

Latest Test SPLK-3002 Experience | Reliable Splunk Vce SPLK-3002 File: Splunk IT Service Intelligence Certified Admin

P.S. Free & New SPLK-3002 dumps are available on Google Drive shared by Itcertmaster: https://drive.google.com/open?id=1Efpa_aBR9hbJ1mmbXUpEEN6hqC9Qx4_2

No doubt the Splunk SPLK-3002 certification exam is a challenging exam that always gives a tough time to their candidates. However, with the help of Itcertmaster Splunk Exam Questions, you can prepare yourself quickly to pass the Splunk SPLK-3002 Exam. The Itcertmaster Splunk SPLK-3002 exam dumps are real, valid, and updated Splunk IT Service Intelligence Certified Admin (SPLK-3002) practice questions that are ideal study material for quick Splunk SPLK-3002 exam dumps preparation.

What is the salary of a Splunk IT Service Intelligence Certified Admin professional?

The Average salary of different countries of Splunk IT Service Intelligence Certified Admin:

- UK - 74644 Pounds
- India - 7505850 INR
- United States - \$100,000 USD

Certification Topics of Splunk SPLK-3002 Exam

Our **SPLK-3002 Dumps** covers the following objectives of Splunk SPLK-3002 Exam

- Managing Notable Events (10%)
- Aggregation Policies (5%)
- Anomaly Detection (5%)
- Glass Tables 5%
- Correlation and Multi KPI Searches (5%)
- Introducing ITSI (5%)
- Installing and Configuring ITSI (10%)
- Data Audit and Base Searches (5%)
- Implementing Services (5%)
- Thresholds and Time Policies (5%)
- Investigating Issues with Deep Dives (10%)

Splunk SPLK-3002 Exam | Latest Test SPLK-3002 Experience - Money Back

Guaranteed of Vce SPLK-3002 File

However, preparing for the SPLK-3002 exam is not an easy job until they have real Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam questions that are going to help them achieve this target. They have to find a trusted source such as Itcertmaster to reach their goals. Get SPLK-3002 Certified, and then apply for jobs or get high-paying job opportunities. If you think that SPLK-3002 certification exam is easy to crack, you are mistaken.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q85-Q90):

NEW QUESTION # 85

Which of the following accurately describes base searches used for KPIs in a service?

- A. All the KPIs in a service use the same base search.
- B. All the metrics in a base search are used by one service.
- C. A base search can only be used by its service and all dependent services.
- **D. Base searches can be used for multiple services.**

Answer: D

Explanation:

KPI base searches let you share a search definition across multiple KPIs in IT Service Intelligence (ITSI). Create base searches to consolidate multiple similar KPIs, reduce search load, and improve search performance.

Reference:

A base search is a search definition that can be shared across multiple KPIs that use the same data source. Base searches can improve search performance and reduce search load by consolidating multiple similar KPIs. The statement that accurately describes base searches used for KPIs in a service is:

A) Base searches can be used for multiple services. This means that you can create a base search for a service and use it for other services that have similar data sources and KPIs. For example, if you have multiple services that monitor web server performance, you can create a base search that queries the web server logs and use it for all the services that need to calculate KPIs based on those logs.

NEW QUESTION # 86

What is the range for a normal Service Health score category?

- A. 40-60
- B. 60-80
- **C. 80-100**
- D. 20-40

Answer: C

Explanation:

In Splunk IT Service Intelligence (ITSI), the Service Health Score is a metric that provides a quantifiable measure of the overall health and performance of a service. The score ranges from 0 to 100, with higher scores indicating better health. The range for a normal Service Health score category is typically from 80 to 100. Scores within this range suggest that the service is performing well, with no significant issues affecting its health. This categorization helps IT and business stakeholders quickly assess the operational status of their services, enabling them to focus on services that may require attention or intervention due to lower health scores.

NEW QUESTION # 87

To use Adaptive Thresholding, what is the minimum requirement for a set of KPI data?

- A. 14 days old.
- B. 10 days old.
- **C. 7 days old.**
- D. 30 days old.

Answer: C

Explanation:

To utilize Adaptive Thresholding in Splunk IT Service Intelligence (ITSI), the minimum requirement for a set of Key Performance Indicator (KPI) data is that it must be at least 7 days old. Adaptive Thresholding uses historical data to dynamically adjust thresholds based on observed patterns and trends. Having a minimum of 7 days worth of data allows the system to analyze a sufficient amount of information to identify normal ranges and variances in KPI behavior, thereby setting more accurate and contextually relevant thresholds. This requirement ensures that the adaptive thresholds are based on a meaningful data set that reflects the typical operational conditions of the monitored services.

NEW QUESTION # 88

When in maintenance mode, which of the following is accurate?

- A. KPIs are shown in blue while in maintenance mode.
- B. Service health scores and KPI events are deleted until the window is over.
- C. Once the window is over, KPIs and notable events will begin to be generated again.
- D. Maintenance mode slots are scheduled on a per hour basis.

Answer: C

Explanation:

Reference:

A is the correct answer because when in maintenance mode, KPIs and notable events will begin to be generated again once the window is over. Maintenance mode is a feature of ITSI that allows you to temporarily suspend alerts and health score calculations for a service or an entity during planned maintenance or downtime. During maintenance mode, KPI searches still run, but the results are buffered until the window is over. Once the window is over, the buffered results are processed and alerts and health scores are generated if necessary. Reference: [Overview of maintenance windows in ITSI]

NEW QUESTION # 89

Which of the following is a characteristic of notable event groups?

- A. Notable event groups combine independent notable events.
- B. Notable event groups allow users to adjust threshold settings.
- C. All of the above.
- D. Notable event groups are created in the `itsi_tracked_alerts` index.

Answer: A

Explanation:

In Splunk IT Service Intelligence (ITSI), notable event groups are used to logically group related notable events, which enhances the manageability and analysis of events:

A). Notable event groups combine independent notable events: This characteristic allows for the aggregation of related events into a single group, making it easier for users to manage and investigate related issues. By grouping events, users can focus on the broader context of an issue rather than getting lost in the details of individual events.

While notable event groups play a critical role in organizing and managing events in ITSI, they do not inherently allow users to adjust threshold settings, which is typically handled at the KPI or service level.

Additionally, while notable event groups are utilized within the ITSI framework, the statement that they are created in the `'itsi_tracked_alerts'` index might not fully capture the complexity of how event groups are managed and stored within the ITSI architecture.

NEW QUESTION # 90

.....

The SPLK-3002 learning materials are of high quality, mainly reflected in the adoption rate. As for our SPLK-3002 exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our SPLK-3002 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our SPLK-3002 Quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our SPLK-3002 exam question is 99%. So our SPLK-3002 study guide is a good choice for you.
