# Unparalleled H19-301_V4.0 Training Quiz: HCSA-Presales-IP Network V4.0 Carry You Outstanding Exam Dumps - PassExamDumps

Thousands of people will compete with you to get the H19-301_V4.0 certificate. You must feel scared and disappointed. Do not lose hope. Our study materials come to your help. We will enhance your knowledge about the H19-301_V4.0 exam. You just need to follow our H19-301_V4.0 Study Materials to prepare the exam. No extra reference books are needed. And our pass rate is proved by our worthy customers to be high as 98% to 100%. You will pass the exam easily with our H19-301_V4.0 practice braindumps.

One of the most important functions of our H19-301_V4.0 preparation questions are that can support almost all electronic equipment, including the computer, mobile phone and so on. If you want to prepare for your exam by the computer, you can buy the Software and APP online versions of our H19-301_V4.0 training quiz, because these two versions can work well by the computer. Moreover, the APP online version of our H19-301_V4.0 learning materials can also apply the IPAD, phone, laptop and so on.

Valid Test H19-301_V4.0 Tutorial - Examcollection H19-301_V4.0 Questions Answers

Once you start to become diligent and persistent, you will be filled with enthusiasms. Nothing can defeat you as long as you are optimistic. We sincerely hope that our H19-301_V4.0 study materials can become your new purpose. Our H19-301_V4.0 Exam Questions can teach you much practical knowledge, which is beneficial to your career development. And with the H19-301_V4.0 certification, you are bound to have a bighter future.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q56-Q61):

NEW QUESTION # 56
Huawei's hybrid cable 2.0 supports ultra-long-distance data transmission and power supply. The PoE+ power supply distance can be extended to 600 m.

- A. False
- B. True

Answer: B

Explanation:
Huawei Hybrid Cable 2.0 integrates power lines and optical fibers into a single cable. It supports PoE+ (IEEE 802.3at) and extends the PoE+ power supply distance up to 600 meters without using additional power modules.

This feature is especially valuable for outdoor AP deployments where conventional Ethernet cabling distances are limited (typically up to 100 m). Hybrid Cable 2.0 simplifies cabling and reduces infrastructure costs in remote deployment scenarios.

###

NEW QUESTION # 57

If only one firewall is deployed at the egress of the network, a failure on the firewall will affect services on the entire network. To improve network reliability, you can deploy two or more firewalls and set up a stack system. Member firewalls do not need to be managed independently. You only need to configure the stack system.

- A. False
- B. True

Answer: B

Explanation:
In Huawei firewall deployments (such as USG6000 series), using a single firewall at the network egress creates a single point of failure (SPOF).
To improve reliability, Huawei supports firewall stacking technology, called FW-Stack.
In a firewall stack, multiple firewalls form a single logical device.
Advantages of firewall stacking include:
Unified management: Only the stack system is configured and managed, not individual members.
Seamless failover: If a member firewall fails, services continue on other members.
Increased throughput: Aggregate performance of multiple firewalls.
This setup greatly enhances service continuity and improves network reliability without needing complex configuration across devices.

Huawei HCSA-IP Network V4.0 Study Guide, Chapter: "Huawei Network Security Products and Solutions", Section: "Firewall Reliability Solution (Stacking)" Huawei USG6000 V5 Firewall Product Documentation, Section: "Firewall Stacking Technology Overview"
##

NEW QUESTION # 58

In the latest-generation WPA3 encryption standard, the key length is 192 bits, making WPA3 more secure than WPA2.

- A. False
- B. True

Answer: B

Explanation:
WPA3 (Wi-Fi Protected Access 3) is the latest Wi-Fi security standard defined by the Wi-Fi Alliance. It enhances security compared to WPA2 by offering:
Mandatory use of SAE (Simultaneous Authentication of Equals), which replaces the less secure PSK (Pre- Shared Key).
Protection against dictionary attacks.
Enhanced encryption methods.
WPA3-Enterprise uses a 192-bit minimum-strength security suite, including 256-bit GCM encryption and 384- bit ECC key exchange, but the base definition references a minimum of 192-bit equivalent security strength.
This significantly enhances the robustness of wireless encryption and aligns with government and enterprise- grade security requirements.
Reference:
Huawei HCSA-IP Network V4.0 Study Guide, Chapter: "Huawei Campus WLAN Products and Solutions", Section: "Wi-Fi Security Technologies" Wi-Fi Alliance WPA3 Specification Overview
###

NEW QUESTION # 59

Huawei's NetEngine 8000 series access routers support an operating temperature ranging from -40°C to +65° C and can be installed in outdoor cabinets.

- A. False
- **B. True**

Answer: B

Explanation:
NetEngine 8000 series access routers, particularly those designed for edge and access scenarios, support:
Wide temperature operation from -40°C to +65°C
Fanless or rugged designs for harsh environments
Deployment in outdoor cabinets and remote edge locations
This ruggedization supports reliable operation in extreme field conditions.

NEW QUESTION # 60

Which of the following are among the six comprehensive border security protection capabilities? (Select all that Apply)

- **A. IPS**
- **B. Antivirus**
- **C. Remote URL filtering**
- **D. Built-in firewall**
- E. Data encryption
- **F. Application-level ACL**

Answer: A,B,C,D,F

Explanation:
Huawei's six comprehensive border security protection capabilities for SD-WAN or converged gateway routers typically include:
Built-in Firewall - Provides basic packet filtering and security zoning.
Remote URL Filtering - Uses cloud-based services to filter harmful websites.
Antivirus - Detects and blocks malicious files.
IPS (Intrusion Prevention System) - Detects and blocks known threats and attack signatures.
Application-level ACL - Allows granular control of applications beyond Layer 4 (e.g., blocking TikTok, WhatsApp, etc.).
Data leakage prevention (DLP) and behavioral analytics may also be included depending on the security license.
However, "Data encryption" is a broader category not specifically named among the six security protection items in Huawei's SD-WAN documentation. Encryption (e.g., IPsec VPN) is used for secure tunnels but is not listed as one of the six application-layer protections.
