New CLO-002 Test Vce & CLO-002 Latest Test Report

The talent is everywhere in modern society. This is doubly true for IT field. With the popularity of the computer, hardly anyone can't use a computer. Working in the IT industry, don't you feel pressure? Educational level is not representative of your strength. Education is just a ticket, however really keeping your status is your strength. As IT staff, how to cultivate your strength? It is a good choice to take IT certification test which can not only help you master more skills, also can get the certificate to prove your ability. Do you want to take CompTIA CLO-002 Exam that is very popular in recent?

CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q270-Q275):

NEW QUESTION # 270
Which of the following cloud characteristics helps transform from a typical capital expenditure model to an operating expenditure model?

- A. Availability
- B. Elasticity
- C. Self-service
- D. Pay-as-you-go

Answer: D

Explanation:
Pay-as-you-go is a pricing model in which customers pay only for the resources they consume, such as compute, storage, network, or software services4. Pay-as-you-go helps transform from a typical capital expenditure model to an operating expenditure model by eliminating the upfront costs of purchasing and maintaining physical infrastructure and software licenses5. Pay-as-you-go also provides flexibility and scalability to adjust the resource consumption according to the changing business needs6.

Consumption and fixed cost models, Microsoft Azure Well-Architected Framework What is Cloud Elasticity in Cloud Computing?, The Iron.io Blog CompTIA Cloud Essentials CLO-002 Certification Study Guide, Chapter 2: Business Principles of Cloud Environments, page 51

NEW QUESTION # 271
An architect recently discovered new opportunities the cloud can provide to the company. A business analyst is currently working with the architect to document the business use-case scenarios. Which of the following should be the architect's NEXT step?

- A. Conduct a feasibility study.
- B. Initialize a PoC.
- C. Gather cloud requirements.
- D. Perform a gap analysis.

Answer: B

NEW QUESTION # 272
A business analyst is writing a disaster recovery strategy. Which of the following should the analyst include in the document? (Choose three.)

- A. Resource tagging
- B. Elasticity
- C. Replication
- D. Backups
- E. Automation
- F. Capacity on demand
- G. Geo-redundancy
- H. Autoscaling

Answer: C,D,G

Explanation:
A disaster recovery strategy is a plan that defines how an organization can recover its data, systems, and operations in the event of a disaster, such as a natural calamity, a cyberattack, or a human error. A disaster recovery strategy should include the following elements:
Backups: Backups are copies of data and files that are stored in a separate location from the original source. Backups help to restore the data in case of loss, corruption, or deletion. Backups can be performed manually or automatically, and can be stored on-premises, off-site, or in the cloud. Backups should be encrypted, secured, and tested regularly to ensure their integrity and availability.
Replication: Replication is the process of copying and synchronizing data and systems across multiple locations or platforms. Replication helps to maintain the consistency and availability of the data and systems in case of a failure or outage. Replication can be done at different levels, such as storage, database, application, or virtual machine. Replication can be synchronous or asynchronous, depending on the latency and bandwidth requirements.

Geo-redundancy: Geo-redundancy is a feature that allows the distribution and replication of data and systems across multiple geographic regions or zones. Geo-redundancy helps to ensure the resiliency and continuity of the data and systems in case of a regional disaster or disruption. Geo- redundancy can also improve the performance and latency of the data and systems by serving the requests from the nearest location. Geo-redundancy can be achieved by using cloud services that offer multi-region or multi-zone capabilities.

NEW QUESTION # 273

A company is planning to use cloud computing to extend the compute resources that will run a new resource- intensive application. A direct deployment to the cloud would cause unexpected billing. Which of the following must be generated while the application is running on-premises to predict the cloud budget for this project better?

- A. Feasibility study
- B. Proof or concept
- C. Baseline
- D. Benchmark

Answer: C

NEW QUESTION # 274

Which of the following is the risk when an IT department restricts itself to solely being an infrastructure provider?

- A. Service providers will bypass the IT department
- B. All of the above are correct
- C. Cloud providers will take over the role of the IT department
- D. Business users will bypass the IT department

Answer: D

NEW QUESTION # 275

......
