Both planners need to use five tables in their plan analyses on a regular basis. At the moment, all five tables are displayed in kilograms.

Which two options would most efficiently address this requirement?

- **A. Create duplicates of the three measures in Manage Planning Measures and change each new measure's UOM from kilograms to pounds, then duplicate the five tables but use the new measures.**
- B. Duplicate all five tables, then format the three measures in the copied tables to be displayed in pounds.
- C. Planner 2 opens a table, formats each measure to be displayed in pounds. When Planner 1 opens the same table, they reformat back to be displayed in kilograms.
- D. There is no efficient solution to this requirement.
- **E. Open each table and format measures to duplicate the three measures and then format the duplicated measures to be displayed in pounds.**
