Salesforce Salesforce-Data-Cloud Exam | Vce Salesforce-Data-Cloud File - Always Available for your Demands

P.S. Free & New Salesforce-Data-Cloud dumps are available on Google Drive shared by TorrentValid:
https://drive.google.com/open?id=1D_r6Rr_PtuwcapVXicMldSbn9fvWIH8G

Do you want to get the Salesforce-Data-Cloud exam braindumps as quickly as you finish paying, then choose the Salesforce-Data-Cloud study material of us, we can do this for you. You can pass the exam only just need to spend about 48 to 72 hours in practicing. The Salesforce-Data-Cloud exam braindumps of us is verified by experienced experts, therefore the quality and the accuracy of the Salesforce-Data-Cloud Study Materials can be guaranteed, and we also pass guarantee and money back guarantee for your fail to pass the exam.

With our software version of our Salesforce-Data-Cloud guide braindumps, you can practice and test yourself just like you are in a real exam for our Salesforce-Data-Cloud study materials have the advandage of simulating the real exam. The results of your Salesforce-Data-Cloud Exam will be analyzed and a statistics will be presented to you. So you can see how you have done and know which kinds of questions of the Salesforce-Data-Cloud exam are to be learned more.

Salesforce-Data-Cloud Dump Collection & Salesforce-Data-Cloud Study Tool

Our company is a professional certificate exam materials provider, we have occupied in this field for years, and we have rich experiences. Salesforce-Data-Cloud exam cram is edited by professional experts, and they are quite familiar with the exam center, and therefore, the quality can be guaranteed. In addition, Salesforce-Data-Cloud training materials contain both questions and answers, and it also has certain quantity, and it's enough for you to pass the exam. In order to strengthen your confidence for Salesforce-Data-Cloud Training Materials , we are pass guarantee and money back guarantee, if you fail to pass the exam we will give you full refund, and no other questions will be asked.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q146-Q151):

NEW QUESTION # 146
Which two dependencies can prevent a Data Stream from being deleted?

- A. A data stream attribute is used in Calculated Insight
- B. A data stream attribute is used in Activation
- C. A data stream attribute is mapped to a Data Model object
- D. A data stream attribute is used in Segmentation

Answer: A,C

Explanation:
A data stream cannot be deleted if any of its attributes are mapped to a Data Model object or used in a Calculated Insight3. These dependencies need to be removed before deleting the data stream.

NEW QUESTION # 147
What can be customized in the Data Cloud canonical model?

- A. Objects
- B. Fields
- C. Objects and Fields
- D. Objects, Fields, and Relationships

Answer: D

Explanation:
You can customize the Data Cloud canonical model by adding, editing, or deleting objects,fields, and relationships. You can also modify the properties, labels, and descriptions of these components.

NEW QUESTION # 148
Northern Trail Outfitters wants to be able to calculate each customer's lifetime value (LTV) but also create breakdowns of the revenue sourced by website, mobile app, and retail channels. How should this use case be addressed in Data Cloud?

- A. Flow orchestration
- B. Nested segments
- C. Metrics on metrics
- D. Streaming data transformations

Answer: D

Explanation:
This feature can help Northern Trail Outfitters calculate each customer's lifetime value (LTV) and create breakdowns of the revenue sourced by different channels. Streaming data transformations allow you to transform and enrich streaming data from different sources using formulas and operators. References:

NEW QUESTION # 149
Cumulus Financial uses Service Cloud as its CRM and stores mobile phone, home phone, and work phone as three separate fields for its customers on the Contact record. The company plans to use Data Cloud and ingest the Contact object via the CRM Connector.
What is the most efficient approach that a consultant should take when ingesting this data to ensure all the different phone numbers are properly mapped and available for use in activation?

- A. Ingest the Contact object and map the Work Phone, Mobile Phone, and Home Phone to theContact Point Phone data map object from the Contact data stream.
- B. Ingest the Contact object and create formula fields in the Contact data stream on the phonenumbers, and then map to the Contact Point Phone data map object.
- C. Ingest the Contact object and then create a calculated insight to normalize the phone numbers,and then map to the Contact Point Phone data map object.
- D. Ingest the Contact object and use streaming transforms to normalize the phone numbers fromthe Contact data stream into a separate Phone data lake object (DLO) that contains three rows,and then map this new DLO to the Contact Point Phone data map object.

Answer: D

Explanation:

The most efficient approach that a consultant should take when ingesting this data to ensure all the different phone numbers are properly mapped and available for use in activation is B. Ingest the Contact object and use streaming transforms to normalize the phone numbers from the Contact data stream into a separate Phone data lake object (DLO) that contains three rows, and then map this new DLO to the Contact Point Phone data map object. This approach allows the consultant to use the streaming transforms feature of Data Cloud, which enables data manipulation and transformation at the time of ingestion, without requiring any additional processing or storage. Streaming transforms can be used to normalize the phone numbers from the Contact data stream, such as removing spaces, dashes, or parentheses, and adding country codes if needed. The normalized phone numbers can then be stored in a separate Phone DLO, which can have one row for each phone number type (work, home, mobile). The Phone DLO can then be mapped to the Contact Point Phone data map object, which is a standard object that represents a phone number associated with a contact point.

This way, the consultant can ensure that all the phone numbers are available for activation, such as sending SMS messages or making calls to the customers.

The other options are not as efficient as option B. Option A is incorrect because it does not normalize the phone numbers, which may cause issues with activation or identity resolution. Option C is incorrect because it requires creating a calculated insight, which is an additional step that consumes more resources and time than streaming transforms. Option D is incorrect because it requires creating formula fields in the Contact data stream, which may not be supported by the CRM Connector or may cause conflicts with the existing fields in the Contact object. NEW QUESTION # 150
Which of the following cannot be used in Segmentation? (Choose 2)

- A. Date Time Measures
- B. Aggregate Functions
- C. Numeric Measures
- D. Text Measures

Answer: A,D

Explanation:
Explanation
Text Measures and Date Time Measures cannot be used in Segmentation. Segmentation is the process of creating filtered audience segments based on calculated insights. Calculated insights are metrics that define and calculate multidimensional measures on your data. Only Numeric Measures can be used as calculated insights, because they can be aggregated using functions such as SUM, AVG, MIN, MAX, or COUNT. Text Measures and Date Time Measures are not types of measures, but types of dimensions. Dimensions are fields that can be used to group or filter data, but not to perform calculations.
