Microsoft Power Platform Fundamentals Sample Questions (Q147-Q152):

NEW QUESTION # 147
You need to explain the major components of the Common Data Model (CDM) and their functions.
Match each term to its definition.

Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right.

Each term may be used once, more than once, or not at all. Each correct match is worth one point.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Microsoft Power Platform
Power Platform combines the robust power of PowerApps, PowerBI, and Microsoft Flow into one powerful business application platform - providing quick and easy app building and data insights. Each component of the Microsoft Power Platform is built on the Common Data Service for Apps. Each component is dynamic by itself, but brilliant and masterful when combined.
The Microsoft Power platform brings all your data together into a common data model.
Box 2: Entities
An entity is a set of records used to store data, similar to how a table stores data within a database.

NEW QUESTION # 148

A company uses a custom-built system to record financial data that runs on a manager's machine.

The system does not have an API. New customer details must be manually entered into the system by the manager from a central spreadsheet. The user interface of the system contains the complex business logic that is needed for the manual customer data entry process.

You need to ensure that new customer details can be entered into the system automatically by using Power Automate.

Which type of flow should you create?

- A. desktop
- B. automated cloud
- C. instant cloud
- D. business process

Answer: A

Explanation:

Desktop flows is the Robotic Process Automation (RPA) solution within Power Automate.

Desktop flows provides automation for Windows desktop applications, services, and experiences for orchestration and deployment within Power Platform.

NEW QUESTION # 149

Hotspot Question

You are creating a Power Apps app. You want to ensure that the app can be used by individuals who have a vision impairment.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

PowerApps has the capability to support screen readers.

Box 2: Yes

Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using accessible colors.

https://learn.microsoft.com/en-us/power-apps/maker/canvas-apps/accessible-apps
https://docs.microsoft.com/en-us/powerapps/user/screen-reader
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

NEW QUESTION # 150

You are creating a canvas app.

The app must display a list of records from a Microsoft Excel spreadsheet stored in Microsoft OneDrive. An app user must be able to update the item details and save the details back into the spreadsheet or email the item details to themselves by using a button.

You need to identify how many connectors are required to complete the app.

How many connectors should you use?

- A. four
- B. three
- C. two

Answer: C

NEW QUESTION # 151

A company is creating a chatbot to replace a frequently asked questions (FAQ) site.

You must perform step-by-step testing for all scenarios that are part of a complex user interaction that includes multiple topics.

Testers must be able to see the workflow while interacting with the chatbot.

You need to test the chatbot.

What should you do?

- A. Publish the chatbot and test it in the demo website.
- B. View analytics for a chatbot conversation.
- C. Publish the chatbot and test it in any channel
- D. Use the chatbot designer to test the chatbot

Answer: D

Explanation:

"Testers must be able to see the workflow while interacting with the chatbot." They can see the workflow in de designer when testing the chatbot in the test pane. Not in a website.

https://docs.microsoft.com/en-us/power-virtual-agents/authoring-test-bot#test-a-topic-in-the-test- bot-pane
