## Latest TDA-C01 Braindumps Questions & Latest TDA-C01 Test Objectives

It is our company that can provide you with special and individual service which includes our TDA-C01 preparation quiz and good after-sale services. Our experts will check whether there is an update every day, so you needn't worry about the accuracy of TDA-C01 Study Materials. If there is an update system, we will send them to the customer automatically. As is known to all, our TDA-C01 simulating materials are high pass-rate in this field, that's why we are so famous.

## Tableau Certified Data Analyst Sample Questions (Q61-Q66):

**NEW QUESTION # 61**
You plan to create a visualization that has a dual axis chart. The dual axis chart will contain a shape chart and a line chart will use the same measure named Population on the axis.
You need to configure be shapes to be much larger than the line.
What should you do?

- A. Duplicate Population Drag the duplicate to the second Marks card and configure the see of the marks independently
- B. Create a custom shape that is larger than the default shape and add the shape to the Shapes folder in My Repository
- C. For the second axis select Shape on the Marks card From Select Shape Palette select Custom and then select Reset

- D. Change Population to a discrete dimension

**Answer: A**

**NEW QUESTION # 62**
You connect to a database server by using Tableau Prep. The database server has a data role named Role1.
You have the following field in the data.

| **Material** |
| --- |
| Concrete |
| Concret |
| Brick |
| Brik |
| steel |
| Stel |
| Drywall |

You need to apply the Role1 data role to the Material field.
Which two actions should you perform? Choose two.

- A. From the More actions menu of Materials, filter the selected values.
- B. From the More actions menu of Materials, select Valid in the Show values section.
- C. From the More actions menu of Materials, select Group Values, and then select Spelling.
- D. For the data type of the Material field, select Custom, and then select Role1.

**Answer: C,D**

Explanation:
To apply a custom data role to a field, you need to select the data type of the field and then choose the data role from the list of available roles. This will validate the values in the field against the data role and mark any invalid values with a red exclamation mark. To fix the invalid values, you can use the Group Values option and select the Spelling algorithm, which will group values that are close in spelling and replace them with the most frequent value in the group. This will help you standardize the values in the Material field and match them with the Role1 data role. References: The information is based on the following sources:
Use Data Roles to Validate your Data - Tableau
New in Tableau Prep: Automatically identify data quality issues with Data Roles

**NEW QUESTION # 63**
You have a line chart on a worksheet.
You want to add a comment to March 2020 as shown in the following visualization.
What should you do?

March 2020 grew 190.0% from the previous month.

+tableau

- A. Drag the growth rate to Text on the Marks card
- B. Add a tooltip
- C. Enable captions
- D. Annotate March 2020

**Answer: D**

Explanation:
To add a comment to March 2020 on a line chart, you need to annotate that mark. You can right-click on the mark and select Annotate > Mark from the menu. This will open a dialog box where you can type your comment and format it as you like. You can also drag and drop the annotation to position it on the worksheet. Dragging the growth rate to Text on the Marks card will add a label to every mark on the line chart, enabling captions will show a description of the worksheet at the bottom, and adding a tooltip will show a text box when users hover over a mark. **NEW QUESTION # 64**
You have the following visualization.
The Last() calculation is set to compute using Table (across)
Which value will appear in the crosstab for the Consumer segment of the year 2018 if you change compute to use Oder Dale?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

The LAST() function in Tableau returns the number of rows from the current row to the last row in the partition. When you compute using 'Order Date', it will change the partitioning of the calculation. If
'Consumer' in '2018' is the last row in its partition when computed by 'Order Date', then LAST() will return 0 for that cell.
The LAST() function in Tableau is a table calculation that returns the number of rows from the current row to the last row in the partition. The value of LAST() is 0 for the last row, increases by 1 for each row above the last row, and can be negative for rows below the current row if there are such rows in the partition.
In the provided visualization, LAST() is set to compute using Table (across). Changing the compute mode to use "Order Date" will adjust the partitioning of the data upon which the LAST() function is calculated. Since
"Order Date" is likely to be a unique value per row (assuming each order has a unique date), each row becomes its own partition.
For the Consumer segment of the year 2018, if "Order Date" is unique for each row, then the last row in each partition (in this case, each individual row) will have a LAST() value of 0 because there are no other rows in the partition - it's the last row of its own partition.
Therefore, when you change the compute mode of LAST() to use "Order Date", each cell under the Consumer segment for the year 2018 will have the LAST() value of 0, because each order date creates a partition of one, making every row the last in its partition.

## NEW QUESTION # 65
Which syntax should a Data Analyst use to find the first purchase date per customer when Customer is not in the view?

- A. { FIXED [Customer ID] : MIN([Purchase Date]) }
- B. [Customer ID] : { [Purchase Date] }
- C. [Customer ID] : MIN([Purchase Date])
- D. MIN([Purchase Date])

**Answer: A**

## NEW QUESTION # 66
......

Getting a Tableau TDA-C01 trusted certification is a way to prove your expertise and show you that you are ready all the time to take the additional responsibilities. The Tableau Certified Data Analyst TDA-C01 certification exam assists you to climb the corporate ladder easily and helps you to achieve your professional career objectives. With the Tableau Certified Data Analyst TDA-C01 certification exam you can get industry prestige and a significant competitive advantage. To attain all these you just need to enroll in the Tableau TDA-C01 Certification Exam and put in all your efforts and prepare well to crack the Tableau Certified Data Analyst TDA-C01 exam easily. For the perfect and instant Tableau Certified Data Analyst TDA-C01 exam preparation, you can get help from Tableau TDA-C01 Exam Questions. The TestPDF TDA-C01 exam questions are real and will entirely assist you in TDA-C01 exam preparation and you can easily pass the final Tableau Certified Data Analyst TDA-C01 certification exam.
