

# Updated NCP-DB-6.10 Dumps, Exam NCP-DB-6.10 Simulator Free

DOWNLOAD the newest DumpsActual NCP-DB-6.10 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=15NI3uvafppeCh5kN8psND\\_OI72m-KC1y](https://drive.google.com/open?id=15NI3uvafppeCh5kN8psND_OI72m-KC1y)

Our Nutanix NCP-DB-6.10 Online test engine is convenient and easy to learn, it supports all web browsers. If you want, you can have offline practice. One of the most outstanding features of Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 Online test engine is it has testing history and performance review. You can have general review of what you have learnt. Besides, NCP-DB-6.10 Exam Brainsdumps offer you free demo to have a try before buying.

With DumpsActual's help, you do not need to spend a lot of money to participate in related cram or spend a lot of time and effort to review the relevant knowledge, but can easily pass the exam. Simulation test software of Nutanix NCP-DB-6.10 Exam is developed by DumpsActual's research of previous real exams. DumpsActual's Nutanix NCP-DB-6.10 exam practice questions have a lot of similarities with the real exam practice questions.

## Exam NCP-DB-6.10 Simulator Free, Official NCP-DB-6.10 Practice Test

This knowledge will help you in your career. The DumpsActual is committed to ace the entire Nutanix NCP-DB-6.10 exam preparation process simple, quick, and smart. Nutanix NCP-DB-6.10 provides you with real-time Nutanix NCP-DB-6.10 exam environment for preparation. The Nutanix NCP-DB-6.10 exam questions prices are affordable.

## Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q33-Q38):

### NEW QUESTION # 33

An NDB administrator has asked a database administrator to provision a new MongoDB database using an existing software profile. The database administrator is unable to complete this action.

What may be the cause?

- A. The administrator lacks the proper permissions in Prism Element.
- B. A database clone operation is in progress.
- C. The software profile is undergoing a patching operation.
- D. The software profile was created by another user.

**Answer: A**

Explanation:

If a database administrator is unable to provision a new MongoDB database using an existing software profile, the most likely cause

is that the administrator lacks the proper permissions in Prism Element. NDB relies on Prism Element for cluster-level operations (e.g., storage and compute resource allocation). The database administrator needs appropriate Prism Element roles (e.g., Cluster Admin) to interact with the underlying infrastructure, even if the software profile is available in NDB. Without these permissions, the provisioning action will fail.

#### NEW QUESTION # 34

A clone needs to be created on an existing database server, but there are no Authorized database servers defined to support the cloned database.

In which two ways can Database Server VMs be authorized during a Clone Create operation?

(Choose two.)

- A. Within the Database Server VM Summary window, update the database sever to be authorized for supporting cloned databases.
- **B. During the Clone creation process, click the plus icon to authorize one or more database server VMs.**
- **C. Within Time Machine, use the Actions menu and Authorize Database Server VMs to identify which database server VMs to authorize for clones.**
- D. During the database server provisioning process, flag the database server to be authorized for supporting cloned databases.

**Answer: B,C**

Explanation:

When creating a clone on an existing database server but no Authorized database servers are defined to support the cloned database, the administrator must authorize the necessary Database Server VMs. Two valid methods exist within NDB: (1) Using the Time Machine interface, the administrator can navigate to the Actions menu and select "Authorize Database Server VMs" to designate specific VMs for clone support, providing a proactive authorization step. (2) During the Clone creation process, the wizard includes an option (e.g., a plus icon) to authorize one or more database server VMs on the fly, streamlining the process if authorization is needed mid- operation.

#### NEW QUESTION # 35

An administrator created a database clone that is scheduled for removal on the last day of the month.

A request has been received to keep the clone for an additional 14 days. After selecting the desired clone, how should the administrator satisfy this task?

