

HPE7-A03 Exam Braindumps - HPE7-A03 Pass Guaranteed

BONUS!!! Download part of PrepAwayPDF HPE7-A03 dumps for free: <https://drive.google.com/open?id=1fF4QdAFgxAMili-PkvTE0-JkvU5qcZIK>

The best way of passing HP actual test is choosing accurate exam braindumps. PrepAwayPDF has latest test questions and accurate exam answers to ensure you clear HPE7-A03 Real Exam. You just need spend your spare time to practice HP top questions and review the key points of study guide, it will be easy to clear exam.

HP HPE7-A03 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Prepare and Present the Solution	21%	- Documentation and validation 1. Stakeholder presentation and refinement 2. Design documentation creation
Topic 2: Discover Requirements	21%	- Define goals and business requirements 1. Collect current network environment information 2. Identify stakeholders and objectives
Topic 3: Analyze Requirements	26%	- Evaluate and map requirements 1. Document assumptions 2. Assess constraints and dependencies 3. Translate business needs into technical solutions
Topic 4: Architect the Solution	32%	- High-level architecture design 1. Aruba product selection and integration 2. Solution option selection 3. Campus network topology design

HPE7-A03 bootcamp pdf, HP HPE7-A03 dumps pdf

PrepAwayPDF guarantees that if you use the product, you will pass the exam on your first try. Its primary goal is to save students time and money, not just conduct a business transaction. Candidates can take advantage of the free trials to evaluate the quality and standard of the HPE7-A03 Dumps before making a purchase. With the right Aruba Certified Campus Access Architect Exam (HPE7-A03) study material and support team passing the examination at first attempt is an achievable goal.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q86-Q91):

NEW QUESTION # 86

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems. Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless I ANs. and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time Insight, troubleshooting tools, and Service Level performance reporting.
- Seamless integration across wired, wireless. WAN. SD-Branch. IoT
- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11ax (Wi-Fi 6E Certified)
- Security options including WPA2/WPA3. 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical teams, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital The customer states that the hospital has approximately 35,000 devices connected to its network.

Unfortunately, they do not have a tool to accurately determine the device count.

Select the best option to obtain an accurate device count

- A. HPE Aruba Networking Central
- B. NetEdit
- C. Airwave
- D. HPE Aruba Networking ClearPass Profiler

Answer: D

NEW QUESTION # 87

What documents should be included in the solution proposal? (Place the correct items into the list at the right. Order is not important. Not all options will be used)

POSSIBLE OPTIONS	CORRECT OPTIONS
architect's notes from meetings	
as-built rack drawings	
assumptions documented in design	
bill of materials	
data sheets of equipment proposed	
proposed topology diagram	
quote	

Answer:

Explanation:

POSSIBLE OPTIONS	CORRECT OPTIONS
architect's notes from meetings	
as-built rack drawings	
assumptions documented in design	
bill of materials	
data sheets of equipment proposed	
proposed topology diagram	
quote	

Explanation:

bill of materials
proposed topology diagram
quote

NEW QUESTION # 88

Which member types require a reboot when doing an In-Service-Software-Upgrade within a VSF stack?

- A. Conductor
- B. Member
- C. all member types
- D. Standby

Answer: C

Explanation:

During an In-Service-Software-Upgrade (ISSU) on a VSF stack, all stack members must reboot to load the new firmware version. VSF handles the upgrade in a rolling manner to maintain service, but each member type - conductor, standby, and members - ultimately requires a reboot.

NEW QUESTION # 89

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States
- Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and Service Level performance reporting.
- Seamless integration across wired, wireless, WAN, SD-Branch, IoT
- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11.ax (Wi-Fi 6E Certified)
- Security options including WPA2/WPA3, 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device

- End-to-end role-based security
 - Seamless mobility across the hospital for medical teams, patients, and visitors
 - Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
 - Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
 - Fully redundant branch solution with dynamic path selection to the hospital XYZ Regional Hospital is concerned about the performance of new latency sensitive applications that will be introduced when connected via wireless.
- Which solution can address this concern?

- A. IDS/IPS
- **B. AirSlice**
- C. Client Insight
- D. AirMatch

Answer: B

Explanation:

AirSlice provides application-aware airtime scheduling, giving latency-sensitive applications dedicated, predictable airtime. This ensures consistent performance for medical apps requiring low latency when operating over the wireless network.

NEW QUESTION # 90

which documentation resources can be used for finding validated information on Aruba products that assist the architect in building the solution design? (Select three.)

- A. product reviews (CNET, Network World)
- B. competitive documentation
- **C. validated Solution Guide**
- **D. datasheets**
- E. Gartner annual reports
- **F. configuration guides**

Answer: C,D,F

Explanation:

When seeking validated information on Aruba products to assist in building a solution design, the most reliable resources include configuration guides (Option B), datasheets (Option C), and validated Solution Guides (Option F). Configuration guides provide detailed instructions and best practices for setting up and optimizing Aruba products, ensuring their proper integration into the network infrastructure. Datasheets offer concise overviews of product specifications, features, and capabilities, allowing architects to assess product suitability for specific requirements. Validated Solution Guides compile comprehensive information on deploying Aruba solutions in various scenarios, ensuring that the solution design is based on proven methodologies and recommended practices, thereby enhancing the reliability and performance of the network solution.

NEW QUESTION # 91

.....

Our services before, during and after the clients use our HPE7-A03 certification material are considerate. Before the purchase, the clients can download and try out our HPE7-A03 learning file freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. Our company gives priority to the satisfaction degree of the clients on our HPE7-A03 Exam Questions and puts the quality of the service in the first place. We also have free demo of our HPE7-A03 learning guide for you to check the quality before your payment.
