2026 Latest DumpsTorrent CDCS PDF Dumps and CDCS Exam Engine Free Share: [https://drive.google.com/open?id=1Zhm0JcRJvJPJvsR8SUYWo\\_7A6lcZ1Rcx](https://drive.google.com/open?id=1Zhm0JcRJvJPJvsR8SUYWo_7A6lcZ1Rcx)

The EXIN CDCS exam practice questions are being offered in three different formats. These formats are EXIN CDCS web-based practice test software, desktop practice test software, and PDF dumps files. All these three EXIN CDCS exam questions format are important and play a crucial role in your EXIN EPI Certified Data Centre Specialist (CDCS) exam preparation. With the EXIN CDCS exam questions you will get updated and error-free EXIN EPI Certified Data Centre Specialist (CDCS) exam questions all the time. In this way, you cannot miss a single CDCS exam question without an answer.

The PDF version of our CDCS study tool is very practical, which is mainly reflected on the special function. As I mentioned above, our company are willing to provide all people with the demo for free. You must want to know how to get the trial demo of our CDCS question torrent; the answer is the PDF version. You can download the free demo form the PDF version of our CDCS Exam Torrent. If you download our study materials successfully, you can print our study materials on pages by the PDF version of

our CDCS exam torrent.

## **EXIN CDCS Practice Test - Pass Exam And Boost Your Career**

Learning with our CDCS learning guide is quiet a simple thing, but some problems might emerge during your process of CDCS exam materials or buying. Considering that our customers are from different countries, there is a time difference between us, but we still provide the most thoughtful online after-sale service twenty four hours a day, seven days a week, so just feel free to contact with us through email anywhere at any time. Our commitment of helping you to Pass CDCS Exam will never change. Considerate 24/7 service shows our attitudes, we always consider our candidates' benefits and we guarantee that our CDCS test questions are the most excellent path for you to pass the exam.

### **EXIN EPI Certified Data Centre Specialist Sample Questions (Q116-Q121):**

#### **NEW QUESTION # 116**

The computer room has high levels of H2S gas contamination. What is the best option to resolve this issue?

- A. Install air-scrubbers.
- B. Provide more air changes per hour by adding more fresh air to the computer room.
- C. Vacuum the whole room using a HEPA/S-Class-based filter.
- D. Clean the room and racks with a damp/wet cloth.

**Answer: A**

Explanation:

High levels of H2S (hydrogen sulfide) gas contamination in a computer room are best addressed by installing air-scrubbers. Air-scrubbers can effectively filter out contaminants, including corrosive gases like H2S, ensuring clean air circulation and protecting sensitive IT equipment from potential corrosion and damage.

Detailed Explanation:

Air-scrubbers are designed to remove various airborne contaminants and are particularly useful in environments where corrosive gases are present. These systems use filters or chemical reactions to neutralize harmful substances, making them ideal for data centers that need to maintain high air quality for equipment reliability.

EPI Data Center Specialist References:

EPI guidelines suggest air-scrubbing technologies to remove contaminants that pose risks to electronic equipment, maintaining air quality and reducing corrosion risk.

#### **NEW QUESTION # 117**

What is the sensible heat ratio (SHR)?

- A. Ratio of the sensible heat to the total of sensible plus latent heat to be removed from a conditioned space
- B. Ratio of cold-air supply to hot-air return temperature of a cooling system
- C. Ratio of the cold-aisle temperature to the hot-aisle temperature
- D. Ratio of the latent heat to the total of sensible plus latent heat to be removed from a conditioned space

**Answer: A**

Explanation:

SHR = Sensible Load / (Sensible + Latent Load); it describes the portion of the total cooling that is sensible (temperature change) versus latent (moisture removal).

References: ASHRAE Fundamentals Handbook (Psychrometrics/Load Calculations), ASHRAE TC 9.9.

#### **NEW QUESTION # 118**

You have three UPS systems connected in parallel. The UPS systems have an imbalance in the load sharing of approximately 20%. What should you recommend?

