Free SAP C-CPI-2506 Vce Dumps & C-CPI-2506 Real Exam Answers

For candidates who are going to buy C-CPI-2506 training materials online, they may care more about the privacy protection. If you chose us, your personal information, such as your email address and your name will be protected well. Once the order finishes, your personal identification information will be concealed. In addition, C-CPI-2506 Exam Materials are high-quality, and we have received lots of good feedbacks from our customers. Free demo for C-CPI-2506 exam dumps are available, we recommend you to have a try before buying, so that you can have a deeper understanding of what you are going to buy.

SAP C-CPI-2506 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems. |
| Topic 2 | <ul style="list-style-type: none">• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs. |
| Topic 3 | <ul style="list-style-type: none">• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios. |
| Topic 4 | <ul style="list-style-type: none">• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment. |

SAP Certified Associate - Integration Developer Sample Questions (Q21-Q26):

NEW QUESTION # 21

You are creating an API proxy. Which of the following is a valid path prefix?

- A. /sap/opu/odata
- B. /soap/opu/odata
- C. /sap/odu/odata
- D. /sap/opo/odata

Answer: A

Explanation:

In SAP systems (e.g., S/4HANA, SAP Gateway), OData services follow a standard URL path:

/sap/opu/odata # The valid and official prefix for OData services.

Example: /sap/opu/odata/sap/API_BUSINESS_PARTNER

Other options:

/sap/opo/odata and /sap/odu/odata # Typographical variations, not valid.

/soap/opu/odata # Incorrect, since OData is not SOAP-based.

Thus, the valid prefix is /sap/opu/odata.

NEW QUESTION # 22

Which expression language can you use to access the content of a message in an integration flow?

- A. JavaScript expression language
- B. Spring expression language
- C. XML expression language
- D. Simple expression language

Answer: D

Explanation:

In SAP Cloud Integration, the runtime message content, headers, and properties can be accessed using the Camel Simple

Expression Language.

Examples:

`${body}` # Accesses the message payload.

`${header.<headerName>}` # Accesses message headers.

`${property.<propertyName>}` # Accesses integration properties.

Other options:

XML expression language # Not supported directly.

Spring expression language # Used in Spring apps, not in SAP CPI.

JavaScript expression language # Not used; JavaScript/Groovy scripts exist, but not for message expressions.

Thus, the correct language is Simple expression language.

NEW QUESTION # 23

What are some advantages of the cloud integration capability within SAP Integration Suite? Note: There are 2 correct answers to this question.

- A. A local installation is not required.
- B. Customer-to-Customer(C2C) integrations can be developed
- C. Predefined scenarios can be used out-of-the-box.
- D. Integration processes can be developed offline.

Answer: A,C

Explanation:

Some advantages of the cloud integration capability within SAP Integration Suite are:

A local installation is not required. The cloud integration capability is a cloud-based service that runs on SAP Business Technology Platform (BTP). It does not require any installation or maintenance on your local system. You can access it from any web browser and start developing and deploying integration flows using a graphical user interface or an Eclipse-based tooling.

Predefined scenarios can be used out-of-the-box. The cloud integration capability provides a rich set of predefined integration scenarios that cover various use cases and domains, such as SAP-to-SAP integration, SAP-to-non-SAP integration, hybrid integration, process orchestration, and so on. You can browse and discover these scenarios from the Discover page of the cloud integration web UI or from the SAP API Business Hub. You can use these scenarios as they are or customize them according to your needs. Reference: Cloud Integration Capability Overview | SAP Help Portal, Discover Integration Content | SAP Help Portal

NEW QUESTION # 24

Which Integration Flow element is best suited for executing custom Logic on the received cloud event data?

- A. Run a Groovy script
- B. Employ a Mule Expression component
- C. Use a Java connector
- D. Use an external REST API

Answer: A

Explanation:

For executing custom logic inside an integration flow:

Groovy script (via Script step) is the supported mechanism in SAP Cloud Integration.

External REST APIs can enrich data but are not for embedded custom logic execution.

Mule components are not part of SAP CPI.

Java connectors are not directly supported in SAP CPI runtime.

Thus, the best suited for executing custom logic is Groovy script.

NEW QUESTION # 25

Which of the following can you use for an XSLT mapping in an integration flow?

- A. JSON
- B. HTML
- C. XML

- D. PHP

Answer: C

Explanation:

XSLT (Extensible Stylesheet Language Transformations) is a language designed to transform XML documents into other XML or text formats.

In SAP Cloud Integration, XSLT mapping can only be applied when the payload is in XML format.

For JSON payloads, you would first convert JSON # XML, then apply XSLT mapping.

Other options:

HTML # Not used for XSLT mapping.

JSON # Requires conversion first, cannot be directly used.

PHP # A programming language, unrelated to mappings.

NEW QUESTION # 26

.....

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our C-CPI-2506 real study dumps have the distinct advantage of fast delivery. On one hand, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful C-CPI-2506 real study dumps. On the other hand, we provide you the responsible 24/7 service. Our candidates might meet so problems during purchasing and using our C-CPI-2506 Prep Guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to pass C-CPI-2506 exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.
