多くの受験者は、LEED-Green-Associate試験に合格するための準備で困難に直面しています。しかし、当社の教材は、受験者が試験に簡単に合格するのに役立ちます。LEED-Green-Associateガイドの質問は、USGBC学習者が脆弱なリンクを見つけて対処するのに役立つ統計レポート機能を提供できます。LEED-Green-Associateテストトレントは、タイミングの機能と試験のシミュレーションを強化します。タイマーを設定して試験をシミュレートし、学習者が速度を調整してアラートを維持できるようにします。LEED-Green-Associateガイドの質問は、学習者が試験をマスターして合格するのに非常に便利です。

USGBC LEED-Green-Associate 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">• Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
トピック 2	<ul style="list-style-type: none">• Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.
トピック 3	<ul style="list-style-type: none">• Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.

トピック 4	<ul style="list-style-type: none"> • Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.
トピック 5	<ul style="list-style-type: none"> • Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.
トピック 6	<ul style="list-style-type: none"> • LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.

USGBC LEED Green Associate Exam 認定 LEED-Green-Associate 試験問題 (Q110-Q115):

質問 # 110

Which of the following strategies help improve daylighting in an office building?

- A. Work with the project glazing contractor to specify low argon windows
- B. Provide individual occupant task lighting
- C. Locate private offices toward the building perimeter and organize cubicles toward the building core
- **D. Locate private offices toward the building core and organize cubicles at the perimeter**

正解: D

質問 # 111

Which term describes misinformation presented to consumers to portray a product or policy as being more environmentally friendly than it is?

- A. Environmental certification
- B. Green infrastructure
- C. Biomimicry
- **D. Greenwashing**

正解: D

解説:

Greenwashing is a term that describes misinformation presented to consumers to portray a product or policy as being more environmentally friendly than it is. Greenwashing can be done by using vague or misleading claims, false labels or certifications, irrelevant or exaggerated benefits, or hidden trade-offs. Greenwashing can deceive consumers into buying products or supporting policies that are not truly green, and undermine the credibility and effectiveness of genuine green initiatives¹. Reference: LEED v4 Green Associate Candidate Handbook¹, EPA's Greenwashing

質問 # 112

Which of the following is an Environmental Concern when referring to Energy and Atmosphere?

- A. Use of native species
- **B. Resource depletion**
- C. Occupant comfort
- D. Ventilation levels

正解: B

解説:

Explanation

Resource depletion is a major environmental concern related to energy use. The extraction and use of non-renewable energy resources (such as fossil fuels) can lead to their depletion over time. This is why strategies that reduce energy use or utilize renewable energy sources are important in green building practices. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

質問 # 113

What standard addresses Indoor Environmental Quality?

- A. The Montreal Protocol
- B. ASHRAE 90.1
- **C. ASHRAE 62.1**
- D. Energy Policy Act of 1992 (EPAct of 1992)

正解: C

解説:

ASHRAE 62.1 is the standard for ventilation and acceptable indoor air quality in commercial and institutional buildings. It specifies the minimum ventilation rates and other measures to provide good indoor air quality for occupants. LEED v4 references ASHRAE 62.1 as a prerequisite for the Indoor Environmental Quality credit category.

Reference:

ASHRAE 62.1 from the LEED v4 Green Associate Candidate Handbook, page 18.

Enhance Indoor Environmental Quality (IEQ) from the WBDG website, section on Adequate Ventilation and Exhaust.

質問 # 114

A building owner has set a goal of reducing water use by 20% for the upcoming year. Which of the following strategies will aid in reducing indoor water demand to achieve the water reduction goal set by the owner?

- A. Using potable water for flush functions
- **B. Installing dual-flush toilets**
- C. Installing building-level water meters
- D. Collecting rainwater in cisterns

正解: B

解説:

Explanation

Installing dual-flush toilets can significantly reduce indoor water demand. Dual-flush toilets have two flush options: a half flush for liquid waste and a full flush for solid waste. By using less water for liquid waste, these toilets can reduce overall water consumption by up to 30%, helping to achieve the owner's water reduction goal. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

質問 # 115
