With the development of the times, the pace of the society is getting faster and faster. If we don't try to improve our value, we're likely to be eliminated by society. Under the circumstances, we must find ways to prove our abilities. For example, getting the Nonprofit-Cloud-Consultant Certification is a good way. If we had it, the chances of getting a good job would be greatly improved. And our Nonprofit-Cloud-Consultant exam braindumps are the tool to help you get the Nonprofit-Cloud-Consultant certification.

Salesforce Nonprofit-Cloud-Consultant Certification Exam is designed to test your knowledge of Salesforce Nonprofit Cloud and your ability to implement and manage its features. Nonprofit-Cloud-Consultant exam covers topics such as managing donors and donations, creating fundraising campaigns, managing volunteers, and tracking program outcomes. Candidates are also tested on their understanding of the nonprofit sector and their ability to apply Salesforce solutions to meet the unique needs of nonprofit organizations.

## Free PDF Nonprofit-Cloud-Consultant - Salesforce Certified Nonprofit Cloud Consultant Exam Updated Study Plan

If you choose to use the software version of Salesforce Nonprofit-Cloud-Consultant study guide, you will find that you can download our Salesforce Certified Nonprofit Cloud Consultant Exam Nonprofit-Cloud-Consultant exam prep on more than one computer and you can practice our Nonprofit-Cloud-Consultant exam questions offline as well. We strongly believe that the software version of our Nonprofit-Cloud-Consultant Study Materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success!

Salesforce Nonprofit-Cloud-Consultant exam consists of 60 multiple-choice questions, and candidates have 105 minutes to complete the exam. Nonprofit-Cloud-Consultant exam covers topics such as nonprofit industry knowledge, Salesforce Nonprofit Cloud solution design, data management, and reporting. Nonprofit-Cloud-Consultant Exam also tests the candidate's knowledge of the Salesforce platform and its features.

## Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q164-Q169):

### NEW QUESTION # 164

A nonprofit organization wants to automate some of its routine activities.  
Which declarative Salesforce solution is designed for process automation?

- A. Pardot
- B. NPSP TDTM
- C. Einstein
- **D. Lightning Flow**

**Answer: D**

Explanation:

Lightning Flow in Salesforce is a powerful declarative tool that allows users to automate business processes and create guided visual experiences. This tool is specifically designed for process automation and can help nonprofits streamline routine activities without requiring any coding knowledge. Here are the steps to use Lightning Flow for automating processes:

Access Lightning Flow Builder:

Navigate to Setup.

In the Quick Find box, type "Flows" and select "Flows" under Process Automation.

Create a New Flow:

Click "New Flow".

Choose the type of flow you want to create. For automating routine activities, "Screen Flow" or "Scheduled-Triggered Flow" might be appropriate.

Design the Flow:

Use the drag-and-drop interface to add elements like screens, decisions, assignments, and loops.

Configure each element to define the process logic.

Set Entry Conditions and Actions:

Define the trigger for the flow (e.g., record creation, updates, scheduled times).

Specify the actions to be taken (e.g., create/update records, send emails, call Apex classes).

Test the Flow:

Before activating the flow, use the Debug mode to test and ensure it works as expected.

Activate the Flow:

Once tested, activate the flow so it starts running based on the defined conditions.

### NEW QUESTION # 165

A nonprofit organization is using Care Plans in Nonprofit Cloud to manage interactions with clients. The organization has standard Care Plan Templates set up but must often add additional elements to a Care Plan based on a client's specific needs. What can be manually added directly to a Care Plan?

- A. Programs and Program Enrollments
- **B. Goal Assignments and Benefit Assignments**
- C. Document Checklists and Document Templates

**Answer: B**

Explanation:

In Nonprofit Cloud Case Management, a Care Plan is the central roadmap for a client's journey toward a specific outcome. While Care Plan Templates provide a standardized starting point, the philosophy of person-centered care requires that these plans be customizable to the unique circumstances of each participant.

A Care Plan is structurally composed of two primary "actionable" building blocks:

\* **Goal Assignments:** These represent the milestones the client is working toward (e.g., "Secure Stable Housing" or "Complete GED"). While a template might include five standard goals, a caseworker can manually add a sixth Goal Assignment that is unique to that client's specific barriers.

\* **Benefit Assignments:** These are the services or resources provided to help the client achieve their goals (e.g., "Rental Assistance" or "Weekly Tutoring"). A caseworker can manually link additional Benefits to a Care Plan to ensure the participant has the specific support they need.

Step-by-Step Customization Workflow:

\* **Template Application:** The caseworker begins by applying a standard template, which populates the Care Plan with a set of pre-defined goal and benefit assignments.

