

High Pass-Rate Alcatel-Lucent Braindump 4A0-100 Free offer you accurate Reliable Test Simulator | Nokia IP Networksand Services Fundamentals

P.S. Free & New 4A0-100 dumps are available on Google Drive shared by PassCollection: https://drive.google.com/open?id=1gM2crGYpjMOeVDS6Idi6hoT_439kfl7n

The PassCollection guarantees their customers that if they have prepared with Nokia IP Networksand Services Fundamentals (4A0-100) practice test, they can pass the Nokia IP Networksand Services Fundamentals (4A0-100) certification easily. If the applicants fail to do it, they can claim their payment back according to the terms and conditions. Many candidates have prepared from the actual Alcatel-Lucent 4A0-100 Practice Questions and rated them as the best to study for the examination and pass it in a single try with the best score. The Alcatel-Lucent 4A0-100 practice material of PassCollection came into existence after consultation with many professionals and getting their positive reviews.

Alcatel-Lucent 4A0-100 certification exam is a vendor-specific certification that validates the expertise of professionals in Alcatel-Lucent IP networking technologies. Nokia IP Networksand Services Fundamentals certification demonstrates that a professional has the knowledge and skills to design, implement, and manage large-scale IP networks using Alcatel-Lucent products and solutions. Nokia IP Networksand Services Fundamentals certification is recognized globally and can help professionals advance their careers and increase their earning potential. To prepare for the certification exam, professionals can take advantage of Alcatel-Lucent training courses, study materials, and practice exams to ensure they have the knowledge and skills needed to pass the exam.

Alcatel-Lucent 4A0-100 Exam, also known as the Alcatel-Lucent Scalable IP Networks exam, is designed for professionals who want to demonstrate their knowledge and skills in designing and implementing scalable IP networks. 4A0-100 exam is based on the Alcatel-Lucent Service Routing Certification (SRC) program, which is a comprehensive certification program for IP networking professionals. The 4A0-100 exam is one of the core exams in the program and is essential for anyone who wants to advance their career in IP networking.

2026 Unparalleled Alcatel-Lucent 4A0-100: Braindump Nokia IP Networksand Services Fundamentals Free

We offer a money-back guarantee if you fail despite proper preparation and using our product (conditions are mentioned on our guarantee page). This feature gives you the peace of mind to confidently prepare for your Alcatel-Lucent 4A0-100 Certification Exam. Our Alcatel-Lucent 4A0-100 exam dumps are available for instant download right after purchase, allowing you to start your Alcatel-Lucent 4A0-100 preparation immediately.

The Alcatel-Lucent 4A0-100 Exam measures the candidate's knowledge and understanding of the Alcatel-Lucent Service Router Operating System (SROS), the Alcatel-Lucent 7750 Service Router (SR), and the Alcatel-Lucent 7450 Ethernet Service Switch (ESS). It covers a wide range of topics, including network architecture, IP routing protocols, MPLS, BGP, OSPF, multicast, and VPN technologies. It is a comprehensive exam that requires a deep understanding of network design and implementation.

Alcatel-Lucent Nokia IP Networksand Services Fundamentals Sample Questions (Q312-Q317):

NEW QUESTION # 312

Which of the following routing protocols cannot be used between routers R2 and R4?

- **A. eBGP**
- B. iBGP
- C. Static Routing
- D. IS-IS
- E. OSPF

Answer: A

NEW QUESTION # 313

A CE device has a physical connection to which device in the service providers MPLS network?

- **A. CE always connects to a PE router.**
- B. The CE does not connect to the service provider network.
- C. CE always connects to another CE device.
- D. CE always connects to a P router.

Answer: A

NEW QUESTION # 314

In MAC address 00-20-60-CE-2B-28, which part is the Organisationally Unique Identifier (OUI)?

- A. 2B-28
- B. CE-2B-28
- C. 00-20
- **D. 00-20-60**

Answer: D

Explanation:

MAC address(Media Access Control address) is a 48-bit identifier typically expressed in six groups of two hexadecimal digits (e.g., 00-20-60-CE-2B-28). It consists of two key parts:

* OUI (Organizationally Unique Identifier)- The first 24 bits(or first 3 octets, e.g., 00-20-60) are assigned by the IEEE to hardware manufacturers. This identifies the vendor or manufacturer.

* Device Identifier (NIC Specific)- The remaining 24 bits(e.g., CE-2B-28) are assigned uniquely by the vendor to each device/interface.

So in the address 00-20-60-CE-2B-28:

* 00-20-60 is the OUI

* CE-2B-28 is the device-specific portion

Thus, the correct answer is D. 00-20-60.

NEW QUESTION # 315

Which of the MPLS routers is responsible for pushing new labels for LSP A and LSP B?

- A. Router R1 pushes labels for LSP A, while router R4 pushes labels for LSP B.
- B. Router R4 pushes labels for both LSP A and LSP B.
- C. Router R4 pushes labels for LSP A, while router R1 pushes labels for LSP B.
- **D. Router R1 pushes labels for both LSP A and LSP B.**

Answer: D

Explanation:

In MPLS architecture, the Ingress LER (Label Edge Router) is responsible for:

- * Pushing labels onto unlabeled packets and injecting them into the MPLS domain.
- * Acting as the starting point of the Label Switched Path (LSP).

From the diagram:

- * R1 is the starting point (Ingress LER) for both LSP A and LSP B.
 - * R4 is the Egress LER, which would pop the labels at the end of the LSP.
- So, R1 is responsible for label push (imposing) at the start of both LSPs.
- * Option A is correct - R1 pushes labels for both LSP A and LSP B.
 - * Option B is incorrect - R4 is an egress router, not ingress.
 - * Option C/D are incorrect - the LSPs both start at R1.

NEW QUESTION # 316

Which of the following ports can be used to access a Nokia 7750 SR that has not been configured?

- A. CPM management Ethernet port
- B. Port 1/1/1
- C. Any port on an installed MDA
- **D. CPM console serial port**

Answer: D

Explanation:

Section: Volume B
