

# Quiz Exam HPE0-S59 Blueprint - Unparalleled HPE Compute Solutions Test Questions

2026 Latest Exam4Free HPE0-S59 PDF Dumps and HPE0-S59 Exam Engine Free Share: <https://drive.google.com/open?id=12dMc4LB4chuRd0HWLoU4piYKuYOO0b-X>

Valid HP HPE0-S59 test questions and answers will make your exam easily. If you still feel difficult in passing exam, our products are suitable for you. HPE Compute Solutions HPE0-S59 Test Questions and answers are worked out by Exam4Free professional experts who have more than 8 years in this field.

HP HPE0-S59 exam is a comprehensive test that evaluates an individual's ability to understand and apply the concepts related to HPE compute solutions. HPE0-S59 exam covers a wide range of topics such as HPE compute solutions architecture, planning and designing HPE compute solutions, installing, configuring, and upgrading HPE compute solutions, managing and monitoring HPE compute solutions, and troubleshooting HPE compute solutions. To pass the exam, candidates must demonstrate their proficiency in all these areas and score at least 65% on the exam. The HP HPE0-S59 Exam is an excellent way for IT professionals to validate their skills and knowledge in HPE compute solutions and enhance their career prospects.

## HPE0-S59 Exam Braindumps: HPE Compute Solutions & HPE0-S59 Certification Training

The internet is transforming society, and distance is no longer an obstacle. You can download our HPE0-S59 exam simulation from our official website, which is a professional platform providing the most professional HPE0-S59 practice materials. You can get them within 15 minutes without waiting. What is more, you may think these high quality HPE0-S59 Preparation materials require a huge investment on them. Yes, we do invest a lot to ensure that you can receive the best quality and service.

HP HPE0-S59 (HPE Compute Solutions) Certification Exam is a widely recognized certification exam designed for IT professionals who are responsible for managing and implementing HPE compute solutions in enterprises. HPE0-S59 Exam is designed to test the knowledge and skills of candidates on various topics related to HPE compute solutions, such as installation, configuration, management, troubleshooting, and optimization.

## HPE Compute Solutions Sample Questions (Q76-Q81):

### NEW QUESTION # 76

Which statement about HPE Superdome nPars is true?

- A. Chassis in the same nPar can have different memory configuration

- B. nPars are supported only with 3rd Generation Intel Xeon Scalable Processors
- C. Chassis in the same nPar can have different CPU configuration
- D. Rack Management Controller is required for nPar configuration

**Answer: D**

Explanation:

The Rack Management Controller (RMC) is a critical component for configuring nPartitions (nPars) in HPE Superdome systems. The RMC provides the necessary control and management interfaces to define and manage nPars, ensuring proper allocation of resources and isolation of workloads.

Reference: HPE Superdome Flex Management Guide

### NEW QUESTION # 77

How will traffic for a given network be affected if the purpose is changed from General to VM Migration?

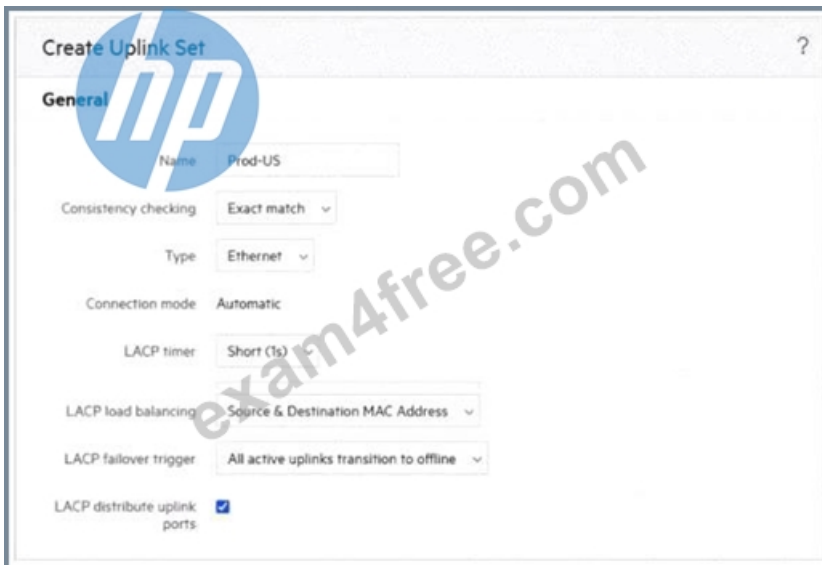

The screenshot shows the 'Create Network' configuration page. The 'Purpose' dropdown menu is set to 'General'. The 'Smart link' checkbox is checked. The 'Preferred bandwidth' is set to 25 Gb/s and the 'Maximum bandwidth' is set to 50 Gb/s. The 'Name' field contains 'Production'. The 'Type' is set to 'Ethernet'. The 'VLAN' is set to 'Tagged' and the 'VLAN ID' is '101-105'. The 'Associate with IPv4 subnet ID' and 'Associate with IPv6 subnet ID' fields are both set to 'none'. A watermark 'exam4free.com' is overlaid on the page.

