SAP C_THR81_2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Employee Central Core: This section of the exam measures the skills of HRIS Analysts and covers the essential components of the SAP SuccessFactors Employee Central Core module. It assesses the ability to configure foundational system features, including data models, business rules, event reasons, and workflows. Emphasis is placed on navigating the core employee data lifecycle, managing personal and employment information, and maintaining organizational structure within Employee Central.
Topic 2	<ul style="list-style-type: none">Scenario 1: HR Transaction Rules: This section of the exam tests the proficiency of HRIS Analysts in applying HR transaction rules within the system. It focuses on the creation and use of business rules for automating actions, enforcing data accuracy, and streamlining HR processes. Candidates demonstrate the ability to define rule contexts and apply logic relevant to specific HR transactions.
Topic 3	<ul style="list-style-type: none">Scenario 2: Approvals for Self-Service: This section of the exam assesses the competency of SAP Consultants in configuring self-service approval workflows. It covers the setup of dynamic approval chains and ensures policy compliance for employee-initiated actions. The focus is on enabling seamless and scalable workflow automation tailored to organizational structures and user roles.
Topic 4	<ul style="list-style-type: none">Position Management: This section of the exam evaluates the knowledge of SAP Consultants in configuring and managing Position Management functionality. It focuses on understanding position hierarchy, relationship assignments, and synchronization with job information. Candidates are assessed on how effectively they support organizational planning through accurate position data setup and integration with other SAP modules.

Many well-known companies require the C_THR81_2505 certification at the time of recruitment. Whether you're a student or a white-collar worker, you're probably trying to get the certification in order to get more job opportunities or wages. If you are one of them, our C_THR81_2505 Exam Guide will effectively give you a leg up.

SAP Certified Associate - SAP SuccessFactors Employee Central Core Sample Questions (Q54-Q59):

NEW QUESTION # 54

How should you build the IF condition to identify the user when the employee is updating their own Personal Information?

- A. Option A
- B. Option D
- C. Option C
- D. Option B

Answer: C

Explanation:

To identify the user when the employee is updating their own personal information, the IF condition in Option C is correct. This configuration:

Checks if the Context.Current User is equal to the Login User.

Ensures that the rule applies only when the employee is making changes to their own personal data.

This approach is aligned with SAP SuccessFactors logic for self-service scenarios, enabling accurate identification of the user in such workflows.

Scenario 2: Approvals for Self-Service

NEW QUESTION # 55

You need to create a one-to-many association from Location to Legal Entity. You also need to configure filtering of the Location field based on the Company field in the Job Information block.

What do you need to add to the data models? Note: There are 2 correct answers to this question.

- A. <field-criteria> as part of <hris-field="location">
- B. <association> as part of <hris-element id="jobInfo">
- C. <field-criteria> as part of <hris-field="company">
- D. <association> as part of <hris-element id="location">

Answer: A,D

Explanation:

To establish a one-to-many association from Location to Legal Entity and enable filtering of the Location field based on the Company field in the Job Information block, the following configurations are necessary:

* Define the Association in the Location Object:

* In the location object definition, add an <association> element to link it to the legalEntity object.

This association should be defined within the <hris-element id="location"> section.

* Configure Field Criteria for the Location Field:

* Within the Job Information (jobInfo) element, add a <field-criteria> element as part of the <hris-field id="location">. This configuration ensures that the Location field is filtered based on the selected Company (Legal Entity) in the Job Information block. Therefore, the correct answers are:

- * B: <field-criteria> as part of <hris-field id="location">
- * D: <association> as part of <hris-element id="location">

These configurations align with the standard practices for setting up associations and field criteria in SAP SuccessFactors Employee Central.

NEW QUESTION # 56

A business rule triggers a transfer event reason when an employee's location is changed. Which base object would you use for this business rule?

- A. Job Information
- B. Job Information Model
- C. Employee Information Model
- D. Employee Information

Answer: B

Explanation:

When creating a business rule to trigger a transfer event reason upon a location change, the Job Information Model is the correct base object. This is because location is a field within the Job Information entity, and changes to fields within this entity are best handled using the Job Information Model base object for related rules.

Correct answer:

C: Job Information Model

NEW QUESTION # 57

An HR admin/Global Mobility person must create a transfer for an employee. The employee will be moving from Position A in Team A to Position B in Team B. Both managers will have to approve the transfer.

How do you configure a two-step workflow so that the approval goes first to the current manager and second to the future manager?

- A. By selecting in Step 1: Role - Self-Source
 - * By selecting in Step 2. Role- Manager - Target
- B. By selecting in Step 1. Role-Manager - Source
 - * By selecting in Step 2: Role - Manager - Target
- C. By selecting in Step 1. Position Relationship - Parent Parent Position - Source
 - * By selecting in Step 2: Position Relationship - Parent Position - Target
- D. By selecting in Step 1: Role - Manager - Source
 - * By selecting in Slep 2. Role-Manager Manager - Target

Answer: B

Explanation:

Scenario 2: Approvals for Self-Service

To configure a two-step workflow where the approval first goes to the current manager and then to the future manager, you must set the following in the workflow:

Step 1: Role - Manager - Source (current manager of the employee).

Step 2: Role - Manager - Target (future manager of the employee).

This setup ensures that the workflow sequentially routes approval to both the current and future managers.

NEW QUESTION # 58

Due to confidentiality reasons, when the HR Business Partner (maintained in Job Relationship) is creating a change in salary for an employee, this action will need to be approved by the manager of the HR Business Partner creating the request.

How do you define this in the workflow when filling in the Approver Type, Approver Role, Context, and Relationship to Approver? Refer to the screenshot to answer the question

- A. By selecting in Step 1: Role - Employee HR-Source- Initiator
- B. **By selecting in Step 1: Role - Manager - Source - Initiator**
- C. By selecting in Step 1: Role - Self-Source - Initiator
- D. By selecting in Step 1: Role - Employee HR - Source - Employee

Answer: B

Explanation:

To ensure that the salary change initiated by the HR Business Partner is approved by their manager, you need to configure the workflow with the following details:

Approver Type: Manager

Approver Role: Manager

Context: Initiator (this ensures the approval request is routed to the manager of the person initiating the workflow).

Relationship to Approver: From the initiator's position, the system derives the relationship to their manager.

Selecting Role: Manager - Source: Initiator in Step 1 aligns with these requirements.

Scenario 2: Approvals for Self-Service
