Customized HPE0-J68 Lab Simulation | HPE0-J68 Valid Test Guide

Improve your professional ability with our HPE0-J68 certification. Getting qualified by the HP certification will position you for better job opportunities and higher salary. Now, let's start your preparation with HPE0-J68 training material. The HPE0-J68 practice pdf offered by DumpExam latest pdf is the latest and valid study material which suitable for all of you. The HPE0-J68 free demo is especially for you to free download for try before you buy. You can get a lot from the HPE0-J68 simulate exam dumps and get your HPE0-J68 certification easily.

HPE Storage Solutions Sample Questions (Q300-Q305):

NEW QUESTION # 300

What performance benefit is provided by using the HPE StoreVirtual DSM for Microsoft MPIO instead of the standard MPIO?

- A. The HPE DSM increases availability and reduces latency and throughput.
- B. The iSCSI connections are blocked to non-critical nodes in the cluster by default.
- C. The storage system, which receives a copy of the data, does not service the write I/O.
- D. The storage system, which holds a copy of the requested data, services the read I/Os.

Answer: D

NEW QUESTION # 301

When adding a first 2140 4U All-Flash expansion shelf into your customer's HPE Alletra 6000 array, what considerations should be taken?

- A. Expansion shelf must be populated with same disk capacity as the head shelf
- B. 2x100GbE 2-port OCP Mezzanine adapter kit must be ordered along the expansion shelf
- C. The array model must be at least Alletra 6030 running array OS 6.1.2.0 and later
- D. HPE Services rebalancing service must be ordered along the expansion shelf

Answer: C

Explanation:

When adding a first 2140 4U All-Flash expansion shelf to an HPE Alletra 6000 array, it is crucial to ensure that the array model is at least Alletra 6030 and is running on Array OS version 6.2.0 or later. This requirement ensures compatibility between the expansion shelf and the existing array infrastructure, allowing for optimal performance and integration. Failing to meet this requirement could result in incompatibility issues or reduced functionality of the expansion shelf.

NEW QUESTION # 302

You are required to create a configuration for pricing for a customer solution for a primary storage use case. Which HPE tool can you utilize to create the required output?

- A. Ninja Stars
- B. OCA
- C. SAF
- D. CloudPhysics

Answer: B

Explanation:

The OCA (One Config Advanced) tool is HPE's primary tool for configuring and pricing solutions for customer use cases, including primary storage. OCA provides detailed configuration options, allowing you to tailor the solution to specific customer requirements and generate pricing and quotes based on the selected components and configurations. It is widely used by HPE partners and sales teams for accurate and efficient solution design and pricing.

NEW QUESTION # 303

A customer has a SAN infrastructure with an HPE C-Class blade enclosure, and a mix of ProLiant G7, Gen8 and Gen9 servers. They require a new storage platform.

How can you confirm the new storage array will be supported in the existing environment?

- A. Design an array with an older version of the firmware to ensure compatibility.
- B. Document existing server and SAN information, and consult SPOCK to ensure firmware compatibility.
- C. Check recommended firmware levels in the HP SAN Design Reference Guide to ensure firmware compatibility.
- D. Design an array with the latest firmware, and recommend that the customer engage HPE PointNext to upgrade the existing hardware.

Answer: B

Explanation:

When integrating a new storage array into an existing SAN infrastructure with HPE C-Class blade enclosures and a mix of ProLiant G7, Gen8, and Gen9 servers, it is essential to ensure firmware compatibility across all components. The best approach is to document all relevant details about the existing servers and SAN environment, including firmware versions, hardware configurations, and any specific SAN components. Then, consult the HPE SPOCK (Single Point of Connectivity Knowledge) database, which is the authoritative source for compatibility and support information regarding firmware, drivers, and hardware in HPE environments. This ensures that the new storage array will be fully compatible with the existing infrastructure, preventing potential issues related to firmware mismatches.

References:

- * HPE SPOCK
- * HPE SAN Compatibility

NEW QUESTION # 304

A customer is implementing a new high performance database environment. What type of storage should you recommend?

- A. object store
- B. system-defined storage
- C. scale-out storage
- D. network-attached storage

Answer: C

NEW QUESTION # 305

.....

One of features of HPE0-J68 training materials of us is that we can help you pass the exam just one time, and we also pass guarantee and money back guarantee for you fail to pass the exam. You just need to send your failure scanned to us, and we will give you full refund. In addition, HPE0-J68 exam dumps contain both questions and answers, which can help you have a quickly check after you finish your practice. We also have online and offline chat service staff, they possess the professional knowledge about the HPE0-J68 Training Materials, if you have any questions just contact us.
