

1Z0-1072-25 Free Download Pdf, Exam 1Z0-1072-25 Training

BONUS!!! Download part of ITExamDownload 1Z0-1072-25 dumps for free: <https://drive.google.com/open?id=1YsD8hL821msDOD7WeIXvHkYktQdnVYG7>

Oracle training pdf material is the valid tools which can help you prepare for the 1Z0-1072-25 actual test. 1Z0-1072-25 vce demo gives you the prep hints and important tips, helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills. With the help of 1Z0-1072-25 study material, you will master the concepts and techniques that ensure you exam success. What's more, you can receive 1Z0-1072-25 updated study material within one year after purchase. Besides, you can rest assured to enjoy the secure shopping for Oracle exam dumps on our site, and your personal information will be

For the Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) web-based practice exam no special software installation is required. because it is a browser-based Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) practice test. The web-based Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) practice exam works on all operating systems like Mac, Linux, iOS, Android, and Windows. In the same way, IE, Firefox, Opera and Safari, and all the major browsers support the web-based Oracle 1Z0-1072-25 Practice Test.

Exam 1Z0-1072-25 Training | 1Z0-1072-25 Pass Guarantee

Our 1Z0-1072-25 exam questions can assure you that you will pass the 1Z0-1072-25 exam as well as getting the related certification under the guidance of our 1Z0-1072-25 study materials as easy as pie. Firstly, the pass rate among our customers has

reached as high as 98% to 100%, which marks the highest pass rate in the field. Secondly, you can get our 1Z0-1072-25 Practice Test only in 5 to 10 minutes after payment, which enables you to devote yourself to study as soon as possible.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"> • Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains. |
| Topic 2 | <ul style="list-style-type: none"> • Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block • File • Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques. |
| Topic 3 | <ul style="list-style-type: none"> • Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources |
| Topic 4 | <ul style="list-style-type: none"> • Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN • FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues. |

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q40-Q45):

NEW QUESTION # 40

What is the primary function of the Network Path Analyzer (NPA) tool provided by Oracle Cloud Infrastructure (OCI)?

- A. Sending actual traffic between source and destination to diagnose connectivity issues
- B. Optimizing network performance by dynamically adjusting routing paths based on traffic patterns
- C. Providing real-time monitoring of network traffic to detect security threats and unauthorized access attempts
- D. Collecting and analyzing network configuration to identify virtual network configuration issues impacting connectivity

Answer: D

Explanation:

The primary function of the Network Path Analyzer (NPA) tool in Oracle Cloud Infrastructure (OCI) is to help users troubleshoot and diagnose network connectivity issues by analyzing the network path between a source and a destination within OCI. The tool collects and analyzes the configuration of the virtual network, identifying any misconfigurations or issues that might impact connectivity.

NPA Usage: The Network Path Analyzer allows administrators to trace the network path and check for issues such as incorrect security list rules, route table misconfigurations, or any other factors that could prevent network traffic from reaching its destination.

Oracle Cloud Infrastructure Documentation: Network Path Analyzer

NEW QUESTION # 41

Which authentication option should you use to ensure third-party APIs communicate with OCI resources?

- A. SSH Key Pair with 2048-bit algorithm

- B. OCI Username and Password
- **C. API Signing Key**
- D. Auth Tokens

Answer: C

Explanation:

When ensuring that third-party APIs communicate securely with OCI resources, the appropriate authentication option is API Signing Key.

API Signing Key: This method uses an RSA key pair to authenticate and sign API requests. The API signing key provides a secure and reliable way to ensure that the API requests to OCI are coming from an authorized source. It is commonly used for programmatic access to OCI services.

Other Options:

SSH Key Pair: Primarily used for secure shell access to compute instances, not for API authentication.

Auth Tokens: Typically used for authentication in environments where APIs don't support the API Signing Key, such as OCI CLI or SDKs.

OCI Username and Password: Generally used for the Console login, not for securing API communications.

Relevant OCI Documentation:

API Signing Key Authentication

This documentation provides details on using API Signing Keys for secure API communication in OCI.

NEW QUESTION # 42

Which TWO statements about the Oracle Cloud Infrastructure (OCI) File Storage Service are accurate?

- A. Communication with file systems in a mount target is encrypted via HTTPS.
- **B. File systems use Oracle-managed keys by default.**
- C. Customers can encrypt the communication to a mount target via export options.
- **D. Customers can encrypt data in their file system using their own Vault encryption key.**

Answer: B,D

Explanation:

Oracle Cloud Infrastructure (OCI) File Storage Service offers robust encryption capabilities to ensure data security.

B . Customer-Managed Encryption: Customers can choose to encrypt their data using their own keys stored in the OCI Vault service. This gives customers control over their encryption keys and enhances data security.

D . Oracle-Managed Encryption: By default, all data stored in OCI File Storage is encrypted using Oracle-managed keys. This ensures that data is encrypted at rest without requiring any action from the customer.

Incorrect Statements:

A . Communication is not encrypted via HTTPS when accessing file systems; instead, encryption in transit is typically managed via NFS over TLS.

C . Encryption of communication to a mount target is handled via network configurations, not through export options.

Oracle Cloud Infrastructure Documentation: File Storage Encryption

NEW QUESTION # 43

Which OCI Object Storage tier is suitable for storing the backup to minimize cost while meeting the requirements of immediate accessibility and retention of 31 days?

- A. Standard tier
- **B. Infrequent Access tier**
- C. Archive tier
- D. Auto-Tiering tier

Answer: B

Explanation:

The Infrequent Access tier in OCI Object Storage is suitable for storing backups that need to be immediately accessible and retained for a specific period, such as 31 days, while also minimizing costs. This tier offers a balance between cost and accessibility, charging lower storage costs compared to the Standard tier but still allowing quick access to the data.

Use Case: The Infrequent Access tier is designed for data that is not frequently accessed but must remain readily available when needed, making it ideal for backup storage.

Reference:

Oracle Cloud Infrastructure Documentation: Object Storage Tiers

NEW QUESTION # 44

You can attach resources to a Dynamic Routing Gateway (DRG). Select THREE of these resources.

- A. Virtual Circuits
- B. Subnet
- C. Remote Peering Connections
- D. VNIC
- E. Local Peering Connection
- F. IPSec Tunnel

Answer: A,C,F

Explanation:

A Dynamic Routing Gateway (DRG) in Oracle Cloud Infrastructure (OCI) is a virtual router that provides a path for private traffic between your on-premises network and your VCN, or between your VCN and other VCNs. The resources that can be attached to a DRG include:

A. Virtual Circuits: Used to establish a private connection between your on-premises data center and your VCN via Oracle's FastConnect service.

D. Remote Peering Connections: Enables peering between VCNs located in different regions (Remote VCN Peering).

E. IPSec Tunnel: Facilitates secure VPN connections between your on-premises network and your OCI VCN.
