Pass CPHQ Guaranteed & CPHQ Valid Exam Sample

Will you feel nervous in the exam? If you do, just choose us, our CPHQ Soft test engine can stimulate the real exam environment, which will help you know the procedure of the exam, and will strengthen your confidence. Moreover CPHQ exam dumps are high-quality, and we have professional experts to compile them, and they can help you pass the exam just one time. We offer you free

demo to have a try for CPHQ Exam Dumps, and free update for one year. If you indeed have questions, just contact with us.

NAHQ Certified Professional in Healthcare Quality Examination Sample Questions (Q625-Q630):

NEW QUESTION # 625

The separate services of Pharmacy and Nursing are having difficulty developing an action plan for medication errors. Pharmacy Services states that Nursing Services causes the majority of the problems related to errors, while Nursing Services states the opposite. The quality professional's role in resolving this problem is to:

- A. Assign the task to an uninvolved manager
- **B. Facilitate discussion between the groups to enable them to assume ownership of their portions of the problem**
- C. Refer the problem to the facility wide quality council
- D. Provide them with directives on how to solve the problem

Answer: B

NEW QUESTION # 626

A team has identified that labeled cutting boards are needed in a kitchen to decrease cross- contamination. After a new process has been implemented, it is discovered that the labeled cutting boards are not being used.

Which of the following is the next action the team should take?

- A. Initiate progressive discipline.
- **B. Determine barriers to compliance.**
- C. Increase monitoring.
- D. Conduct a root cause analysis.

Answer: B

Explanation:

When it is discovered that labeled cutting boards, which were introduced to decrease cross- contamination, are not being used, the next logical step is to determine barriers to compliance. This step is crucial for the following reasons:

Identifying the Root Cause: Before taking any corrective actions, it is important to understand why staff members are not using the labeled cutting boards. Barriers might include a lack of awareness, inadequate training, inconvenience, or resistance to change.

Addressing the Correct Issue: Without identifying the barriers, any action taken may not be effective. For instance, increasing monitoring or initiating discipline without understanding why the new process is not being followed could lead to frustration and further non-compliance.

Facilitating Improvement: Once the barriers are identified, targeted interventions can be developed. This might include additional training, revising the process for ease of use, or addressing any misconceptions about the importance of the change.

Ensuring Sustainability: By resolving the underlying issues that prevent compliance, the organization can ensure that the process improvement is sustained over time, leading to better outcomes.

NEW QUESTION # 627

Following the opening of a new stand-alone behavioral health center, the director is challenged with development of a Quality Council. After identifying membership, the next step is to

- **A. Identify quality priorities**
- B. Charter project improvement teams
- C. Educate members on regulatory processes
- D. Develop quality indicators

Answer: A

Explanation:

Establishing a Quality Council involves defining its purpose and focus to guide quality improvement efforts effectively.

Option A (Educate members on regulatory processes): Education is important but follows setting priorities to ensure relevance.

Option B (Identify quality priorities): This is the correct answer. The NAHQ CPHQ study guide states, "After forming a Quality Council, the next step is to identify quality priorities based on data and organizational needs to focus improvement efforts" (Domain 3). For a behavioral health center, priorities might include suicide prevention or medication safety.

Option C (Charter project improvement teams): Chartering teams follows priority identification.

Option D (Develop quality indicators): Indicators are developed after priorities are set to measure progress.

CPHQ Objective Reference: Domain 3: Organizational Leadership, Objective 3.1, "Establish Quality Council priorities," emphasizes setting priorities. The NAHQ study guide notes, "Identifying priorities guides the council's work" (Domain 3).

Rationale: Identifying priorities ensures the council's focus, aligning with CPHQ's leadership principles.

NEW QUESTION # 628

When allocating limited resources to meet strategic objectives, management decisions should be driven by

- A. outcome data.
- B. accreditation standards.
- C. consultant recommendations.
- D. local competition.

Answer: A

Explanation:

When allocating limited resources to meet strategic objectives, management decisions should be driven by outcome data. This is because outcome data provides evidence-based results that reflect the effectiveness and impact of a particular strategy or intervention. By focusing on outcome data, management can ensure that resources are being used in the most effective and efficient manner to achieve the desired results. This approach aligns with the principles of healthcare quality, which emphasize the use of data to inform decision-making and improve performance.

* Resource allocation is the process of identifying and assigning available resources to an initiative.

Effective allocation of resources helps maximize the impact of project resources while still supporting your team's goals.

* Gathering and recording as much information as possible is the key to making good resource allocation

* decisions. In short, knowing everything you possibly could about your resources, their availability, and the projects in most need of them lets you effectively match needs with resources.

* What Is Resource Allocation? Here's How to Allocate Resources [2024] * Asana Resources | Project planning | What is resource allocation? Learn how ... What is resource allocation? Learn how to allocate resources Julia Martins January 15th, 2024 8 min read Summary Project managers and teams can struggle to make balanced resource allocation decisions, often opting for too much or too little. But the key to navigating this delicate balance is continuous adjustment and real-time responsiveness to project needs. This approach ensures that resources are optimally utilized, preventing both surplus and shortfall and steering towards project success with precision and efficiency.

NEW QUESTION # 629

"Likelihood of desired health outcomes" corresponds to clinicians' view that, with respect to outcomes, there are only probabilities, not certainties, owing to factors-such as patients' genetically determined physiological reliance-that influence:

- A. Outcomes of care and now are within clinicians' control
- B. High cost interventions
- C. Outcomes of care and yet are beyond clinicians' control
- D. The primary concerns of patients

Answer: C

NEW QUESTION # 630

.....

There are three versions of Certified Professional in Healthcare Quality Examination test torrent—PDF, software on pc, and app online, the most distinctive of which is that you can install CPHQ test answers on your computer to simulate the real exam environment, without limiting the number of computers installed. Through a large number of simulation tests, you can rationally

arrange your own CPHQ exam time, adjust your mentality in the examination room, find your own weak points and carry out targeted exercises. But I am so sorry to say that CPHQ Test Answers can only run on Windows operating systems and our engineers are stepping up to improve this. In fact, many people only spent 20-30 hours practicing our CPHQ guide torrent and passed the exam. This sounds incredible, but we did, helping them save a lot of time.
