## MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q58-Q63):

**NEW QUESTION # 58**

E-commerce enables the company to

- A. get driving directions
- **B. exchange goods and services online**
- C. look up information on the Internet
- D. exchange email

**Answer: B**

Explanation:

In the CLT "Order Processing" section, e-commerce is described as the digital mechanism allowing businesses to buy, sell, and exchange goods, services, and data through online systems. It forms the foundation for electronic ordering, payment, and customer communication. Unlike basic internet use or email exchange, e-commerce platforms connect directly with warehouse management and order processing systems to automate inventory updates, order confirmations, and shipping notifications. This integration supports real-time data flow between customers and logistics facilities, enhancing order accuracy, visibility, and responsiveness.

#### **NEW QUESTION # 59**

The document prepared by the shipper and signed by the consignee when the freight is received at its destination is called a

- A. Carrier Requisition
- **B. Bill of Lading**
- C. Purchase Order
- D. Packing List

**Answer: B**

Explanation:

The Bill of Lading serves as the central contract of carriage between shipper and carrier, as defined in the CLT "Dispatch and Tracking" module. It documents shipment details-such as shipper, consignee, commodity, weight, and handling instructions-and must be signed upon receipt. The consignee's signature confirms acceptance, completing the shipment lifecycle. It simultaneously acts as a receipt for goods, evidence of a contract, and a title document. The packing list itemizes contents; the purchase order initiates procurement; the carrier requisition is not an official transport form. Thus, the Bill of Lading uniquely meets all required delivery confirmation criteria.

#### **NEW QUESTION # 60**

Which inventory control method is commonly used with electronic products?

- A. Globally Harmonized System (GHS)
- B. Just-in-time (JIT)
- **C. First In Still Here (FISH)**
- D. Last In; First Out (LIFO)

**Answer: C**

Explanation:

First In Still Here (FISH) is an informal industry term humorously describing inventory that has not moved for a long time-often applicable to obsolete or slow-moving items, such as outdated electronics. The CLT "Inventory Control" discussion of stock rotation and turnover stresses avoiding "FISH" inventory, which ties up capital and warehouse space. Electronic products rapidly lose value or technological relevance, so identifying and clearing stagnant stock is vital. CLT encourages using ABC analysis and continuous review to highlight FISH items for markdown, return, or disposal. While not a formal control method like FIFO or JIT, understanding FISH alerts managers to inefficiencies that hinder inventory flow and profitability.

#### **NEW QUESTION # 61**

A system for standardizing and harmonizing the classification and labeling of chemicals is

- A. LIFO
- **B. GHS**
- C. FIFO
- D. JIT

**Answer: B**

Explanation:

The Globally Harmonized System (GHS) standardizes chemical classification, hazard statements, pictograms, signal words, and Safety Data Sheet (SDS) formats. CLT highlights GHS as the framework used across workplaces and supply chains to ensure consistent hazard communication, enabling safe handling, storage, and transport alignment with OSHA/DOT adoption of GHS elements.

#### **NEW QUESTION # 62**

When inventory levels fall to a certain point, items are automatically

- A. reordered
- B. fixed stock
- C. at maximum order point
- D. eliminated

**Answer: A**

Explanation:

In CLT 4.0, the reorder point is the stock level that triggers a replenishment order to prevent stockouts during the supplier lead time. The calculation considers average demand and lead time (often with a safety stock factor). When on-hand plus on-order inventory reaches this threshold, a replenishment signal is issued—manual, system-generated, or via automated kanban—so items are "automatically reordered." This practice balances service level with carrying cost by ordering just before the pipeline would run dry, ensuring continuity of operations without excessive inventory.

#### **NEW QUESTION # 63**
