

Perfect Test HPE7-J02 Cram Pdf, Ensure to pass the HPE7-J02 Exam

The APP online version of our HPE7-J02 real quiz boosts no limits for the equipment being used and it supports any electronic equipment and the off-line use. So you can apply this version of our HPE7-J02 exam questions on IPAD, phone and laptop just as you like. If only you open it in the environment with the network for the first time you can use our HPE7-J02 Training Materials in the off-line condition later. You will find that APP online version is quite enjoyable to learn our study materials.

HP PDF Questions format, web-based practice test, and desktop-based HPE7-J02 practice test formats. All these three HPE7-J02 exam dumps formats features surely will help you in preparation and boost your confidence to pass the challenging HP HPE7-J02 Exam with good scores.

>> Test HPE7-J02 Cram Pdf <<

HPE7-J02 Test Dumps Free & Exam HPE7-J02 Materials

Compared to other products in the industry, HPE7-J02 actual exam have a higher pass rate. If you really want to pass the exam, this must be the one that makes you feel the most. Our company guarantees this pass rate from various aspects such as content and service. Of course, we also consider the needs of users, HPE7-J02 Exam Questions hope to help every user realize their dreams. The 99% pass rate of our HPE7-J02 study guide is a very proud result for us. Buy HPE7-J02 study guide now and we will help you. Believe it won't be long before, you are the one who succeeded!

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18

While attempting to increase an upstream volume size for an Alletra 6000 Peer Persistence setup from local web management, you are facing an error that prevents you from completing the task.

Which action is required to complete the task successfully?

- A. Remove the upstream volume, volume collection before increasing the upstream volume.
- **B. Use the Data Services Cloud Console to grow the upstream volume.**
- C. Increase the size of the volume in VMware HPE Storage plugin.
- D. Remove the downstream volume, volume collection before increasing the upstream volume.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In Alletra 6000 Peer Persistence environments, operations like resizing Peer Persistence volumes must be performed via the HPE Data Services Cloud Console (DSCC), which manages volume collections and replication consistency groups. Attempting to grow the upstream volume locally will fail because the changes need to propagate across both sites consistently.

Distractors:

A/B: Removing upstream or downstream volumes would break replication and is not required.

D: Expanding in VMware only extends the VMFS datastore, not the underlying replicated volume.

Key Concept: Peer Persistence volume resizing is done in DSCC, not local web GUI.

Reference: HPE Alletra 6000 Peer Persistence Configuration and Management Guide.

NEW QUESTION # 19

A pool of Microsoft SQL servers started to use the Alletra 6000 family array six months ago. The data growth has been higher than expected, and the performance of the databases is facing some latency issues.

Which method would allow both capacity and performance to grow when expanding the array, while keeping the management simple?

- A. By adding more arrays and capacity to a single scale-out group.
- B. By selecting more flash to cache ratio on the expansion shelves.
- C. By initially selecting the timeless storage option for the array.
- D. By including more NIC cards to load balance host traffic.

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra 6000 is a scale-out architecture array. Adding more arrays to a single scale-out group increases both performance (IOPS, throughput) and capacity, while maintaining single-pane management via HPE Data Services Cloud Console. This is the most efficient way to address both capacity growth and latency reduction for SQL workloads.

Distractors:

B: Adding NICs may help with throughput but not backend latency or capacity scaling.

C: Flash-to-cache ratios can optimize read caching but don't fundamentally increase system-wide performance.

D: Timeless storage is a procurement/licensing option, not a performance/capacity scaling method.

Key Concept: Alletra 6000 scale-out clustering for balanced growth of capacity and performance.

Reference: HPE Alletra 6000 Technical Architecture Guide.

NEW QUESTION # 20

Which statement is correct when deploying an HPE Zerto DR solution where an Extended Journal Copy is required with a one-year retention period?

