out.
- D. The ge-0/0/2 interface is operating as a Layer 3 interface.

**Answer: B**

### NEW QUESTION # 129

The ISP1.inet.0 route table has currently no routes in it.

What will happen when you commit the configuration shown on the exhibit?

□

- **A. The inet.0 route table will be imported into the ISP1.inet.0 route table.**
- B. The ISP1.inet.0 route table will be completely overwritten by the inet.0 route table.
- C. The inet.0 route table will be completely overwritten by the ISP1.inet.0 route table.
- D. The ISP1.inet.0 route table will be imported into the inet.0 route table.

**Answer: A**

Explanation:

The configuration shown in the exhibit is an example of a routing instance of type virtual-router. A routing instance is a collection of routing tables, interfaces, and routing protocol parameters that create a separate routing domain on a Juniper device. A virtual-router routing instance allows administrators to divide a device into multiple independent virtual routers, each with its own routing table. The configuration also includes a rib-group statement, which is used to import routes from one routing table to another. A rib-group consists of an import-rib statement, which specifies the source routing table, and an export-rib statement, which specifies the destination routing table. In this case, the rib-group name is inet-to-isp, and the import-rib statement specifies inet.0 as the source routing table. The export-rib statement specifies isp.inet.0 as the destination routing table. This means that the routes from inet.0 will be imported into isp.inet.0.

#### NEW QUESTION # 130

In RSTP, which three port roles are associated with the discarding state? (Choose three.)

- A. disabled
- B. root
- C. alternate
- D. designated
- E. backup

Answer: A,C,E

Explanation:

Explanation

In Rapid Spanning Tree Protocol (RSTP), there are several port roles that determine the behavior of the port in the spanning tree<sup>123</sup>. The roles include root, designated, alternate, backup, and disabled<sup>123</sup>.

The discarding state is associated with the backup, alternate, and disabled roles<sup>123</sup>. In a stable topology with consistent port roles throughout the network, RSTP ensures that every root port and designated port immediately transition to the forwarding state while all alternate and backup ports are always in the discarding state<sup>2</sup>. Disabled ports are also in the discarding state<sup>3</sup>.

Therefore, options B, C, and D are correct.

#### NEW QUESTION # 131

Referring to the exhibit, which two statements about BGP prefixes advertised by R1 to AS 65501 are true? (Choose two.)

- A. R1 will modify the AS path attribute in prefixes advertised to AS 65501
- B. R1 will modify the next-hop attribute in prefixes advertised to AS 65501
- C. R1 will modify the cluster list attribute in prefixes advertised to AS 65501
- D. R1 will modify the originator ID attribute in prefixes advertised to AS 65501

Answer: B,D

#### NEW QUESTION # 132

You are asked to configure a redundant trunk group (RTG). Which two requirements would accomplish this task? (Choose two.)

- A. Both interfaces of an RTG must be configured to service the same VLANs.
- B. Interfaces within an RTG must be configured as trunk ports.
- C. Interfaces within an RTG can be configured as access ports.
- D. The RTG must be participating in a Spanning Tree topology.

Answer: A,B

#### NEW QUESTION # 133

.....

Success in the Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) certification exam helps people update their skills. Many aspirants don't find updated Juniper JN0-351 practice test questions and fail the final test. This failure in the Juniper JN0-351 Exam leads to a loss of money and time. If you are also planning to attempt the Enterprise Routing and Switching,

Specialist (JNCIS-ENT) (JN0-351) exam and are confused about where to prepare yourself for it then you are at the right place.