- A. Update the Removal schedule to the desired date.
- B. Update the Removal schedule to the end of the month.
- C. Remove the Removal schedule, then add the desired removal schedule.
- **D. Select Update and modify the Removal schedule.**

**Answer: D**

Explanation:

The Removal schedule is a feature of Nutanix Era that allows you to specify when a database clone will be automatically deleted. You can modify the Removal schedule of an existing clone by selecting the clone from the Clones page, clicking on the Update button, and changing the Removal schedule option to the desired date. This way, you can extend or shorten the lifespan of a clone as per your requirements. You do not need to remove the existing Removal schedule and add a new one, as this would be an unnecessary step. You also do not need to update the Removal schedule to the end of the month, as this would not meet the request of keeping the clone for an additional 14 days.

#### NEW QUESTION # 36

An administrator needs to provision multiple database clones from the same source database for different purposes, such as QA and Test/Development. To avoid resource starving, the administrator wants to differentiate VM resources for each department. What is the most efficient way to accomplish this task?

- A. Use a VM Template for each department.
- **B. Create multiple Compute profiles.**
- C. Leverage NCM Self Service to deploy database clones.

- D. Generate a playbook to resize database VMs when released.

**Answer: B**

Explanation:

An administrator needs to provision multiple database clones from the same source database for different purposes (e.g., QA and Test/Development) while avoiding resource starvation by differentiating VM resources for each department. The most efficient way to achieve this is by creating multiple Compute profiles in NDB. Compute profiles define CPU, memory, and other resource allocations for VMs, allowing the administrator to tailor resource limits (e.g., higher resources for QA, lower for Development) and apply them during clone provisioning. This approach is built into NDB, ensuring consistent resource management without manual adjustments.

#### **NEW QUESTION # 37**

What must be configured in Prism Element to allow the NDB server and CVMs to facilitate iSCSI connections?

- **A. Data Services IP**
- B. Backplane IP
- C. Virtual IP
- D. Secondary DNS IP

**Answer: A**

Explanation:

To enable iSCSI connections between the Nutanix Database Service (NDB) server, Controller VMs (CVMs), and Prism Element, a Data Services IP must be configured in Prism Element. The Data Services IP acts as a cluster-wide address that facilitates iSCSI target discovery and connectivity. It is used by Nutanix Volumes (a block storage service) to present storage to external clients or services, such as the NDB server, via the iSCSI protocol. This IP ensures that iSCSI traffic is routed correctly and remains available even if a CVM fails, as ownership of the Data Services IP can move to another CVM in the cluster.

#### **NEW QUESTION # 38**

.....

To increase your chances of passing Nutanix's certification, we offer multiple formats for braindumps for all NCP-DB-6.10 exams at DumpsActual. However, since not all takers have the same learning styles, we devise a customizable module to suite your needs. More importantly, our commitment to help you become NCP-DB-6.10 Certified does not stop in buying our products. We offer customer support services that offer help whenever you'll be need one.

**Exam NCP-DB-6.10 Simulator Free:** <https://www.dumpsactual.com/NCP-DB-6.10-actualtests-dumps.html>

NCP-DB-6.10 original questions can satisfy all levels of examinees study situations, If you are satisfied with the NCP-DB-6.10 exam torrent, you can make the order and get the latest NCP-DB-6.10 study material right now, For candidates who are going to buy NCP-DB-6.10 exam torrent online, you may pay more attention to the privacy protection, Nutanix Updated NCP-DB-6.10 Dumps Candidates can get timely help when needed.

Intuit and Emergent Research that's us recently conducted a survey NCP-DB-6.10 asking small business owners their views on the impact automation technology will have on their business over the nextyears.

### **Pass Guaranteed High Hit-Rate Nutanix - Updated NCP-DB-6.10 Dumps**

And, more importantly, when you can show your talent in these areas, naturally, Certification NCP-DB-6.10 Training your social circle is constantly expanding, you will be more and more with your same interests and can impact your career development of outstanding people.

NCP-DB-6.10 Original Questions can satisfy all levels of examinees study situations, If you are satisfied with the NCP-DB-6.10 exam torrent, you can make the order and get the latest NCP-DB-6.10 study material right now.

For candidates who are going to buy NCP-DB-6.10 exam torrent online, you may pay more attention to the privacy protection, Candidates can get timely help when needed.
