CASPO-001 Exam will evaluate the understanding of product insurance, shipping MVP, and delivering value in small chunks.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q63-Q68):

NEW QUESTION # 63
What is a Product Backlog? (Choose the best answer)

- A. It is a formally approved list of requirements to be implemented over a set period.
- B. It is a list of references to Use Case documents that are stored in a central repository. The references should be viewable and clickable by anybody to enhance transparency.
- C. It is a living artifact of product requirements that exists and evolves as long as a product exists.
- D. It is a detailed list of functionalities from which the Developers draw items, to be complemented by a separate Technology Backlog managed by the Developers.

Answer: C

Explanation:
The Product Backlog is dynamic and evolves with the product. The Scrum Guide defines it as: "The Product Backlog is an emergent, ordered list of what is needed to improve the product." Option A captures its living, evolving nature.
* B:"Formally approved" and "set period" suggest rigidity, unlike Scrum's adaptability.
* C:A separate "Technology Backlog" isn't in Scrum; all work is in one backlog.

NEW QUESTION # 64
Which statement is least accurate when providing a definition of "Done"? (Choose the best answer)

- A. It is defined by the Scrum Master
- B. It may vary depending on the project
- C. It becomes more complete over time
- D. It is the exit criteria to determine whether a Product Backlog item is complete

Answer: A

Explanation:
The Definition of "Done" is a team or organizational standard, not the Scrum Master's sole responsibility. The Scrum Guide states: "If it is not an organizational standard, the Scrum Team must create a Definition of Done appropriate for the product."
* A:Accurate-it defines completion.
* B:True-it can differ by context or product.
* C:Least accurate-the Scrum Team or organization defines it, not just the Scrum Master.

NEW QUESTION # 65
Which are NOT appropriate topics for discussion in a Sprint Retrospective? (Choose the best two answers)

- A. The value of work currently represented in the Product Backlog
- B. Team relations
- C. Sprint Backlog for the next Sprint
- D. How the team does its work
- E. Definition of "Done"

Answer: A,C

Explanation:
The Scrum Guide states: "The purpose of the Sprint Retrospective is to plan ways to increase quality and effectiveness" by inspecting

the last Sprint's people, processes, and tools.
* D:The next Sprint's Sprint Backlog is planned in Sprint Planning, not the Retrospective,making it inappropriate.

NEW QUESTION # 66

True or False: A first Sprint can start before the Product Owner has a complete and exhaustive Product Backlog in place.

- A. False
- B. True

Answer: B

Explanation:

Scrum doesn't require a fully detailed Product Backlog to begin. TheScrum Guidenotes: "The Product Backlog is an emergent, ordered list... It evolves over time." A minimal backlog with a Product Goal and some items is sufficient for the first Sprint, with refinement ongoing.
* A:True-Scrum embraces starting with what's known.

NEW QUESTION # 67

Holding a Sprint 0 is the most effective way to: (Choose the best answer)

- A. Work on team development
- B. Define a reference architecture
- C. There is no Sprint 0 in Scrum
- D. Create a complete Product Backlog

Answer: C

Explanation:

"Sprint 0" is a concept from pre-Scrum practices and isn't part of the official framework. TheScrum Guide mandates that Sprints deliver value: "A Sprint is a time-box of one month or less during which a 'Done', usable, and potentially releasable product Increment is created." A preparatory "Sprint 0" for architecture, team building, or backlog creation contradicts this by not producing an Increment.
* A, B, C:These may occur outside Sprints, but not as a "Sprint 0."
