It must be your best tool to pass your exam and achieve your target.

SAP Certified Associate - Security Administrator Sample Questions (Q35-Q40):

NEW QUESTION # 35

In SAP S/4HANA Cloud Public Edition, what does the ID of an SAP-predefined Space refer to?

- A. The software release it was created for
- B. The SAP Fiori applications it was defined for
- C. The business roles it is to be assigned to
- D. The business area it was designed for

Answer: D

NEW QUESTION # 36

What authorization object can be used to restrict which users a security administrator is authorized to maintain?

- A. S_USER_GRP
- B. S_USER_GRD
- C. S_USER_SAS
- D. S_USER_AUT

Answer: A

Explanation:

In SAP systems, the authorization object S_USER_GRP is used to restrict which users a security administrator can maintain. This object controls access to user master records based on user groups, allowing administrators to manage only users assigned to specific groups. For example, by assigning a user group value in the S_USER_GRP object, an administrator's ability to create, change, or delete user accounts is limited to those within the specified group, enhancing segregation of duties and security. This is particularly useful in large organizations where different administrators are responsible for distinct sets of users. The other options are incorrect: S_USER_SAS is related to system administration services, S_USER_GRD does not exist in standard SAP, and S_USER_AUT is used for authorizing the creation of authorizations in roles, not user maintenance. By leveraging S_USER_GRP, SAP ensures granular control over user management tasks, preventing unauthorized access to sensitive user data and maintaining compliance with security policies. This object is integral to the SAP authorization concept, ensuring that user administration is both secure and efficient.

NEW QUESTION # 37

What can be assigned directly to a user when using the SAP Launchpad service in SAP BTP?

- A. Launchpad roles
- B. Catalogs
- C. Spaces
- D. Role collections

Answer: A

Explanation:

In the SAP Launchpad service in SAP Business Technology Platform (BTP), users can be assigned Launchpad roles directly. These roles define the permissions and functionalities available to the user within the Launchpad.

SAP Security References:

- * SAP Launchpad Service User Guide
- * SAP BTP Role Management Documentation

NEW QUESTION # 38

In SAP S/4HANA Cloud Public Edition, which of the following can you change in a derived business role if the "Inherit Spaces in Derived Business Roles" checkbox is NOT selected in the leading business role?

- A. Restrictions
- B. Pages
- C. Business Catalogs
- D. Business Role Template

Answer: C

NEW QUESTION # 39

In S/4HANA on-premise, which of the following combinations is required to grant a business user access to data from a Core Data Services (CDS) view using the standard ABAP authorization concept and authorization object S_RS_AUTH?

- A.
- B.
- C.
- D.

Answer: B

NEW QUESTION # 40

.....
