High Hit Rate Relevant AB-900 Answers Covers the Entire Syllabus of AB-900

As long as you bought our AB-900 practice guide, then you will find that it cost little time and efforts to learn. You can have a quick revision of the AB-900 learning quiz in your spare time. Also, you can memorize the knowledge quickly. There almost have no troubles to your normal life. You can make use of your spare moment to study our AB-900 Preparation questions. The results will become better with your constant exercises. Please have a brave attempt.

Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.
Topic 2	<ul style="list-style-type: none">Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.
Topic 3	<ul style="list-style-type: none">Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.

Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q23-Q28):

NEW QUESTION # 23

Select the answer that correctly completes the sentence.

Answer Area

Answer:

Explanation:

Answer Area

Explanation:

Answer Area

The correct answer is Microsoft 365 Copilot . Microsoft Learn states that Restricted SharePoint Search (RSS) gives organizations time to review and correct permissions on SharePoint sites, and then add only those reviewed sites to an allowed list that Copilot can access . That means RSS is specifically about restricting Copilot's access to SharePoint content, not blocking administrators, guest users, or Microsoft Purview eDiscovery from those sites.

This distinction is important. Microsoft explains that users can still access SharePoint content based on their normal permissions, while RSS limits what Microsoft 365 Copilot can use as grounding data until site permissions are reviewed and approved. So the feature helps reduce oversharing risk in Copilot without removing a user's direct ability to find or open content they already have permission to access in SharePoint.

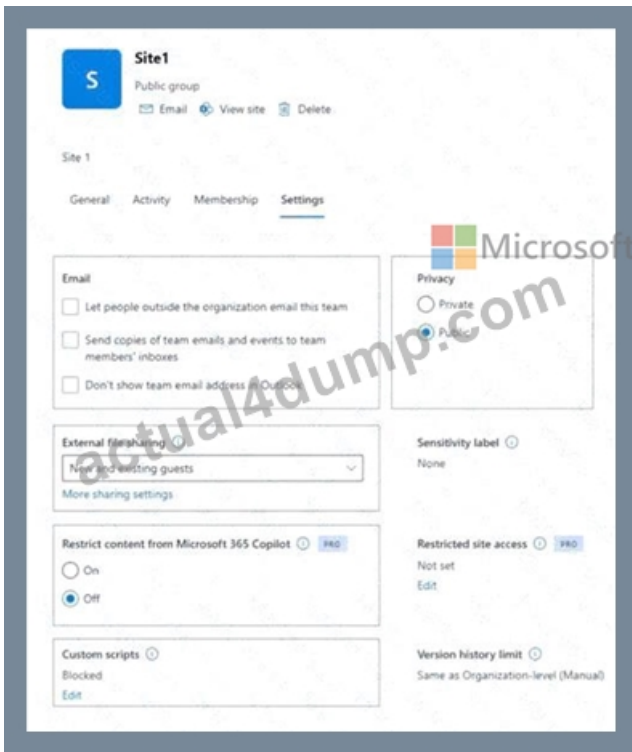

In other words, the restriction is placed on Copilot's searchable grounding scope , not on the user's own SharePoint permissions. That is why the sentence is correctly completed with Microsoft 365 Copilot .

NEW QUESTION # 24

You have a Microsoft SharePoint site named Site1 and a security group named Group1.