- A. An additional license is required to enable the Extended Journal Copy feature.
- B. HPE Zerto integrates with HPE StoreOnce to enable long-term retention for Extended Journal Copies.
- C. HPE Zerto supports a maximum of 30-day retention and cannot exceed this period.
- D. Extended Journal Copies always come from the target site to avoid impact on the production site.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto Extended Journal allows retention up to one year by integrating with secondary storage like HPE StoreOnce. Short-term journals (seconds to days) reside on primary replication storage, while long-term copies (weeks/months/years) are offloaded to StoreOnce for cost-efficient retention.

Distractors:

A: No separate license is required - it is a standard Zerto feature when integrated.

C: Extended Journals can be sourced from production or target, depending on setup; not "always" target.

D: Incorrect - Zerto supports >30 days retention with Extended Journal.

Key Concept: Zerto + HPE StoreOnce for long-term DR retention.

Reference: HPE Zerto with StoreOnce White Paper.

NEW QUESTION # 21

Two HPE Alletra 6000 arrays are configured for peer persistence between datacenters A and B, which have a fiber distance of 50km (31mi). The datacenter B hardware will be relocated to a new location that will increase the fiber distance to 150km (93mi). Which condition is valid once the relocation is finished?

- A. The peer persistence setup needs to be changed to active peer persistence.
- **B. The peer persistence configuration is supported, when latency remains <10ms.**
- C. The peer persistence replication links need to be changed to RC transport.
- D. The fiber distance exceeds the distance supported for peer persistence setup.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Peer Persistence is supported over distances of up to 150-200 km, as long as the round-trip latency is #10ms. Therefore, even after relocation to 150km, Peer Persistence remains supported provided latency requirements are met.

Distractors:

B: RC (Remote Copy) transport is already the underlying technology, but no change is required.

C: Peer Persistence is already an active-active design; no change to "active" mode is needed.

D: Distance does not exceed the supported range; only latency matters.

Key Concept: Latency <10ms is the critical requirement for Peer Persistence.

Reference: HPE Alletra 6000/Primera Peer Persistence Best Practices.

NEW QUESTION # 22

Your customer is a software development company using Kubernetes, Canonical, and Tanzu. They are expanding their Dev/Ops container environment and are considering HPE Private Cloud Business Edition (PCBE).

What is a unique benefit that HPE PCBE would bring to this customer's environment?

- A. Container level protection
- B. Infinite scale to the customer at no additional cost
- C. Multi-tenant VASA
- **D. Full stack intelligence**

Answer: D

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE PCBE provides full-stack intelligence across compute, storage, and virtualization layers. It integrates with Kubernetes distributions like Tanzu and Canonical, giving visibility and lifecycle automation across the entire stack. This helps Dev/Ops teams simplify operations, capacity planning, and performance optimization in hybrid environments.

Distractors:

B: Multi-tenant VASA applies more to VMware vVols in multi-tenant setups.

C: No platform offers "infinite scale at no cost" - this is misleading.

D: Container-level protection is delivered through HPE CSI with data protection solutions, not unique to PCBE.

Key Concept: HPE PCBE delivers unified lifecycle management with full-stack intelligence.

Reference: HPE Private Cloud Business Edition Overview.

NEW QUESTION # 23

.....

Our aim is to provide customers with actual HP HPE7-J02 questions so they pass their Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) exams with confidence. We offer a free demos and up to 365 days of free HP Dumps updates. One of the key elements of our approach is following the current exam content. Our HPE7-J02 product is designed by experienced industry professionals and is regularly updated to reflect the latest changes in the HPE7-J02 test content.

With the HPE7-J02 dumps PDF, we have also designed the HPE7-J02 practice exam software that test engine the real exam environment, In order to better meet users' needs, our HPE7-J02 study materials have set up a complete set of service system, so that users can enjoy our professional one-stop service, And our HPE7-J02 exam torrent will also be sold at a discount from time to time and many preferential activities are waiting for you.

With the HPE7-J02 dumps PDF, we have also designed the HPE7-J02 practice exam software that test engine the real exam environment, In order to better meet users' needs, our HPE7-J02 Study Materials have set up a complete set of service system, so that users can enjoy our professional one-stop service.

And the current certification exam about HPE7-J02 exams test always is updated by our website, so the learning materials you obtained are up-to-date and valid for clear exam.
