C-S4CPB-2502 : SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition dumps & SAP C-S4CPB-2502 test-king

Our company has authoritative experts and experienced team in related industry. To give the customer the best service, all of our company's C-S4CPB-2502 learning materials are designed by experienced experts from various field, so our C-S4CPB-2502 Learning materials will help to better absorb the test sites. One of the great advantages of buying our product is that can help you master the core knowledge in the shortest time. At the same time, our C-S4CPB-2502 learning materials discard the most traditional rote memorization methods and impart the key points of the qualifying exam in a way that best suits the user's learning interests, this is the highest level of experience that our most authoritative think tank brings to our C-S4CPB-2502 Learning Materials users. Believe that there is such a powerful expert help, our users will be able to successfully pass the qualification test to obtain the qualification certificate.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which embedded support offerings can you make use of in the SAP Fiori Launchpad? Note: There are 3 correct answers to this question.

- A. Digital assistance from generative AI (SAP Joule)
- B. Video tutorials from the SAP Help Portal
- C. Recorded system simulations from the Learning Center
- D. Recorded webinars from the SAP Learning Website
- E. Assessment questions from the SAP Learning Hub

Answer: A,B,C

Explanation:

The SAP Fiori Launchpad provides embedded support offerings that can help users learn and perform tasks more efficiently. These offerings include:

- * Digital assistance from generative AI (SAP Joule): This is a conversational AI assistant that can answer user questions, provide guidance, and execute tasks using natural language. SAP Joule can be accessed by selecting the headphones icon in the top right corner of the SAP Fiori Launchpad and choosing the chat option.
- * Recorded system simulations from the Learning Center: These are interactive tutorials that show users how to perform common tasks and scenarios in the SAP S/4HANA Cloud system. Users can access the simulations by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the graduation cap icon. The simulations are created with the SAP Enable Now tool and can be customized by customers if needed.
- * Video tutorials from the SAP Help Portal: These are short videos that explain the features and functionalities of the SAP S/4HANA Cloud system and the SAP Fiori Launchpad. Users can access the videos by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the megaphone icon. The videos are also available on the SAP Help Portal website.

The other options are not embedded support offerings in the SAP Fiori Launchpad. Recorded webinars from the SAP Learning Website and assessment questions from the SAP Learning Hub are external learning resources that users can access separately from the SAP Fiori Launchpad. NEW QUESTION # 59

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Partner project manager
- B. Customer system admin
- C. Partner lead configuration expert
- D. Customer project manager

Answer: B

NEW QUESTION # 60

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Private Cloud
- B. Platform as a Service
- C. On premise
- D. Software as a Service
- E. Infrastructure as a Service

Answer: A,B,C

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

- * Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.
- * On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 61

Through which component do you access your assigned process tasks from the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape)?

- A. SAP Cloud ALM for Service
- B. SAP Cloud ALM for Operations
- C. SAP Cloud ALM for Implementation
- D. SAP Central Business Configuration

Answer: D

NEW QUESTION # 62

Where are the manual test cases created for customer User Acceptance Testing?

- A. SAP Solution Manager
- B. SAP Signavio Process Navigator
- C. SAP Cloud ALM
- D. Test Automation Tool

Answer: C