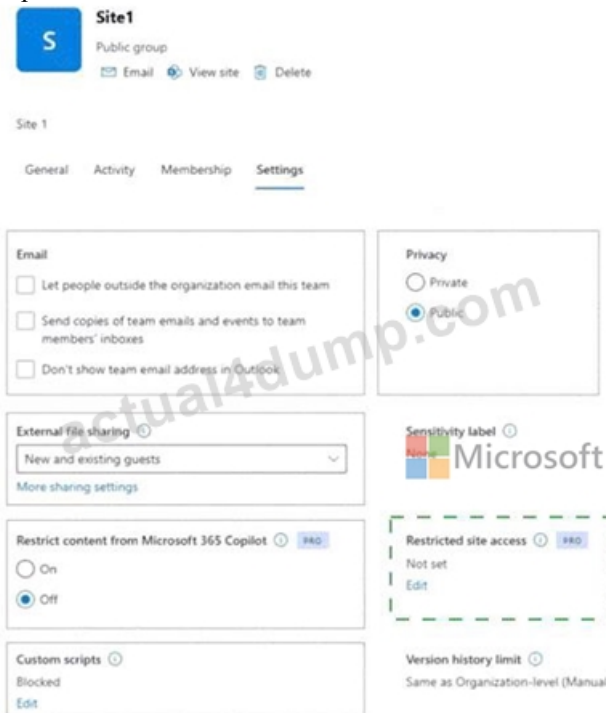

You need to prevent all users that currently have access to Site1 from accessing the site content unless the user is also a member of Group1.

Which settings should you configure? To answer, select the appropriate settings in the answer area.

Answer:

Explanation:

Explanation:

Site1
Public group

Email View site Delete

Site 1

General Activity Membership Settings

Email

Let people outside the organization email this team

Send copies of team emails and events to team members' inboxes

Don't show team email address in Outlook

Privacy

Private

Public

External file sharing

New and existing guests

[More sharing settings](#)

Sensitivity label

None

Restrict content from Microsoft 365 Copilot

On

Off

Restricted site access

Not set

[Edit](#)

Custom scripts

Blocked

[Edit](#)

Version history limit

Same as Organization-level (Manual)

The correct setting is Restricted site access configured with Group1 . Microsoft Learn states that you can restrict access to a SharePoint site by specifying Microsoft Entra security groups or Microsoft 365 groups as the Restricted Access Control group . Microsoft also states that, after the policy is applied, a user can access the site content only if the user both already has permission to the site or content and is a member of the specified restricted access group. This exactly matches the requirement: users who currently have access to Site1 must also be members of Group1 to continue accessing the content.

The Restrict content from Microsoft 365 Copilot setting is unrelated to direct user access to the SharePoint site. That control limits whether Copilot can use site content, but it does not block users from opening the site themselves. Microsoft separately explains that Restricted SharePoint Search and Copilot restrictions are not the same as changing actual SharePoint permissions or access boundaries. So for this scenario, keep the Copilot restriction Off and configure Restricted site access with Group1 .

NEW QUESTION # 25

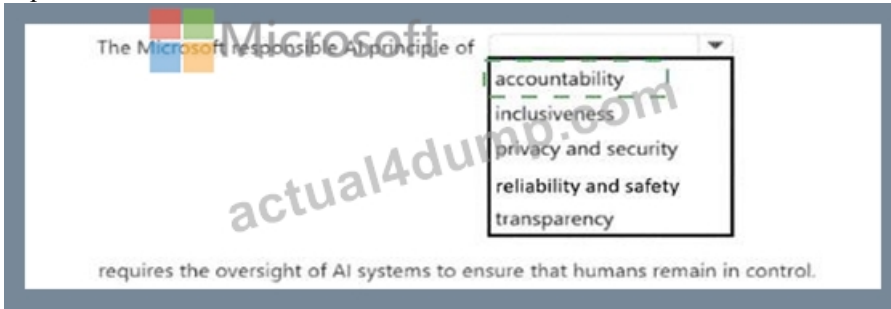

Select the answer that correctly completes the sentence.

The Microsoft responsible AI principle of _____ requires the oversight of AI systems to ensure that humans remain in control.

- accountability
- inclusiveness
- privacy and security
- reliability and safety
- transparency

Answer:

Explanation:

Explanation:

The correct answer is accountability . Microsoft's Responsible AI framework is built on six principles: fairness , reliability and safety , privacy and security , inclusiveness , transparency , and accountability .

Microsoft describes accountability as the principle that people who design and deploy AI systems must remain responsible for how those systems operate and for the impacts they create. A key part of that principle is ensuring there is human oversight so humans remain in control of decisions and system behavior.

