

# Test NSE4\_FGT\_AD-7.6 Cram Review | Certification

## NSE4\_FGT\_AD-7.6 Exam Cost

What we provide for you is the latest and comprehensive NSE4\_FGT\_AD-7.6 exam dumps, the safest purchase guarantee and the immediate update of NSE4\_FGT\_AD-7.6 exam software. Free demo download can make you be rest assured to buy; one-year free update of NSE4\_FGT\_AD-7.6 Exam software after payment can assure you during your preparation for the exam. What's more, what make you be rest assured most is that we develop the exam software which will help more candidates get NSE4\_FGT\_AD-7.6 exam certification.

Our NSE4\_FGT\_AD-7.6 qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the NSE4\_FGT\_AD-7.6 study tool. You can trust us and let us be your honest cooperater in your future development. Here are several advantages about our NSE4\_FGT\_AD-7.6 Exam for your reference. We sincere suggest you to spare some time to have a glance over the following items on our web for our NSE4\_FGT\_AD-7.6 exam questions.

## 100% Pass 2026 Fortinet NSE4\_FGT\_AD-7.6: Fortinet NSE 4 - FortiOS 7.6 Administrator Perfect Test Cram Review

As candidates, the quality must be your first consideration when buying NSE4\_FGT\_AD-7.6 learning materials. We have a professional team to collect the first-hand information for the exam. Our company have reliable channel for collecting NSE4\_FGT\_AD-7.6 learning materials. We can ensure you that NSE4\_FGT\_AD-7.6 exam materials you receive are the latest version. We have strict requirements for the NSE4\_FGT\_AD-7.6 Questions and answers, and the correctness of the answers can be guaranteed. In order to serve our customers better, we offer free update for you, so that you can get the latest version timely.

### Fortinet NSE4\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• Firewall Policies and Authentication: This domain focuses on creating firewall policies, configuring SNAT and DNAT for address translation, implementing various authentication methods, and deploying FSSO for user identification.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Deployment and System Configuration: This domain covers initial FortiGate setup, logging configuration and troubleshooting, FGCP HA cluster configuration, resource and connectivity diagnostics, FortiGate cloud deployments (CNF and VM), and FortiSASE administration with user onboarding.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Content Inspection: This domain addresses inspecting encrypted traffic using certificates, understanding inspection modes and web filtering, configuring application control, deploying antivirus scanning modes, and implementing IPS for threat protection.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• VPN: This domain focuses on implementing meshed or partially redundant IPsec VPN topologies for secure connections.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Routing: This domain covers configuring static routes for packet forwarding and implementing SD-WAN to load balance traffic across multiple WAN links.</li> </ul>

## Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q40-Q45):

### NEW QUESTION # 40

Refer to the exhibits. An administrator configured the Web Filter Profile to block access to all social networking sites except Facebook. However, when users try to access Facebook.com, they are redirected to a FortiGuard web filtering block page. Based on the exhibits, which configuration change must the administrator make to allow Facebook while blocking all other social networking sites?

## Web filter configuration

### Edit Web Filter Profile

Feature set **Flow-based** Proxy-based

☒ FortiGuard Category Based Filter

☒ Allow ☐ Monitor ☐ Block ☐ Warning ☐ Authenticate

Name	Action
Web-based Applications	<input checked="" type="radio"/> Allow
Entertainment	<input checked="" type="radio"/> Allow
Arts and Culture	<input checked="" type="radio"/> Allow
Education	<input checked="" type="radio"/> Allow
Health and Wellness	<input checked="" type="radio"/> Allow
Job Search	<input checked="" type="radio"/> Allow
Medicine	<input checked="" type="radio"/> Allow
News and Media	<input checked="" type="radio"/> Allow
Social Networking	<input type="radio"/> Block

