Salesforce Field-Service-Consultant認證資料，Field-Service-Consultant考古題介紹

在這個資訊時代，IT行業被很多人關注，但是在如今人才濟濟的社會裏任然比較缺乏IT人。很多公司都招聘IT人才，他們一般考察IT人才的能力會參考他們擁有的IT相關認證證書，所以擁有一些IT相關的認證證書是受很多公司

歡迎的。但是這些認證證書也不是很容易就能拿到的。Salesforce Field-Service-Consultant 就是一個相當有難度的認證考試，雖然很多人報名參加Salesforce Field-Service-Consultant考試，但是通過率並不是很高。

要成為Salesforce認證的現場服務顧問，您必須通過認證考試，該考試包括60道多選題。您有105分鐘完成考試，必須得分至少62%才能通過。該考試提供英語、日語和西班牙語版本，可以在線或在測試中心參加。

最新的 Field Service Lightning program Field-Service-Consultant 免費考試真題 (Q71-Q76):

問題 #71

The field service administrator at Ursa Major Solar updates the skills required on the most common work types to adapt to the increasing complexity of jobs. This change has led to many service appointments to be in violation. There is a global optimization job set up to run nightly that has been working correctly up until this point. The administrator needs to understand why the jobs are still scheduled to resources that lack the appropriate skill level.

What are two reasons appointments remain in violation and are not reassigned?

Choose 2 answers

- A. The optimizer uses a scheduling policy different from what is used on the dispatch console.
- B. There are no service resources available with the required skill levels.
- C. Global optimization doesn't reschedule appointments that have rule violations.
- D. The territory of the resources was not included in the global optimization request.

答案: B,C

解題說明:

Global optimization is a process that reschedules all service appointments within a specified time frame based on predefined criteria such as travel time or priority[82]. Global optimization doesn't reschedule appointments that have rule violations because it assumes that those appointments are manually scheduled by dispatchers for valid reasons[83]. There are no service resources available with the required skill levels because updating the skills required on the most common work types has increased the complexity of jobs and reduced the pool of qualified resources[84]. The optimizer uses a scheduling policy different from what is used on the dispatch console would not explain why the jobs are still scheduled to resources that lack the appropriate skill level.

Scheduling policies are records that define the optimization criteria for scheduling service appointments such as minimizing travel time or maximizing resource utilization[85]. The territory of the resources was not included in the global optimization request would not explain why the jobs are still scheduled to resources that lack the appropriate skill level. Global optimization requests are records that specify which service territories and time frames should be optimized[86]. 問題 #72

A dispatcher needs to reduce the backlog of service appointments in different territories and focus on Individual customer service. Which scheduling policy should the dispatcher use

- A. Soft boundaries
- B. High intensity
- C. Customer first
- D. Emergency

答案: A

問題 #73

Universal Containers wants to assign Service Appointment based on the Polygon of the child service territory in the hierarchy. How should a Consultant assign Service Appointments to the Polygon?

- A. Set the Territory Assignment Policy to the Lowest Level.

- B. Set the Polygon Assignment Policy to the Highest Level.
- C. Set the Territory Assignment Policy to the Highest Level.
- **D. Set the Polygon Assignment Policy to the Lowest Level.**

答案： D

解題說明：

Explanation

Polygons are geographic areas that define service territories for scheduling and optimization purposes. The Polygon Assignment Policy determines which polygon in a service territory hierarchy is used to assign service appointments to service resources based on their location or skills. Setting it to the Lowest Level ensures that service appointments are assigned based on the polygon of the child service territory in the hierarchy¹. Setting it to the Highest Level would use the polygon of the parent service territory in the hierarchy¹. The Territory Assignment Policy determines which territory in a hierarchy is used to filter available resources for scheduling. It does not affect polygon assignment. References: 1

https://help.salesforce.com/s/articleView?id=sf.fs_polygons_overview.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.fs_territories_overview.htm&type=5

問題 #74

One of the products sold by Universal Containers requires quarterly service appointments. Which feature should a Consultant use to meet this requirement?

- A. Implement Path for Work Orders.
- **B. Configure a Maintenance Plan.**
- C. Build a Process for Service Appointments.
- D. Define a repeating Work Type.

答案： B

解題說明：

Explanation

Maintenance Plans are records that define the recurring service schedule for an asset or a product such as quarterly, monthly, or weekly^[59]. Configuring a Maintenance Plan would allow creating quarterly service appointments for one of the products sold by Universal Containers automatically based on predefined criteria such as start date, end date, or generation method^[60]. Defining a repeating Work Type would not create quarterly service appointments automatically. Work Types are templates that define the duration, skills, and products required for a work order or work order line item^[61]. Implementing Path for Work Orders would not create quarterly service appointments automatically. Path is a feature that displays key fields and guidance for each stage of a work order process^[62]. Building a Process for Service Appointments would not create quarterly service appointments automatically. Processes are automated workflows that execute actions based on specified criteria such as updating fields, sending emails, or creating tasks^[63]. References:

https://help.salesforce.com/s/articleView?id=sf.fs_work_types.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.path_overview.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.process_overview.htm&type=5

問題 #75

Universal Containers plans to implement Crew Management to better support its clients. Which area does the Consultant need to consider as part of the recommendation?

- **A. Capacity-based scheduling is supported for Service Crews.**
- B. A service resource can only be a member of a single Crew.
- C. Salesforce Field Service considers the Recommended Crew Size when assigning appointments.
- D. The Preferred Resource service objective is ignored for active Crew Members.

答案： A

解題說明：

Explanation

Capacity-based scheduling is a feature that allows the system to schedule service appointments based on the capacity of the

resources. This feature is supported for service crews, which are groups of resources that work together on service appointments.
