Full fill Your Goals by Achieve the NICET ITFAS-Level-1 Certification

The Actualtests4sure offers latest Inspection and Testing of Fire Alarm Systems Level I Exam ITFAS-Level-1 exam questions and

answers, with NICET ITFAS-Level-1 exam practice test questions you can ace your NICET ITFAS-Level-1 exam preparation simply and quickly and pass the final ITFAS-Level-1 Exam easily. The NICET ITFAS-Level-1 exam practice test questions will assist you in NICET ITFAS-Level-1 exam preparation.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

In the event of power loss, how long shall a secondary power source for household fire alarm systems maintain operation?

- A. 24 hours in the normal condition followed by 4 minutes of alarm
- B. 24 hours in the normal condition followed by 60 minutes of alarm
- **C. 24 hours in the normal condition followed by 10 minutes of alarm**
- D. 24 hours in the normal condition followed by 9 minutes of alarm

Answer: C

Explanation:

Household fire alarm systems have different performance requirements from commercial systems, but still must support essential alarm functions under loss of primary power.

NFPA 72 (2022), Section 29.10.5.1.1:

"The secondary power supply shall be capable of powering the system under quiescent load for 24 hours and then capable of operating the system during alarm for a period of 4 minutes (for general fire alarm) or 10 minutes (for household fire alarm systems)."

Correct answer: C. 24 hours in the normal condition followed by 10 minutes of alarm

NEW QUESTION # 38

Which of the following is the inspection frequency of the candela rating of visible appliances?

- A. Initial acceptance and quarterly
- **B. Initial acceptance and if a malfunction occurs**
- C. Initial acceptance and semiannually
- D. Initial acceptance and no further inspections

Answer: B

Explanation:

Candela ratings are visually confirmed during initial acceptance. Further inspection is required only if a device malfunction occurs or a reacceptance test is performed.

NFPA 72 (2022), Section 18.5.5.7:

"The candela rating shall be verified at initial acceptance and when there is reason to believe the device is not operating properly."

NEW QUESTION # 39

An abnormal condition where a system, component, or function is out of order, and the condition can result in the system or unit not functioning when required is called which of the following terms?

- A. Operational
- B. Supervisory
- C. Intermittent
- **D. Impairment**

Answer: D

Explanation:

An impairment is a formal condition defined in NFPA 72 when a system or portion of it is not functional and may fail during an emergency. This is a critical safety concern.

NFPA 72 (2022), Section 3.3.149 - Impairment (Fire Alarm Systems):

"A condition where a fire protection or life safety system or a portion thereof is out of service." Also supported by Section 10.21.1: Which details handling of system impairments and the need for proper management, notification, and restoration.

Correct answer: A. Impairment

NEW QUESTION # 40

Within what time limit shall a sprinkler waterflow alarm-initiating device activate?

- A. 90 seconds
- B. 180 seconds
- **C. 120 seconds**
- D. 100 seconds

Answer: C

Explanation:

NFPA 72 defines a time requirement for how quickly a waterflow switch must respond when a sprinkler system activates. The waterflow initiating device (typically a paddle-type switch) must send an alarm within 90 seconds, but the system may have a retard delay of up to 90 seconds, making the total allowable time 120 seconds.

NFPA 72 (2022), Section 17.13.2:

"Waterflow alarm-initiating devices shall be set to operate within 90 seconds after the flow begins. Retard devices shall not delay the signal more than an additional 90 seconds." Thus, the maximum total activation time is:

90 seconds operation + 90 seconds retard = 120 seconds max

Correct answer: C. 120 seconds

NEW QUESTION # 41

When the main power is disconnected, how long should a power supply with emergency voice communication systems work in alarm mode?

- **A. Minimum of 15 minutes**
- B. Minimum of 5 minutes
- C. Maximum of 5 minutes
- D. Maximum of 15 minutes

Answer: A

Explanation:

Emergency voice/alarm communication systems must continue functioning after a loss of primary power for a minimum of 24 hours in standby, followed by 15 minutes of alarm operation.

NFPA 72 (2022), Section 10.6.7.2.1.1 (Exception):

"...followed by 15 minutes of alarm for emergency voice/alarm communication systems." This ensures that occupants can still hear evacuation messages even during a power outage.

Correct answer: D. Minimum of 15 minutes

NEW QUESTION # 42

.....

There is no need to worry about failure when you already have the most probable Inspection and Testing of Fire Alarm Systems Level I Exam (ITFAS-Level-1) questions in the Cert2Pass PDF document. All you need is to stay positive, put in your best efforts, and be confident while appearing for the NICET ITFAS-Level-1 Exam. Laptops, smartphones, and tablets support the PDF format.