- A. If VM Migration is selected, all types of traffic other than vMotion will be blocked.
- B. This parameter will allow an administrator to define a VMkernel port.
- C. Changing this parameter does not affect the behavior of the network or traffic.
- D. Changing this parameter to VM Migration will give higher priority for vMotion traffic.

**Answer: D**

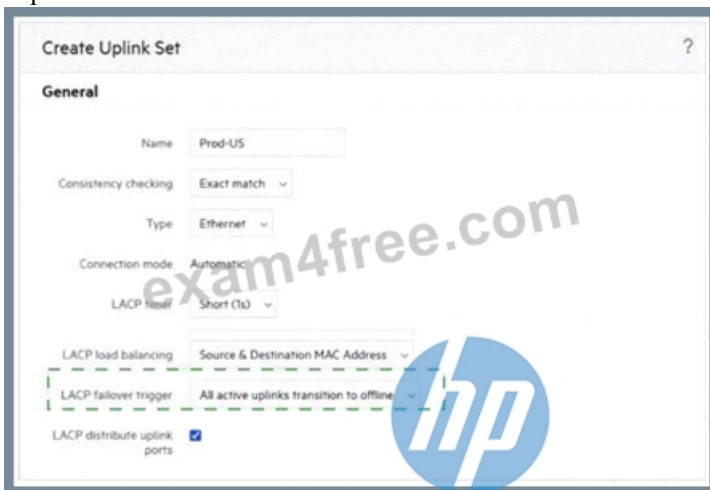

### NEW QUESTION # 78

An HPE Synergy customer needs to prevent a timeout and loss of communication during an external switch firmware upgrade. Click the parameter that the customer should configure within an uplink set to meet this requirement

**Answer:**

**Explanation:**

**Explanation:**

To prevent a timeout and loss of communication during an external switch firmware upgrade, the customer should configure the LACP failover trigger within the uplink set. By setting the LACP failover trigger to " All active uplinks transition to offline, " the configuration ensures that the traffic will be redirected to available uplinks in the event of an uplink failure or during the upgrade process, maintaining communication and preventing timeouts.

Reference: HPE Synergy Configuration Guide

### NEW QUESTION # 79

Match HPE SimpliVity team with the definition.

Term	Definition
Arbiter	Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
Compute node	Provides centralized management and events end-point for vCenter.
Intelligent Workload Optimizer	Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
Management Virtual Controller	Facilitates communication between nodes and resolves state conflicts to ensure service continuity.

**Answer:**

**Explanation:**

Term	Definition
Arbiter	Facilitates communication between nodes and resolves state conflicts to ensure service continuity.
Compute node	Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
Intelligent Workload Optimizer	Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
Management Virtual Controller	Provides centralized management and events end-point for vCenter.