53% 95

☐ Allow users to override blocked categories

#### Search Engines

Enforce 'Safe Search' on Google, Yahoo!, Bing, Yandex ☐

#### Static URL Filter

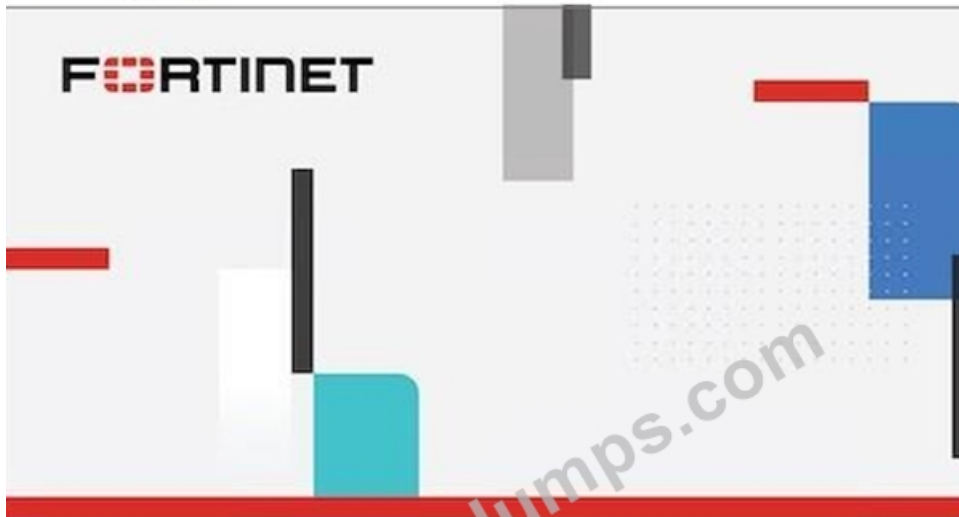

Block invalid URLs ☐

URL Filter ☒

[+ Create New](#) [Edit](#) [Delete](#)

URL	Type	Action	Status
www.facebook.com	Wildcard	<input type="radio"/> Monitor	<input checked="" type="radio"/> Enable

Block page

## FortiGuard Intrusion Prevention - Access Blocked

### Web Page Blocked

You have tried to access a web page that is in violation of your Internet usage policy.

**FORTINET**

Category Social Networking

URL <https://www.facebook.com/>

To have the rating of this web page re-evaluated [please click here](#).

- A. Change the Feature set of Web Filter Profile as Proxy-based.
- **B. Set the Action as Exempt for [www.facebook.com](https://www.facebook.com/) in the Static URL Filter.**
- C. Set the Social Networking action as warning in the FortiGuard Category Based Filter.
- D. Change the type as Simple in the Static URL Filter section.

**Answer: B**

Explanation:

The FortiGuard category filter is blocking Social Networking, which includes Facebook. Although a static URL filter entry for [www.facebook.com](https://www.facebook.com/) exists, its action is set to Monitor, so it does not override the category block. To allow Facebook while blocking other social networking sites, the action for [www.facebook.com](https://www.facebook.com/) in the Static URL Filter must be set to Exempt. This explicitly bypasses category filtering for that URL.

### NEW QUESTION # 41

An administrator wants to configure dead peer detection (DPD) on IPsec VPN for detecting dead tunnels. The requirement is that FortiGate sends DPD probes only when there is no inbound traffic.

Which DPD mode on FortiGate meets this requirement?

- A. On Idle
- B. Usabled
- **C. On Demand**
- D. Enabled

**Answer: C**

Explanation:

Based on the FortiOS 7.6 Infrastructure and IPsec VPN documentation, Dead Peer Detection (DPD) can be configured in three primary modes: On Demand, On Idle, and Disabled.

On Demand (Default Mode): This mode is specifically designed to minimize unnecessary traffic. In this mode, FortiGate sends DPD probes only when there is no inbound traffic but the FortiGate is attempting to send outbound traffic. Because network communication is typically bidirectional, the absence of inbound traffic while outbound traffic is being sent is a primary indicator of a potentially dead tunnel. This matches the specific requirement described in the question.

On Idle: In this mode, DPD probes are sent if no traffic (neither inbound nor outbound) has been observed in the tunnel for a specific period. It verifies the tunnel status even when the connection is completely idle.

