

# 100% Pass Quiz 2026 Marvelous Fortinet FCSS\_NST\_SE-7.6 Exam Registration

BONUS!!! Download part of ActualTorrent FCSS\_NST\_SE-7.6 dumps for free: <https://drive.google.com/open?id=1y1ZS68X5CJSVDjXAoqnfLFOw9bBELme4>

Fate is not an opportunity but a choice. As long as you choose our FCSS\_NST\_SE-7.6 exam materials, you will certainly do more with less. Your work efficiency will far exceed others. FCSS\_NST\_SE-7.6 practice guide has such effects because they have a lot of advantages. Not only our FCSS\_NST\_SE-7.6 Practice Braindumps can help you study the latest knowledge on the subject but also it will help you achieve the certification for sure so that you will get a better career.

FCSS\_NST\_SE-7.6 exam braindumps can prove your ability to let more big company to attention you. FCSS\_NST\_SE-7.6 exam guide will help you get a good job. FCSS\_NST\_SE-7.6 test prep can help you in a very short period of time to prove yourself perfectly and efficiently. With tens of thousands of our customers proved that, if you study with our FCSS\_NST\_SE-7.6 Exam Questions for twenty to thirty hours, then you will be more confident and capable to pass the FCSS\_NST\_SE-7.6 exam and get the according cetification.

## Fortinet FCSS\_NST\_SE-7.6 Exam Registration | Useful Fortinet FCSS\_NST\_SE-7.6 Well Prep: FCSS - Network Security 7.6 Support Engineer

The format name of Channel Partner Program FCSS\_NST\_SE-7.6 practice test questions is Fortinet PDF Questions file, desktop practice test software, and web-based practice test software. Choose the nay type of Channel Partner Program FCSS - Network Security 7.6 Support Engineer FCSS\_NST\_SE-7.6 Practice Exam Questions that fit your Fortinet FCSS\_NST\_SE-7.6 exam preparation requirement and budget and start preparation without wasting further time.

## Fortinet FCSS - Network Security 7.6 Support Engineer Sample Questions (Q18-Q23):

### NEW QUESTION # 18

Refer to the exhibit, which shows the output of a debug command.

Which two statements about the output are true? (Choose two.)

- A. The interlace is part of the OSPF backbone area.
- B. There are a total of five OSPF routers attached to the vorz4 network segment
- C. One of the neighbors has a router ID of 0.0.0.4.

- D. In the network connected to port4, two OSPF routers are down.

**Answer: A,B**

Explanation:

References:

FortiOS Admin Guide: OSPF, Debug Outputs

### NEW QUESTION # 19

Refer to the exhibit.

Which two observations can you make about the web filter traffic captured using the flow tool? (Choose two.)

- A. The firewall policy is configured with proxy-based inspection mode.
- B. The session is offloaded to the NPU.
- C. The web filter profile is configured with proxy-based inspection mode.
- D. The HTTPS port is mapped to 443 in the SSL/SSH Inspection Profile

**Answer: A,C**

Explanation:

Analyze the "Send to Application Layer" Message:

The most critical line in the debug output is: id=65308 ... func=av\_receive ... msg="send to application layer" Meaning: This message indicates that the FortiGate kernel is handing the packet over to a user-space daemon (specifically the WAD/Proxy process, indicated by av\_receive handlers) for deep inspection.

Implication: This behavior is the hallmark of Proxy-based inspection. In Flow-based inspection, the traffic is handled by the IPS engine (often within the kernel or via specific IPS handlers like ips\_measure), and you would not typically see a "send to application layer" message for standard web filtering.

Evaluate Option B (Firewall Policy Mode):

Since the traffic is being sent to the application layer proxy, the Firewall Policy controlling this traffic (Policy ID 1, as seen in Allowed by Policy-1) must be configured with Inspection Mode = Proxy. If it were Flow-based, the traffic would stay in the flow path. Thus, Option B is correct.

Evaluate Option C (Web Filter Profile Mode):

In FortiOS, when a firewall policy is set to Proxy-based inspection, the security profiles (like Web Filter) applied to that policy also operate in Proxy-based inspection mode. The presence of the av\_receive function confirms that the content inspection (Web Filter/AV) is being performed by the proxy engine. Thus, Option C is correct.

Why Option A is Incorrect (NPU Offload):

The output shows npu\_state=0x100. In the context of a flow trace where traffic is being "sent to application layer," this confirms the session is not fully offloaded to the NPU (Network Processor). Offloaded traffic (Fast Path) is handled by the hardware and would not generate these specific CPU-level debug logs for the payload inspection phase. The proxying process requires CPU intervention.

Why Option D is Incorrect (Port Mapping):

While valid protocol mapping is necessary for inspection, the specific debug output shown is a direct result of the Inspection Mode (Proxy vs. Flow). The observation of the traffic moving to the application layer is primarily caused by the policy and profile mode settings, making B and C the direct "observations" derived from the log data.

Reference:

FortiGate Troubleshooting (Debug Flow): "If the debug flow shows msg='send to application layer', it confirms the traffic is being handled by the proxy (WAD) for Proxy-based inspection."

### NEW QUESTION # 20

Which two statements about Security Fabric communications are true? (Choose two.)

- A. By default, the downstream FortiGate establishes a connection with the upstream FortiGate using TCP port 8013.
- B. FortiTelemetry and Neighbor Discovery both operate using TCP.
- C. The default port for Neighbor Discovery can be modified.
- D. FortiTelemetry must be manually enabled on the FortiGate interface.

**Answer: A,D**

### NEW QUESTION # 21

Exhibit.

Refer to the exhibit, which shows the output of get system ha status.

NGFW-1 and NGFW-2 have been up for a week.

Which two statements about the output are true? (Choose two.)

- A. If no action is taken, the primary FortiGate will leave the cluster because of the current sync status.
- B. If FGVM...649 is rebooted, FGVM...650 will become the primary and retain that role, even after FGVM...649 rejoins the cluster.
- C. If port 7 becomes disconnected on the secondary, both FortiGate devices will elect itself as primary.
- D. If a configuration change is made to the primary FortiGate at this time, the secondary will initiate a synchronization reset.

**Answer: B,C**

Explanation:

\* FortiGate HA Troubleshooting and Synchronization Guides

\* Fortinet Admin Guide: HA Primary Role Retention, Cluster Break-up Due to Out-of-Sync Status

### NEW QUESTION # 22

Refer to the exhibit, which shows the output of get router info ospf neighbor.

What can you conclude from the command output?

- A. The local FortiGate is not a DROther.
- B. The network type connecting the local Fortigate and OSPF neighbor 0.0.0.10 is point-to-point.
- C. The local FortiGate is the BDR.
- D. All neighbors are in area 0.0.0.0.

**Answer: B**

### NEW QUESTION # 23

.....

Maybe you are under tremendous pressure now, but you need to know that people's best job is often done under adverse circumstances. Ideological pressure, even physical pain, can be a mental stimulant. Turn pressure into power, which may be your chance to complete the transformation. But our FCSS\_NST\_SE-7.6 Exam Questions can help you become more competitive easier than you can imagine. With a pass rate of 98% to 100%, our FCSS\_NST\_SE-7.6 study materials can help you achieve your dream easily. And we have money back guarantee on our FCSS\_NST\_SE-7.6 practice guide.