The other options do not match the wording in the sentence as closely. Transparency focuses on helping people understand how AI systems work and why they produce certain outcomes. Privacy and security is about protecting data and securing systems.

Reliability and safety is about dependable and safe operation.

Inclusiveness is about designing AI that empowers and includes people broadly. The principle tied to oversight, responsibility, and keeping humans in control is accountability .

NEW QUESTION # 26

Your company plans to use Microsoft 365 Copilot.

You need to provide a user with the ability to use Microsoft 365 Copilot, including the Researcher and Analyst agent. What should you use?

- A. the Microsoft Entra admin center
- **B. the Microsoft 365 admin center**
- C. the Microsoft Defender portal
- D. the Microsoft Purview portal

Answer: B

Explanation:

The correct answer is D. the Microsoft 365 admin center . Microsoft Learn states that users with a Microsoft 365 Copilot license can use Copilot capabilities, and Microsoft specifically points administrators to the Microsoft 365 admin center and its setup guidance to assign the required licenses to users. Microsoft also documents that the Researcher and Analyst agents were deployed to existing users with Microsoft 365 Copilot licenses and that administrators govern these agents through the Microsoft 365 admin center .

The other portals are not the primary place for this task. Microsoft Entra admin center focuses on identity and access, Microsoft Purview focuses on compliance and governance, and Microsoft Defender focuses on security operations and threat protection. None of those is the main admin experience Microsoft documents for assigning Microsoft 365 Copilot access and managing the availability of Researcher and Analyst. Because the goal is to enable a user to use Microsoft 365 Copilot and its Microsoft-provided agents, the correct administrative tool is the Microsoft 365 admin center .

NEW QUESTION # 27

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point.

Answer Area		
Statements	Yes	No
Microsoft 365 Copilot honors Microsoft Purview sensitivity labels.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot ignores Microsoft Purview data loss prevention (DLP) policies.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors existing Microsoft 365 permissions.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area		
Statements	Yes	No
Microsoft 365 Copilot honors Microsoft Purview sensitivity labels.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot ignores Microsoft Purview data loss prevention (DLP) policies.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot honors existing Microsoft 365 permissions.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Answer Area		
Statements	Yes	No
Microsoft 365 Copilot honors Microsoft Purview sensitivity labels.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot ignores Microsoft Purview data loss prevention (DLP) policies.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot honors existing Microsoft 365 permissions.	<input checked="" type="radio"/>	<input type="radio"/>

The correct selections are Yes, No, Yes . Microsoft states that Microsoft 365 Copilot inherits the security, compliance, and privacy policies already configured in Microsoft 365, including Microsoft Purview sensitivity labels and other compliance controls. That makes statement 1 Yes . Microsoft also explains that Copilot respects existing access controls and compliance boundaries rather than bypassing them.

Statement 2 is No because Microsoft 365 Copilot does not ignore Microsoft Purview DLP . Microsoft documents that Copilot honors the protections applied to the underlying content and works within Microsoft

365's existing compliance framework. DLP remains part of the environment governing how sensitive data is protected and shared.

Statement 3 is Yes because Microsoft clearly states that Copilot only surfaces content that a user is already authorized to access through existing Microsoft 365 permissions . Copilot uses Microsoft Graph to ground responses, but it does not grant new permissions or expose content outside the user's allowed scope.

Therefore, the correct hotspot answers are Yes , No , and Yes .

NEW QUESTION # 28

.....

Passing the AB-900 certification can prove that and help you realize your goal and if you buy our AB-900 quiz prep you will pass the exam successfully. Our product is compiled by experts and approved by professionals with years of experiences. You can download and try out our laTest AB-900 Quiz torrent freely before your purchase. Our purchase procedures are safe and our products are surely safe without any virus. After you purchase our AB-900 exam guide is you can download the test bank you have bought immediately.
