

# JN0-105 Valid Dumps Book - Valid Dumps JN0-105 Book

P.S. Free & New JN0-105 dumps are available on Google Drive shared by Pass4suresVCE: <https://drive.google.com/open?id=1VXaNMQsiAHWTPshGHVEY2GQxydPNNX>

Our JN0-105 study quiz is made from various experts for examination situation in recent years in the field of systematic analysis of finishing. meet the demand of the students as much as possible, at the same time have a professional staff to check and review JN0-105 practice materials, made the learning of the students enjoy the information of high quality. Due to the variety of examinations, the JN0-105 Study Materials are also summarized for different kinds of learning materials, so that students can find the information on JN0-105 guide torrent they need quickly.

## Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.</li></ul>

Topic 3

- Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.

## Latest Juniper JN0-105: Junos, Associate (JNCIA-Junos) Valid Dumps Book - Authoritative Pass4suresVCE Valid Dumps JN0-105 Book

Compared with companies that offer a poor level of customer service, our JN0-105 exam questions have over 98 percent of chance to help you achieve success. Up to now, we have had thousands of letters and various feedbacks from satisfied customers who are all faithful fans of our JN0-105 Study Guide, and the number of them is keeping growing. So our JN0-105 practice materials are the clear performance and manifestation of our sincerity. You really should have a try on our JN0-105 exam dumps!

### Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q99-Q104):

#### NEW QUESTION # 99

Click the Exhibit button.

```
[edit protocols ospf]
user@router# show
area 0.0.0.0 {
    interface all;
}
export [ policy1 policy2 policy3 ];
[edit routing-options]
user@router# show
static {
    route 10.10.10.0/24 next-hop 192.168.1.254;
}
```

Referring to the exhibit, OSPF has three export policies that match different static route prefixes. The 10.10.10.0/24 static route does not match any terms in the policy1 routing policy.

What happens next in this scenario?

- A. The static route is evaluated by the policy2 routing policy.
- B. The static route is rejected by the policy1 routing policy.
- C. The static route is rejected by the default routing policy.
- D. The static route is evaluated by the policy3 routing policy.

**Answer: A**

Explanation:

In Junos, when multiple policies are applied to a routing protocol for route export, the routes are evaluated in the order in which the policies are listed. In the exhibit, the OSPF configuration has three export policies listed: policy1, policy2, and policy3. The static route 10.10.10.0/24 does not match any terms in policy1; therefore, it is not rejected by policy1 but is instead passed on to the next policy in the sequence, which is policy2.

If the static route matches a term in policy2 that permits the route, it will be exported into OSPF. If it does not match in policy2, it will then be evaluated by policy3. If there is no match in policy3 as well, and assuming there are no more policies listed, the route would then be subject to the default routing policy behavior, which typically rejects the route unless an explicit accept statement is present in the policies.

#### NEW QUESTION # 100

Which two statements are correct about MAC addresses? (Choose two.)

- A. The MAC address identifies the physical hardware.
- B. Switches use the Address Resolution Protocol table to assign MAC addresses to network interface cards in the

forwarding frame.

- C. Switches use the destination MAC address to identify the next-hop destination and to change the destination MAC address in the frame.
- D. The source and destination MAC addresses always remains static to the final destination.

**Answer: A,C**

Explanation:

MAC (Media Access Control) addresses are unique identifiers assigned to network interfaces for communications at the data link layer of a network segment. MAC addresses are used to identify the physical hardware on a network. In the context of Ethernet switches, the destination MAC address in incoming frames is used to determine the appropriate output port for forwarding the frame towards its final destination. The switch does not change the destination MAC address; it uses the MAC address to make forwarding decisions within the local network segment.

### NEW QUESTION # 101

A network administrator is attempting to route traffic on a Juniper switch to one of three different VLANs: Prod, Test, and Dev. Each VLAN has been assigned a numerical value. In this scenario, what are these numerical values called?

- A. tags
- B. interfaces
- C. names
- D. defaults

**Answer: A**

Explanation:

In the context of VLANs (Virtual Local Area Networks) on a Juniper switch, the numerical values assigned to each VLAN, such as those for Prod, Test, and Dev, are known as VLAN tags. These tags are part of the 802.1Q VLAN standard, which allows multiple VLANs to coexist on a single physical network. Each tag uniquely identifies the VLAN to which a frame belongs, enabling the switch to segregate and manage traffic based on VLAN membership. This tagging mechanism allows for efficient traffic separation and management, ensuring that devices within one VLAN do not receive traffic intended for another, thus maintaining network security and efficiency.

### NEW QUESTION # 102

An administrator configures a router's interface with an IPv4 address and subnet mask. The administrator also confirms that this interface is in an up state. In this scenario, which two route types are created on the local router? (Choose two.)

- A. a local route
- B. a direct route
- C. a static route
- D. a dynamic route

**Answer: A,B**

Explanation:

When an interface on a router is configured with an IPv4 address and is in an up state, two types of routes are automatically created in the routing table: a local route and a direct route, making B and D the correct answers. The local route represents the interface's IP address itself, indicating that the router can directly receive packets addressed to this IP. The direct route represents the subnet or network segment to which the interface is connected, indicating that the router can directly forward packets to destinations within this subnet.

### NEW QUESTION # 103

Which statement is correct when multiple users are configuring a Junos device using the configure private command?

- A. A commit will not succeed until there is only a single user in configuration mode.
- B. Each user gets their own candidate configuration.

- C. A commit by any user will commit changes made by all active users.
- D. Each user shares the same candidate configuration.

**Answer: B**

Explanation:

When multiple users are configuring a Junos device using the "configure private" command, each user gets their own candidate configuration (C). This allows for isolated configuration sessions, where changes made by one user do not impact or interfere with the changes made by another user in their private session.

## NEW QUESTION # 104

.....

So rest assured that with the Pass4suresVCE JN0-105 exam questions you will get everything that is necessary for JN0-105 exam preparation and success. Take a decision right now and just get registered in the Juniper JN0-105 certification exam and start preparation with Pass4suresVCE JN0-105 Exam Questions. You do not need to get worried about it choose the right Pass4suresVCE Junos, Associate (JNCIA-Junos) exam questions formats and start this journey without wasting further time.
