Answer: C

NEW QUESTION # 149

Identify the task that the seeded Warehouse Operator role can perform

- A. monitor and release sales orders for picking in the warehouse
- **B. search for a pick slip and confirm it**
- C. process and confirm outbound shipments
- D. generate outbound shipping documentation
- E. generate pick slips for picking material for outbound material movement

Answer: B

Explanation:

The warehouse operator does the following work:

Pick loads, including monitoring and performing the picking activity, and create pick slips for outbound shipments, replenishment, and requisition.

Search for a pick slip and confirm the pick slip in a single action.

NEW QUESTION # 150

Your company moves material between warehouses within the enterprise. The warehouse user creates a Transfer Order document to perform these material transfers. To fulfill demands for customer Sales Orders, the warehouse user needs visibility of both the Transfer Orders and the Sales Orders.

What configuration is required?

- A. Create a Pick wave release rule.
- B. Create a Release Sequence rule.
- **C. Update the Manage Supply executing document creation rule.**
- D. Update the Supply Order defaulting and enrichment rule.
- E. Create a Pick slip grouping rule.

Answer: C

Explanation:

The Manage Supply executing document creation rule is the configuration that is required to enable the warehouse user to have visibility of both the Transfer Orders and the Sales Orders. This rule determines the type of supply order that is created for each demand line, such as a transfer order, a purchase order, or a work order. You can update this rule to specify the conditions and actions for creating transfer orders for internal material transfers between warehouses¹. You can also use this rule to combine visibility of internal and external orders by sending transfer orders to Oracle Order Management Cloud².

NEW QUESTION # 151

Your client, a furniture retailer, wants their online customers to first choose their primary need, which will then direct them to a related list of accessories and product components of the configurable furniture product.

Your client plans to achieve this by first presenting predefined questions to online customers, and then based on their needs, present them with the related list of accessories and parts through dynamic user interfaces.

What configuration must you implement to achieve this requirement?

- A. Add a supplemental structure to the option classes of the item-based model in the workspace area of the Configurator.
- **B. Add a supplemental structure to the root node of the item-based model in the workspace area of the Configurator.**
- C. Add a supplemental structure at the option class level for each model product in Fusion Product Hub, and then import it

into the Configurator.

- D. Add a supplemental structure to the root node of the item-based model in Fusion Product Hub, and then import it into the Configurator.

Answer: B

Explanation:

Add a supplemental structure to the root node of the item-based model in the workspace area of the Configurator.

A supplemental structure is a set of predefined questions that you can use to guide customers through the configuration process. You can add a supplemental structure to the root node of the item-based model in the workspace area of the Configurator, and then associate it with a dynamic user interface. This way, the Configurator will display the questions to the customers before showing them the list of accessories and parts that match their needs1.