Enabled: In older versions or specific CLI contexts, "Enabled" may refer to periodic DPD, but in the current FortiOS 7.x/7.6 GUI and CLI terminology for Phase 1 settings, the active modes are defined as on-demand or on-idle.

Disabled: In this mode, the FortiGate does not send DPD probes but will still respond to DPD probes sent by the remote peer. The requirement that the administrator wants probes sent only when there is no inbound traffic (usually implying the FortiGate is sending but not receiving) is the fundamental definition of the On Demand mechanism in the Fortinet curriculum.

### NEW QUESTION # 42

Refer to the exhibit. Why did FortiGate drop the packet?

```
id=65308 trace_id=6 func=print_pkt_detail line=5895 msg="vd-root:0 received a packet(proto=1, 10.0.1.10:21637  
->10.200.1.254:2048) tun_id=0.0.0.0 from port3. type=8, code=0, id=21637, seq=2."  
id=65308 trace_id=6 func=init_ip_session_common line=6076 msg="allocate a new session-00025d45, tun_id=0.0.0.  
0"  
id=65308 trace_id=6 func=vf_ip_route_input_common line=2605 msg="find a route: flag=04000000 gw=10.200.1.254  
via port1"  
id=65308 trace_id=6 func=fw_forward_handler line=738 msg="Denied by forward policy check (policy 0)"
```

- A. It matched the default implicit firewall policy.
- B. It matched an explicitly configured firewall policy with the action DENY.
- C. The next-hop IP address is unreachable.
- D. It failed the RPF check.

Answer: A

Explanation:

The debug trace output shows that the packet was "Denied by forward policy check (policy 0)." In FortiGate, policy ID 0 corresponds to the default implicit deny policy. This means that if a packet does not match any configured firewall policies, it is denied by the default implicit policy.

### NEW QUESTION # 43

What are two characteristics of HA cluster heartbeat IP addresses in a FortiGate device?  
(Choose two.)

- A. Heartbeat IP addresses are used to distinguish between cluster members.
- B. A change in the heartbeat IP address happens when a FortiGate device joins or leaves the cluster.
- C. The heartbeat interface of the primary device in the cluster is always assigned IP address 169.254.0.1.
- D. Heartbeat interfaces have virtual IP addresses that are manually assigned.

Answer: A,B

Explanation:

Heartbeat IP addresses are used to distinguish between cluster members → Each FortiGate in the HA cluster uses unique heartbeat IPs so members can identify one another.

A change in the heartbeat IP address happens when a FortiGate device joins or leaves the cluster → Heartbeat IPs are dynamically reassigned when the cluster membership changes to maintain proper communication.

### NEW QUESTION # 44

Which statement correctly describes NetAPI polling mode for the FSSO collector agent?

- A. The collector agent must search Windows application event logs.
- B. The collector agent uses a Windows API to query DCs for user logins.
- C. The NetSessionEnum function is used to track user logouts.
- D. NetAPI polling can increase bandwidth usage in large networks.

**Answer: C**

Explanation:

NetAPI: Polls temporary sessions created on the DC when a user logs on or logs off and calls the NetSessionEnum function on Windows. It's faster than the WinSec and WMI methods; however, it can miss some logon events if a DC is under heavy system load. This is because sessions can be quickly created and purged from RAM, before the agent has a chance to poll and notify FG.

## NEW QUESTION # 45

.....

The ValidBraindumps is one of the best platforms that has been helping the NSE4\_FGT\_AD-7.6 exam candidates for many years. Over this long time period the countless Fortinet NSE 4 - FortiOS 7.6 Administrator NSE4\_FGT\_AD-7.6 exam candidates have passed their dream Fortinet NSE4\_FGT\_AD-7.6 Certification Exam and they have become certified Fortinet NSE4\_FGT\_AD-7.6 professionals. All the successful Fortinet NSE4\_FGT\_AD-7.6 certification professionals are doing jobs in small, medium, and large size enterprises.
