### Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q15-Q20):

#### NEW QUESTION # 15

Which of the following is not 1 of the 3Cs of good user stories?

- A. Confirmation
- B. Continuation
- C. Conversation
- D. Card

**Answer: B**

#### NEW QUESTION # 16

Which of the following are Scrum events?

- A. Iteration Review
- B. Iteration Status Session
- C. Iteration Inspection
- D. Iteration Planning

**Answer: A,D**

#### NEW QUESTION # 17

What is the best measure of progress for complex system development?

- A. Inspect and Adapt
- B. Iteration Review
- C. Prioritized backlog
- D. System Demo

**Answer: D**

Explanation:

The system demo is the best measure of progress for complex system development because it provides an integrated, comprehensive view of the new features delivered by the Agile Release Train (ART) over the past iteration. The system demo offers the ART a fact-based measure of current, system-level progress within the Program Increment (PI). It also allows the stakeholders to give feedback on the solution's fitness for purpose and alignment with the vision. The system demo tests and evaluates the complete solution in a production-like context to receive feedback from stakeholders, including Business Owners, executive sponsors, other Agile Teams, development management, and customers (and their proxies). #### NEW QUESTION # 18

Business Rule Variations and Simple or Complex are techniques used for

- A. Testing finished functionality
- B. Writing user stories
- C. Prioritizing the backlog
- D. Splitting user stories and features

**Answer: D**

#### NEW QUESTION # 19

What is the role of the Product Owner?

- A. To ensure quality by testing the Solution
- B. To prioritize the Program Backlog
- C. Estimate the Stories in the Product Backlog
- D. To represent the Customer to the Agile Team

**Answer: B**

Explanation:

The Product Owner (PO) is the Agile team member primarily responsible for maximizing the value delivered by the team by ensuring that the team backlog is aligned with customer and stakeholder needs<sup>1</sup>. As a member of the extended Product Management function, the PO is the team's primary customer advocate and primary link to business and technology strategy<sup>1</sup>. The PO is also responsible for maintaining and prioritizing the Program Backlog, which is the single source of truth for the upcoming features of the system<sup>2</sup>. The PO works with the Product Manager, who owns the Vision and the Roadmap, to define and sequence the features in the Program Backlog<sup>2</sup>. The PO also collaborates with other POs in the Agile Release Train (ART) to manage dependencies and ensure alignment across teams<sup>1</sup>.