\* **Assessment Review:** After a Dynamic Assessment, the caseworker identifies an unmet need.

\* **Manual Entry:** Within the Care Plan interface, the caseworker clicks "New" on the Goal Assignment related list to create a custom goal. They then do the same for Benefit Assignments to link the client to a specific service.

\* Linking: The caseworker can then link the manual Benefit Assignment to the manual Goal Assignment to show exactly how that service contributes to the client's progress.

Option B is incorrect because Programs and Program Enrollments are the broader containers that a client is part of. While a Care Plan exists within the context of an enrollment, you don't "add an enrollment" to a plan; rather, the plan is a subset of the enrollment. Option A refers to compliance and document tracking, which are managed via Action Plans, not the core clinical/social service logic of the Care Plan itself.

#### NEW QUESTION # 166

A nonprofit has implemented Program Management Module to satisfy the reporting requirements of a new grant. The funder expects to see a report that segments services according to location.

Which object will allow the nonprofit to satisfy the reporting requirements?

- A. Program
- **B. Program Cohort**
- C. Service
- D. Program Engagement

**Answer: B**

Explanation:

<https://powerofus.force.com/s/article/PMM-Overview>

[https://trailhead.salesforce.com/en/content/learn/modules/program-management-with-nonprofit-cloud/manage-nonprofit-programs-with-salesforce?trail\\_id=manage-programs-with-nonprofit-cloud](https://trailhead.salesforce.com/en/content/learn/modules/program-management-with-nonprofit-cloud/manage-nonprofit-programs-with-salesforce?trail_id=manage-programs-with-nonprofit-cloud)

#### NEW QUESTION # 167

An annual fund coordinator wants to create a report that identifies which individual donors have yet to make a gift toward the Annual Fund Campaign this year. It is important that the annual giving coordinator avoids soliciting any individuals who are attending an upcoming gala. The nonprofit uses Campaigns to track event attendance. What should a consultant add to the report to exclude gala attendees?

- A. Filter logic
- B. Bucket field
- **C. Cross filter**
- D. Summary formula

**Answer: C**

Explanation:

This is a "Who Has NOT" reporting requirement, which is the primary use case for Cross Filters in Salesforce.

How to build this report:

\* Base Report: Create a report of Contacts (or "Contacts with Opportunities").

\* Annual Fund Filter: Set the standard report filters to show only those who have \$0 in giving for the current year.

\* The Exclusion (Cross Filter): Click the "Filters" dropdown and select Add Cross Filter.

\* Configuration: \* Set the filter to: Contacts WITHOUT Campaign Members.

\* Add a sub-filter to the cross filter: Campaign Name EQUALS [Upcoming Gala Name].

\* Result: The report will now list only people who are donors but are not currently registered for the Gala.

Why other options are incorrect:

\* Filter Logic (Option A): This is used for "AND/OR" statements between existing fields (e.g., 1 AND (2 OR 3)). It cannot easily look "across" to the Campaign Member object to check for the absence of a record.

\* Summary Formula (Option C) and Bucket Field (Option D): These are used for calculating or grouping data that is present in the report; they cannot be used to exclude records based on their relationship to other objects.

#### NEW QUESTION # 168

What is an element of a logic model or theory of change?

- A. Progress
- **B. Outputs**

- C. Budget

**Answer: B**

**Explanation:**

In the Salesforce Nonprofit Cloud (NPC) environment, particularly when configuring Outcome Management, understanding the components of a Logic Model or Theory of Change is fundamental. These frameworks help a nonprofit map out how their internal activities lead to the social impact they desire to achieve.

A standard Logic Model consists of five core elements:

- \* **Inputs:** The resources invested, such as staff time, funding, or equipment.
- \* **Activities:** The actual programs or services provided (e.g., "Hosting a job training workshop").
- \* **Outputs:** These are the direct, measurable products of the activities. For example, if the activity is a workshop, the output might be "20 participants attended" or "100 hours of training delivered."
- \* **Outcomes:** These are the specific changes in behavior, knowledge, or status (e.g., "15 participants gained new technical skills").
- \* **Impact:** The long-term, systemic change (e.g., "Reduced unemployment in the local community").

When a consultant sets up Outcome Management, they translate these conceptual elements into Salesforce records. Outputs are often tracked as Indicator Results derived from Benefit Disbursements. While a "Budget" (Option B) is a necessary operational resource (Input), it is not considered a structural element of the "logic" chain itself in the same way an Output is. "Progress" (Option C) is a state of being or a reportable metric, but it is not a defined structural component of the Theory of Change methodology. By focusing on Outputs, consultants can help organizations verify that their activities are happening as planned, providing the necessary data foundation to eventually measure higher-level Outcomes and Impact.
