PCED-30-02 Latest Exam Experience | Real PCED-30-02 Exam Questions

Our PCED-30-02 exam questions are compiled by experts and approved by the professionals with years of experiences. The language is easy to be understood which makes any learners have no obstacles and our PCED-30-02 guide torrent is suitable for anyone. The content is easy to be mastered and has simplified the important information. Our PCED-30-02 test torrents convey more important information with less questions and answers and thus make the learning relaxing and efficient. With our PCED-30-02 exam questions, you will pass the PCED-30-02 exam with ease.

Python Institute PCED - Certified Entry-Level Data Analyst with Python Sample Questions (Q16-Q21):

NEW QUESTION # 16

A financial technology company is reviewing its data practices to ensure legal and ethical compliance.

Which of the following actions would support responsible data handling and align with regulations like GDPR, HIPAA, and CCPA? (Choose two.)

- A. Automatically opting users into data sharing unless they manually change settings.
- B. Limiting data access only to marketing staff to streamline personalization.
- C. Retaining user data permanently unless users explicitly request deletion.
- **D. Providing users with a clear explanation of how their data is used and obtaining explicit consent.**
- **E. Implementing encryption for both stored and transmitted customer data.**

Answer: D,E

Explanation:

Encrypting stored and transmitted data protects sensitive information from unauthorized access and supports regulatory requirements for data security. Providing clear explanations of data usage and obtaining explicit consent ensures transparency and aligns with core principles of data protection regulations such as lawful processing and user rights.

NEW QUESTION # 17

A script defines a variable `x = None` and checks its truth value using a conditional statement. The developer wants to understand how Python evaluates `None` in Boolean contexts. What will `bool(x)` return?

- A. Error
- **B. False**
- C. True
- D. None

Answer: B

Explanation:

The value `None` represents the absence of a value and is treated as `False` in Boolean expressions. Therefore, calling `bool(None)` returns `False`, similar to empty containers or zero values.

NEW QUESTION # 18

You are given a short Python script that uses both arithmetic and assignment operators. The variable `x` is initialized as 4, then updated using `x *= 2 + 3`. What will be printed when the final value of `x` is displayed?

- A. 0
- **B. 1**
- C. 2
- D. 3

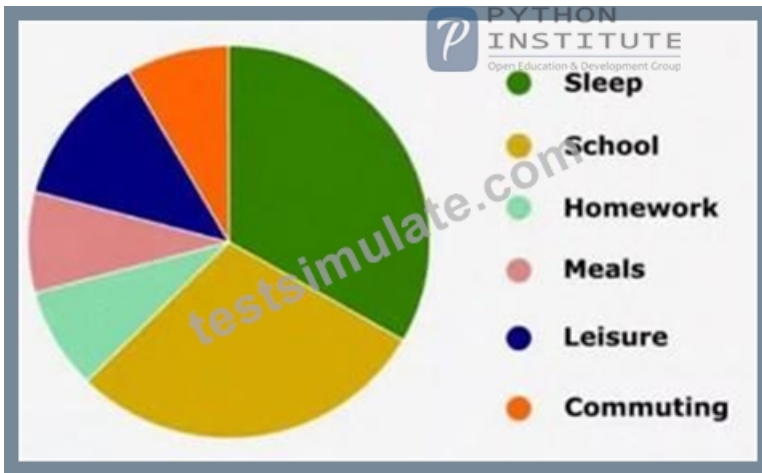

Answer: B

Explanation:

Python evaluates the addition first because of operator precedence. The expression `2 + 3` equals 5, then `x *= 5` multiplies the current value of `x` (4) by 5, resulting in a final value of 20.

NEW QUESTION # 19

The following chart shows how a student spends 24 hours in a day:

Which statements are most accurate? (Choose two.)

- A. More time is spent commuting than on leisure.
- B. School and homework together take up half of the day's time.
- C. Leisure and meals combined equal the time spent at school.
- D. Leisure accounts for a moderate portion of the student's daily schedule, larger than commuting but smaller than the time spent at school.
- E. Sleep and school take up the majority of time in a day.
- F. Commuting is the second most time-consuming activity.

Answer: D,E

NEW QUESTION # 20

You have collected sales data and want to compute the average using the NumPy library. Which option correctly shows how to install NumPy and use it in your code to perform this task?

- A. To install NumPy:

```
from pip install numpy
```

 Then run this code:

```
import numpy as np
data = np.array([10, 20, 30])
print(np.mean(data))
```
- B. To install NumPy:

```
pip install numpy
```

 Then run this code:

```
import numpy as np
data = numpy.arr([10, 20, 30])
print(numpy.mean(data))
```
- C. To install NumPy:

```
pip install numpy as np
```

 Then run this code:

```
import np
data = np.array([10, 20, 30])
print(np.mean(data))
```

Answer: A

Explanation:

NumPy is installed with `pip install numpy`, then imported with `import numpy as np`. After that, you can create an array and compute the mean using `np.array(...)` and `np.mean(...)`.

NEW QUESTION # 21

.....

If you are worried about your PCED-30-02 real exam and you are not prepared so, now you don't need to take any stress about it. Get most updated Python Institute dumps torrent with 100% accurate answers. Our website is considered one of the best website where you can save extra money by getting one-year of free updates after buying the PCED-30-02 Dumps PDF files.

PCED-30-02 Latest Exam Experience: <https://www.testsimulate.com/PCED-30-02-study-materials.html>

Many candidates write email to us that they bought PCED-30-02 exam preparation from other provider but after they purchase, there is no any reply from the provider, and they can't get any support about new PCED-30-02 dumps torrent, For example, have you taken Python Institute PCED-30-02 certification exam?