- A. Nothing, there is no reason for any concern

- B. Review the cable lengths of each UPS to the common busbar
- C. Review the harmonics levels within the computer room
- D. Review the common mode noise levels within the computer room

**Answer: B**

Explanation:

An imbalance in load sharing between UPS systems connected in parallel can often result from unequal cable lengths to the common busbar. If the cabling from each UPS to the busbar varies significantly in length, it can lead to differences in impedance, resulting in uneven load distribution. Ensuring that cable lengths are consistent helps to balance the load sharing across the UPS systems.

Detailed Explanation:

Parallel UPS systems rely on uniform impedance to share loads evenly. Differences in cable lengths cause variations in resistance, leading to one or more UPS units carrying a disproportionate share of the load.

Standardizing cable lengths ensures equal impedance, which promotes balanced load sharing and prevents one UPS from being overburdened, thus maintaining overall system reliability.

EPI Data Center Specialist References:

EPI guidelines recommend checking cable lengths when load imbalances occur in parallel UPS configurations. Ensuring equal lengths is a common method to resolve impedance issues that affect load distribution, which is critical for the stable operation of redundant power systems.

**NEW QUESTION # 119**

The logical overview of the data center looks as pictured. To what TIA-942 Rating is this design made based on electrical only?

- A. Rating - 2
- B. Rating - 1
- C. Rating - 4
- D. Rating - 3

**Answer: C**

Explanation:

The electrical design shown in the diagrams represents a TIA-942 Rating-4 configuration. This design includes full redundancy and fault tolerance, as demonstrated by the dual power distribution paths from the utility supply to the critical loads. Each power distribution path is equipped with its own UPS, ensuring that the ICT equipment and mechanical equipment have uninterrupted power in case of any single point of failure.

Detailed Explanation:

A Rating-4 data center requires two independent power paths that are fully redundant and capable of supporting the load independently. In the diagrams:

There are dual feeds from the utility supply, each going through separate transfer switches and power distribution paths.

Both paths have backup sources (+1) and serve critical components through separate UPS systems, providing a completely redundant setup.

The design also includes redundant paths to the mechanical equipment and ICT equipment, which further indicates the fault-tolerant characteristics of a Rating-4 infrastructure.

This setup allows for concurrent maintainability and ensures that no single failure in power distribution or UPS can impact the data center's operation, which is characteristic of the highest Tier/Rated-4 classification.

EPI Data Center Specialist References:

EPI guidelines confirm that TIA-942 Rating-4 requires full redundancy and fault tolerance for electrical infrastructure, ensuring continuous operation even during maintenance or failure events. This design meets all those requirements, thus aligning with Rating-4 standards.

**NEW QUESTION # 120**

Should aerosol cleaning solutions be used in the computer room?

- A. No, unless leak detection installed
- B. Yes, only if room smells bad
- C. No, it will contaminate the room
- D. Yes, if not connected to power

**Answer: C**

### Explanation:

Aerosol sprays release particulates and residues into the environment, which can contaminate sensitive ICT equipment. Such contamination accelerates corrosion, interferes with airflow, and increases particulate levels beyond ASHRAE recommended limits. Proper cleaning should use HEPA-filtered vacuum systems or dry wipes, not aerosols. Even odor control aerosols are disallowed in critical rooms.

Therefore, aerosol cleaning solutions must never be used.

References: ASHRAE TC 9.9 "Contamination Guidelines," NFPA 75 §8.4.

## NEW QUESTION # 121

• • • • •

In the past ten years, our company has never stopped improving the CDCS exam cram. For a long time, we have invested much money to perfect our products. At the same time, we have introduced the most advanced technology and researchers to perfect our CDCS exam questions. At present, the overall strength of our company is much stronger than before. We are the leader in the market and master the most advanced technology. In fact, our CDCS Test Guide has occupied large market shares because of our consistent renovating. We have built a powerful research center and owned a strong team. Up to now, we have got a lot of patents about the CDCS test guide. In the future, we will continuously invest more money on researching.
