

Test Databricks-Certified-Data-Engineer-Associate Collection Pdf | Databricks Databricks-Certified-Data-Engineer-Associate Reliable Dumps Ebook: Databricks Certified Data Engineer Associate Exam Exam Pass Once Try

P.S. Free 2025 Databricks Databricks-Certified-Data-Engineer-Associate dumps are available on Google Drive shared by DumpsReview: https://drive.google.com/open?id=1xfcdme_gPuCo_PWk9FSOhU8bMMs16vs

Our company is widely acclaimed in the industry, and our Databricks-Certified-Data-Engineer-Associate learning dumps have won the favor of many customers by virtue of their high quality. Started when the user needs to pass the qualification test, choose the Databricks-Certified-Data-Engineer-Associate real questions, they will not have any second or even third backup options, because they will be the first choice of our practice exam materials. Our Databricks-Certified-Data-Engineer-Associate practice guide is devoted to research on which methods are used to enable users to pass the test faster. Therefore, through our unremitting efforts, our Databricks-Certified-Data-Engineer-Associate Real Questions have a pass rate of 98% to 100%. Therefore, our company is worthy of the trust and support of the masses of users, our Databricks-Certified-Data-Engineer-Associate learning dumps are not only to win the company's interests, especially in order to help the students in the shortest possible time to obtain qualification certificates.

Persistence and proficiency made our experts dedicated in this line over so many years. Their passing rates are over 98 and more, which is quite riveting outcomes. After using our Databricks-Certified-Data-Engineer-Associate practice materials, you will have instinctive intuition to conquer all problems and difficulties in your review. We are sure you can seep great deal of knowledge from our Databricks-Certified-Data-Engineer-Associate practice materials in preference to other materials obviously. These Databricks-Certified-Data-Engineer-Associate practice materials have variant kinds including PDF, app and software versions.

Databricks-Certified-Data-Engineer-Associate Reliable Dumps Ebook - Verified Databricks-Certified-Data-Engineer-Associate Answers

This way you can save money even if Databricks Databricks-Certified-Data-Engineer-Associate introduces fresh Databricks Databricks-Certified-Data-Engineer-Associate exam updates. So why are you delaying? Purchase the Databricks Databricks-Certified-Data-Engineer-Associate Preparation material to get certified on the first attempt.

Databricks Certified Data Engineer Associate Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43

A data engineer is working on a Databricks project that utilizes cloud storage. The data engineer wants to load several json files from containers on a storage account as soon as the file arrives within the storage account.

Which syntax should the data engineer follow to first load the files into a dataframe and check that it is working as expected using Python?

- A. `df= spark.read.json("input/path")`
- B. `df= spark.readStream.format("json").load("input/path")`
- C. `df= spark.readStream.format("cloud"),option("json").load("/input/path")`
- **D. `df= spark.readStream.format("cloudFiles").option("cloudFiles.format", "json").load("/input/path")`**

Answer: D

NEW QUESTION # 44

An organization needs to share a dataset stored in its Databricks Unity Catalog with an external partner who uses a different data platform that is not Databricks. The goal is to maintain data security and ensure the partner can access the data efficiently. Which method should the data engineer use to securely share the dataset with the external partner?

- A. Exporting data as CSV files and emailing them
- **B. Using Delta Sharing with the open sharing protocol**
- C. Databricks-to-Databricks Sharing
- D. Using a third-party API to access the Delta table

Answer: B

NEW QUESTION # 45

A data engineering team has noticed that their Databricks SQL queries are running too slowly when they are submitted to a non-running SQL endpoint. The data engineering team wants this issue to be resolved.

Which of the following approaches can the team use to reduce the time it takes to return results in this scenario?

- A. They can turn on the Auto Stop feature for the SQL endpoint.
- B. They can increase the maximum bound of the SQL endpoint's scaling range
- C. They can turn on the Serverless feature for the SQL endpoint and change the Spot Instance Policy to "Reliability Optimized."
- **D. They can turn on the Serverless feature for the SQL endpoint.**
- E. They can increase the cluster size of the SQL endpoint.

Answer: D

Explanation:

Option D is the correct answer because it enables the Serverless feature for the SQL endpoint, which allows the endpoint to automatically scale up and down based on the query load. This way, the endpoint can handle more concurrent queries and reduce the time it takes to return results. The Serverless feature also reduces the cold start time of the endpoint, which is the time it takes to start the cluster when a query is submitted to a non-running endpoint. The Serverless feature is available for both AWS and Azure Databricks platforms.

Databricks SQL Serverless, Serverless SQL endpoints, New Performance Improvements in Databricks SQL

NEW QUESTION # 46

Which SQL code snippet will correctly demonstrate a Data Definition Language (DDL) operation used to create a table?

- A. `ALTER TABLE employees ADD COLUMN salary DECIMAL(10,2);`
- **B. `CREATE TABLE employees (id INT, name STRING);`**
- C. `INSERT INTO employees (id, name) VALUES (1, 'Alice');`
- D. `DROP TABLE employees;`

Answer: B

NEW QUESTION # 47

A global retail company sells products across multiple categories (e.g., Electronics, Clothing) and regions (e.g., North America, Europe).

g. North, South, East, West). The sales team has provided the data engineer with a PySpark dataframe named sales_df as below and the team wants the data engineer to analyze the sales data to help them make strategic decisions.

sales_df

product_id	category	sales_amount	region
1	Electronics	100	North
2	Clothing	200	South
3	Electronics	150	North
4	Clothing	300	South
5	Electronics	250	East
6	Clothing	400	West

- A. Category_sales = sales_df.agg(sum("sales amount"),groupBy("category")).alias("total sales amount")
- B. Category_sales = sales_df.groupBy("region").agg(sum("sales amount").alias("total_sales_amount"))
- C. Category_sales = sales_df.sum("sales amount").groupBy("category").alias("total_sales_amount")
- D. Category_sales = sales_df.groupBy("category").agg(sum("sales amount").alias("total_sales_amount"))

Answer: D

NEW QUESTION # 48
