## SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q19-Q24):

### NEW QUESTION # 19

What is the primary purpose of SAP Governance, Risk, and Compliance (GRC)?

- A. To enhance customer relationship management
- **B. To ensure regulatory compliance and manage risks**
- C. To optimize supply chain operations
- D. To automate payroll processing

**Answer: B**

### NEW QUESTION # 20

What are the five key pillars of SAP Financial Management Solutions to support the business needs of CFOs?

- **A. Accounting & Financial Close, Financial Planning & Analysis, Governance, Risk & Compliance, Quote-to-Cash, Treasury & Working Capital.**
- B. Accounting & Financial Close, Field Service Management, Financial Planning & Analysis, Quote-to- Cash, Treasury & Working Capital.
- C. Financial Planning & Analysis, Governance, Risk & Compliance, Integrated Business Planning, Quote- to-Cash, Treasury & Working Capital.
- D. Accounting & Financial Close, Financial Planning & Analysis, Governance, Risk & Compliance, Quote-to-Cash, Inventory Management & Stock Control.

**Answer: A**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP structures its Financial Management portfolio around five strategic pillars designed to cover the end-to- end responsibilities of the modern CFO. These pillars include:

\* Accounting & Financial Close: Focused on the "Record-to-Report" process, ensuring a fast, accurate, and compliant closing cycle using the Universal Journal.

\* Financial Planning & Analysis (FP&A): Enabling continuous planning, budgeting, and forecasting combined with real-time performance analysis.

\* Governance, Risk & Compliance (GRC): Protecting the business by embedding automated controls, identity governance, and international trade compliance into operations.

\* Quote-to-Cash: Managing the entire lifecycle of a sale, from initial offer to revenue recognition and cash collection, supporting modern subscription-based models.

\* Treasury & Working Capital: Optimizing liquidity, managing financial risks, and ensuring efficient bank connectivity and cash flow.

These pillars represent the holistic "Office of the CFO" strategy. Options like Field Service Management (A), Inventory Management (C), or Integrated Business Planning (D) are important operational areas within the broader SAP ERP ecosystem, but they are not categorized as the five core pillars specifically defined for Financial Management Solutions when positioning the suite to finance leadership.

### NEW QUESTION # 21

What are the key drivers for the transformation of the finance function?

Note: There are 3 correct answers to this question.

- **A. Managing uncertainty**
- **B. Navigating transformation**
- C. Designing resilient supply chains
- D. Prioritizing agile development
- **E. Ensuring compliance and sustainability**

**Answer: A,B,E**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The transformation of the finance function is driven by the need for the CFO to move from an operational manager to a strategic

advisor. SAP identifies three primary drivers for this shift: Ensuring compliance and sustainability, Navigating transformation, and Managing uncertainty. "Navigating transformation" refers to the shift toward digital business models and the need to optimize internal processes for greater efficiency and growth. This requires a modern technology platform that can handle the speed of today's business.

"Ensuring compliance and sustainability" is driven by the increasing complexity of global regulations and the rise of ESG (Environmental, Social, and Governance) reporting requirements. Finance is now responsible for tracking and reporting non-financial metrics with the same rigor as financial ones. Finally, "Managing uncertainty" is a critical driver in a volatile global economy. CFOs must be able to predict the impact of external shocks—such as inflation, currency shifts, or geopolitical events—through real-time scenario planning and predictive analytics. While supply chain resilience (Option B) and agile development (Option D) are important enterprise-wide goals, they are not the primary financial drivers specifically used to position the transformation of the finance department within the SAP Financial Management framework.

#### NEW QUESTION # 22

Which of the following SAP solutions are designed to support Implementation of Business Controls and monitoring Compliance?

Note: There are 3 correct answers to this question.

- A. SAP Global Trade Management
- B. SAP Entitlement Management
- C. SAP Process Control
- D. SAP Business Integrity Screening
- E. SAP S/4HANA Finance for Group Reporting

**Answer: A,C,D**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP's Governance, Risk, and Compliance (GRC) portfolio provides a comprehensive suite of tools designed to safeguard the organization through automated controls. SAP Process Control is central to this effort, offering a framework for implementing and continuously monitoring internal business controls. It moves organizations away from manual, sample-based audits toward automated, continuous monitoring of processes, ensuring that compliance is maintained in real-time.

SAP Business Integrity Screening complements this by scanning large volumes of transactional data to detect anomalies that might indicate fraud or errors. By identifying these "red flags" early, CFOs can prevent financial loss and protect the organization's reputation. Furthermore, SAP Global Trade Management (within the context of SAP GTS) ensures that all international trade activities comply with complex global regulations, managing everything from sanctioned party screening to license management. Together, these three solutions provide the transparency and oversight necessary for modern risk management. While SAP S/4HANA Finance for Group Reporting is essential for consolidation, it is a closing tool rather than a monitoring control solution. SAP Entitlement Management focuses on rights management, which is distinct from the core financial business controls described here.

#### NEW QUESTION # 23

Which of the following is a key feature of SAP Business Suite?

- A. Real-time data sharing
- B. Batch-based reporting
- C. Limited integration
- D. Manual data entry

**Answer: A**
