# 1z0-1093-25 Study Guide - Valid 1z0-1093-25 Exam Cost

P.S. Free & New 1z0-1093-25 dumps are available on Google Drive shared by ValidTorrent: https://drive.google.com/open?id=14V2Bb2RPFBk8QOAVFMf7r9h90p9J9OWV

These 1z0-1093-25 PDF Questions are being presented in practice test software and PDF dumps file formats. The Oracle 1z0-1093-25 desktop practice test software is easy to use and install on your desktop computers. Whereas the other 1z0-1093-25 web-based practice test software is concerned, this is a simple browser-based application that works with all operating systems. Both practice tests are customizable, simulate actual exam scenarios, and help you overcome mistakes.

## Oracle 1z0-1093-25 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure. |

| | |
|---|---|
| Topic 2 | • Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment. |
| Topic 3 | • MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment. |
| Topic 4 | • Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces. |
| Topic 5 | • NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud. |

# Valid 1z0-1093-25 Exam Cost & 1z0-1093-25 Valid Test Duration

In order to evaluate the performance in the real exam like environment, the candidates can easily purchase our quality 1z0-1093-25 preparation software. Our 1z0-1093-25 exam software will test the skills of the customers in a virtual exam like situation and will also highlight the mistakes of the candidates. The free 1z0-1093-25 exam updates feature is one of the most helpful features for the candidates to get their preparation in the best manner with latest changes. The Oracle introduces changes in the 1z0-1093-25 format and topics, which are reported to our valued customers. In this manner, a constant update feature is being offered to 1z0-1093-25 exam customers.

# Oracle Cloud Database Services 2025 Professional Sample Questions (Q71-Q76):

**NEW QUESTION # 71**
During the provisioning of an Oracle Cloud Infrastructure (OCI) Base Database Service (BaseDB) virtual machine (VM), what is the PRIMARY purpose of specifying the database name (DB Name)?

- A. To select the character set for the operating system.
- B. To create the initial database instance and its associated files.
- C. To define the hostname for the database server.
- D. To determine the operating system user account used for database administration.

**Answer: B**

Explanation:
Database Name (DB Name):
When provisioning a BaseDB VM, the database name is used to create the initial instance. It specifies how the database will be identified and helps in creating associated system files, such as control files, redo log files, and datafiles. This name is crucial for database instance management and connectivity within the OCI environment.
The DB name becomes part of the DB System resource identifier in OCI, which is used in automation and management tasks.
Why the other options are incorrect:
* A: The hostname is specified independently during network configuration.

* B:OS user accounts are configured separately.
* D:The character set is chosen during database configuration, not based on the DB name.

**NEW QUESTION # 72**
Which two actions can be performed using the Automatic Database Diagnostic Monitor (ADDM) within Database Management to diagnose cloud database performance?

* A. Generate recommendations for SQL plan baselines.
* B. Identify root causes of performance bottlenecks, such as excessive I/O or CPU contention.
* C. Automatically create indexes to improve query performance.
* D. Automatically apply all ADDM recommendations to the database.

**Answer: A,B**

Explanation:
A: Generate recommendations for SQL plan baselines:
* ADDM analyzes historical data andSQL execution plans, suggesting baseline adjustments to optimize performance.
* Recommendations may includeusing an existing baselineor creating a new one.
C: Identify performance bottlenecks:
* ADDM pinpoints issues related to:
* I/O contention
* CPU utilization
* Memory bottlenecks
* Locking issues
* Helps DBAs understand which database components are causing slowdowns.
Why the other options are incorrect:
* B. Automatically applying recommendations:ADDM only suggests actions; DBAs must manually review and implement them.
* D. Creating indexes:ADDM does not create indexes automatically; it may suggest them, but implementation requires DBA action.

**NEW QUESTION # 73**
Which two of the following options are valid statements regarding the management of the operating system on a Base Database Service Virtual Machine DB System?

* A. Customers are responsible for the security and maintenance of the operating system, including applying necessary patches and updates.
* B. Oracle manages the underlying operating system patching and updates, ensuring the system remains secure and compliant.
* C. Customers are responsible for the initial OS installation, but then patching is controlled entirely by Oracle.
* D. Direct SSH access to the underlying VM is restricted, and all OS-level operations must be performed through the Web Console.
* E. Customers have full root access to the underlying operating system of the Virtual Machine DB System, allowing for customization and installation of custom software.

**Answer: A,E**

**NEW QUESTION # 74**
When a new security patch is released for the Oracle Database software on a BaseDB VM system, what is the recommended approach for applying it in a production environment?

* A. Wait for Oracle Cloud Infrastructure to automatically apply the security patch to all BaseDB VM systems.
* B. Download the patch and apply it to a non-production environment that mirrors the production environment for testing before applying it to production.
* C. Immediately apply the patch directly to the production database during off-peak hours to minimize potential security vulnerabilities.
* D. Apply the patch to a production standby database (if one exists) and then failover to the patched standby.

**Answer: B**

Explanation:

B: Testing patches in a non-production environment:
* Critical to ensure that the patch does not introduce performance issues or compatibility problems.
* Best Practice:Apply the patch to astaging environmentthat mirrors production, validate stability, and then proceed to production.
* Minimizes the risk of unplanned downtime or disruptions.
Why the other options are incorrect:
* A. Immediate application in production:Risky as untested patches might cause outages.
* C. Automatic patching by OCI:OCI does not automatically apply database patches; the customer must manage this.
* D. Patching the standby and failing over:While a good strategy when applicable, it still requires prior testing.

## NEW QUESTION # 75

The concept of 'schema-less' in the context of NoSQL databases primarily refers to what?

- A. Data is stored in a highly structured format, mirroring the tabular structure of relational databases with predefined columns and data types.
- B. All data stored within the database must conform to a single, universally defined schema for consistency.
- C. Data is stored in a binary format, eliminating the need for any schema or data interpretation.
- D. The database automatically infers the schema from the data being inserted, without requiring any explicit schema definition beforehand.

**Answer: D**

Explanation:
Schema-less in NoSQL:
This means you don't need to define a rigid, fixed structure before data insertion. Each record can have its own structure, allowing flexibility for evolving data models. This is useful for unstructured or semi-structured data.
Why the other options are incorrect:
* B:This describes relational databases.
* C:This describes the structured nature of SQL databases.
* D:While binary formats may be used, schema-less refers to the logical, not physical, structure.

## NEW QUESTION # 76

......

Since the content of the examination is also updating daily, you will need real and latest Oracle 1z0-1093-25 Dumps to prepare successfully for the 1z0-1093-25 Certification Exam in a short time. People who don't study from updated 1z0-1093-25 questions fail the examination and loss time and money.