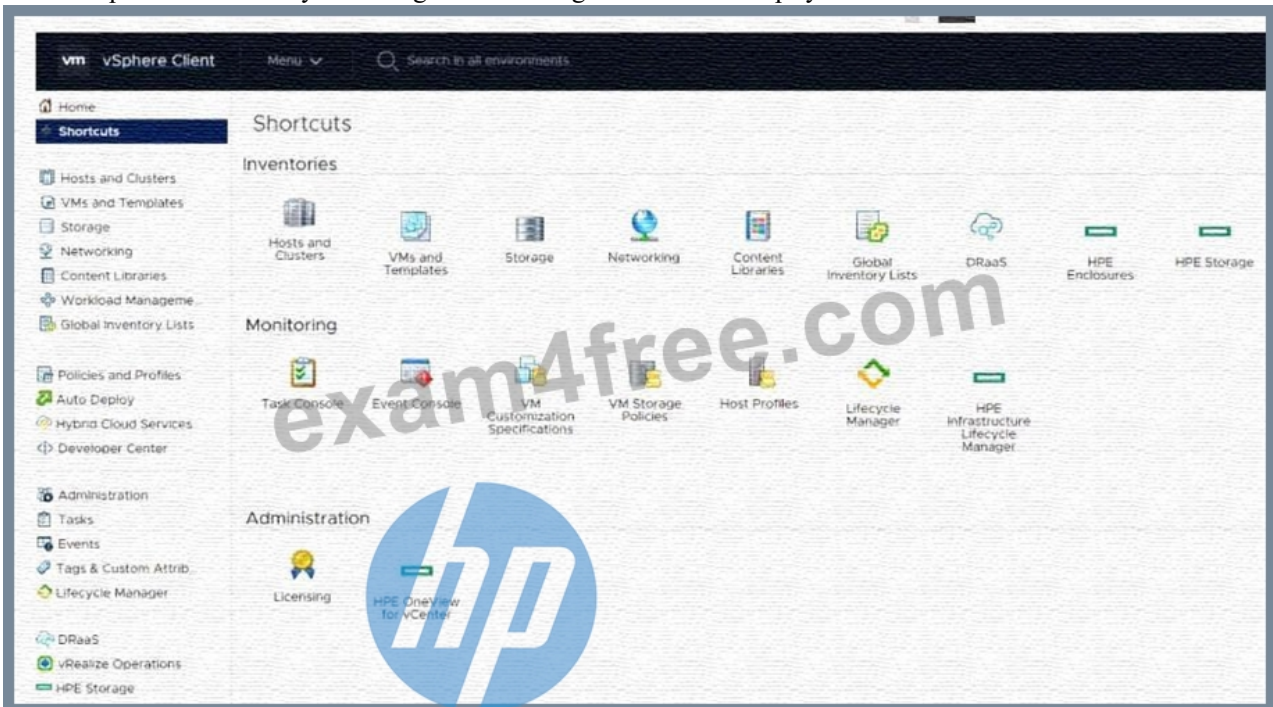

**Explanation:**

Here are the correct matches for each HPE SimpliVity term with their respective definitions:

- \* Arbiter Definition: Facilitates communication between nodes and resolves state conflicts to ensure service continuity.
- \* Compute node Definition: Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
- \* Intelligent Workload Optimizer Definition: Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
- \* Management Virtual Controller Definition: Provides centralized management and events end-point for vCenter.
- \* Arbiter: The Arbiter in an HPE SimpliVity environment is responsible for ensuring communication between nodes and resolving any state conflicts, which is crucial for maintaining service continuity.
- \* Compute node: In an HPE SimpliVity environment, a compute node refers to non-hyperconverged servers that provide additional compute capacity while utilizing the storage from hyperconverged nodes.
- \* Intelligent Workload Optimizer: This component integrates with VMware's Distributed Resources Scheduler (DRS) to optimize the placement of virtual machine (VM) compute resources, ensuring they are efficiently distributed across the environment.
- \* Management Virtual Controller: This controller provides centralized management and serves as the events end-point for vCenter, allowing for streamlined management and monitoring of the SimpliVity environment.

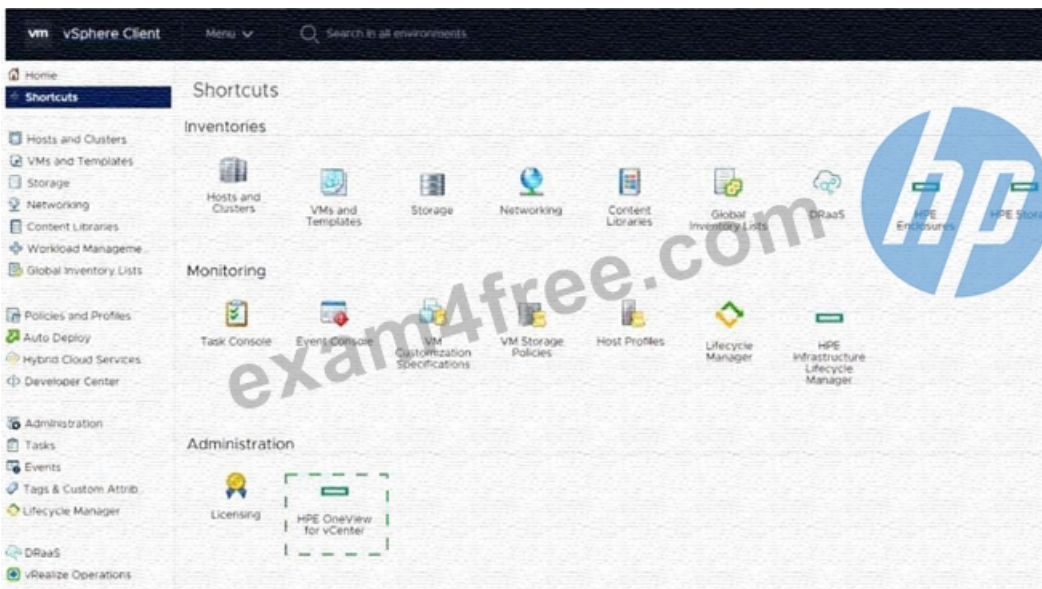

**NEW QUESTION # 80**

Click the option that will allow you to change the ESXI image used In an OS Deployment Plan.

**Answer:**

Explanation:

Explanation:

Click the "HPE OneView for vCenter" icon under the Administration section

\* HPE OneView for vCenter (under Administration): This icon provides access to the plugin's administrative console and configuration settings. Within this interface, there is a Deployment tab (or sub-page) specifically designed for managing OS Build Plans (or OS Deployment Plans). From the Deployment page, administrators can view, create, edit, and delete build plans, as well as upload or remove ESXi ISO images used within those plans.

\* HPE Infrastructure Lifecycle Manager (under Monitoring): This icon is primarily used for infrastructure health monitoring and firmware remediation (managing Service Packs for ProLiant - SPP), rather than operating system deployment plans.

\* HPE Enclosures and HPE Storage (under Inventories): These icons provide inventory views of the physical enclosure and storage resources managed by the plugin.

Therefore, to change the ESXi image used in an OS Deployment Plan, you must navigate to the administrative settings of the plugin by clicking the HPE OneView for vCenter icon in the Administration section of the Shortcuts menu.

## NEW QUESTION # 81
