

Pass-Rate Latest 3V0-32.23 Braindumps Free & Passing 3V0-32.23 Exam is No More a Challenging Task

2025 Latest RealValidExam 3V0-32.23 PDF Dumps and 3V0-32.23 Exam Engine Free Share: <https://drive.google.com/open?id=1BybdO8l0NbBDhLftxCuPm0C6zLZU3PGV>

Our 3V0-32.23 practice guide is cited for the outstanding service. In fact, we have invested many efforts to train our workers. All workers will take part in regular training to learn our 3V0-32.23 study materials. So their service spirits are excellent. We have specific workers to be responsible for answering customers' consultation about the 3V0-32.23 Learning Materials. All our efforts are aimed to give the best quality of 3V0-32.23 exam questions and best service to our customers.

Our 3V0-32.23 learning questions are famous for that they are undeniable excellent products full of benefits, so our exam materials can spruce up our own company image. Besides, our 3V0-32.23 study quiz is priced reasonably, so we do not overcharge you at all. Not only the office staff can buy it, the students can also afford it. Meanwhile, our 3V0-32.23 Exam Materials are demonstrably high effective to help you get the essence of the knowledge which was convoluted. You will get more than you can imagine by our 3V0-32.23 learning guide.

These technologies are used to automate the management and deployment of virtual infrastructures and applications in a cloud environment. 3V0-32.23 Exam also covers topics such as designing and implementing cloud computing architectures, managing cloud services and resources, and integrating with other cloud platforms.

VMware Cloud Management and Automation Advanced Design Sample

Questions (Q242-Q247):

NEW QUESTION # 242

A company is planning to deploy a new cloud management solution that will allow business users to deploy servers via a self-service portal.

After the initial discovery workshop with the new service owner, the architect has gained the following key information about the project:

- In an effort to increase user experience, the IT Manager has requested that all deployments do not rely on manual approvals.
- The current IT team is made up of five engineers but only one engineer has any experience writing scripts or automating server deployments.
- The current version of the CMDB solution has no API available to create or destroy configuration items (CI) and there is no budget for upgrades.
- Currently all CMDB activities are completed manually via service request with an SLA of 4 hours.
- The customer has one data center with a requirement of protection against data center failure.
- The expected availability SLA (measured monthly) will be 99.5%.
- The deployment of a server is expected to take no longer than 2 hours.

Given the information provided, which two risks should the architect document within the design?

(Choose two.)

- A. The end to end server deployment cannot be achieved in the time window.
- B. The lack of REST-API for IP address management solution.
- C. There is insufficient resources available to complete the project.
- D. The customer only has a single data center location.
- E. Allowing self-service deployments of servers by business users.

Answer: A,B

NEW QUESTION # 243

What is a key benefit of integrating VMware Aria Operations for Logs into a Cloud Management logical design?

- A. Managing user authentication
- B. Automating software updates
- C. Identifying performance bottlenecks and troubleshooting
- D. Creating graphical user interfaces

Answer: C

NEW QUESTION # 244

An architect has been asked about migrating a client's solution from vRealize Automation 7.x to VMware Aria Automation 8.x. One of the requirements is to continue to build custom cloud templates.

Which component of a VMware Aria Automation solution will fulfill this requirement?

- A. Aria Automation Assembler
- B. Cloud-Init
- C. Aria Automation Consumption
- D. Cloud Zones

Answer: A

Explanation:

Aria Automation Assembler is the component in VMware Aria Automation 8.x used to create, edit, version, and publish custom cloud templates, fulfilling the requirement to continue building custom templates after migrating from vRealize Automation 7.x.

NEW QUESTION # 245

Which aspect(s) of a Cloud Management physical design would VMware Aria Automation Config contribute to?

- A. Automating cloud infrastructure configuration and management tasks

- Answer: A**

- A. Streamlining supply chain processes
- B. Defining employee job roles
- C. Organizing company parties
- **D. Automating complex IT workflows and processes**
