## Salesforce Health Cloud Accredited Professional Sample Questions (Q90-Q95):

### NEW QUESTION # 90

Which two data exchange standards support clinical data in Health Cloud?  
Choose 2 answers

- A. HL7 v2
- B. DICOM 3.0
- C. SDTM v3.2
- D. FHIR R4

**Answer: A,D**

Explanation:

Step-by-Step Explanation:

Supported Data Exchange Standards:

Health Cloud natively supports modern clinical data standards such as FHIR R4 and traditional messaging formats like HL7 v2 for interoperability and data exchange.

Exact Extract:

"Health Cloud supports industry standards for data exchange, including FHIR R4 and HL7 v2, to enable clinical interoperability with EHR systems and other healthcare platforms." Reference:

Why Not Other Options?

DICOM 3.0: Used for imaging, not clinical data exchange in Health Cloud.

SDTM v3.2: Used for clinical trials data, not general patient/clinical data exchange in Health Cloud.

Conclusion:

FHIR R4 and HL7 v2 are the two standards officially supported for clinical data in Health Cloud.

### NEW QUESTION # 91

An external provider wants to get a patient's allergy information from Bloomington Caregivers' Health Cloud system.

Which Health Cloud API should a consultant recommend?

- **A. Q Interoperability API**
- B. Patient Healthcare API
- C. AllergyMedication API
- D. Clinical Summary Healthcare API

**Answer: A**

Explanation:

Step-by-Step Explanation:

Requirement:

External provider needs access to patient allergy information.

Interoperability API:

Salesforce Health Cloud provides FHIR-based Interoperability APIs that expose clinical data, including AllergyIntolerance resources.

"Use the Health Cloud Interoperability API (FHIR R4) to retrieve AllergyIntolerance resources and other clinical data for a patient."

- Health Cloud Interoperability API Guide

Other Options:

Clinical Summary Healthcare API: Provides a summary but not structured, granular allergy data.

AllergyMedication API: Not a standard Salesforce API.

Patient Healthcare API: Broader resource, but allergies specifically are available through the Interoperability API.

Reference:

Health Cloud Interoperability API Guide

### NEW QUESTION # 92

Bloomington Caregivers needs to use the objects for the Clinical data model as part of its new Health Cloud implementation.

Which preference should Bloomington Caregivers' administrator ensure is enabled?

- A. Clinical R4 Model org preference
- **B. FHIR-Aligned Data Model org preference**
- C. FHIR-Aligned EHR Data Model org preference
- D. Clinical Data Model org preference

**Answer: B**

### NEW QUESTION # 93

A customer that already has Service Cloud is onboarding a new business unit, which needs to use Health Cloud.

Which three organization-wide default settings should an administrator change to ensure the original business unit that leverages Service Cloud does not have visibility into protected health information (PHI)?

Choose 3 answers

- **A. Set Health Details to Controlled by Parent or Private.**

- B. Set Account and Contract to Private.
- C. Set Person Accounts to Private,
- D. Set related clinical objects to Controlled by Parent or Private.
- E. Set Contact to Controlled by Parent.

**Answer: A,C,D**

Explanation:

When onboarding Health Cloud into an org that already uses Service Cloud, it's critical to properly configure Organization-Wide Defaults (OWD) to ensure that protected health information (PHI) remains restricted.

The correct settings are:

A . Set Person Accounts to Private

Patients are modeled as Person Accounts in Health Cloud.

Setting Person Accounts to Private ensures PHI isn't exposed to users outside the Health Cloud business unit.

B . Set related clinical objects to Controlled by Parent or Private

Clinical objects (e.g., Care Plans, Assessments, Referrals) often relate to patients.

Making them Controlled by Parent (Person Account) or Private ensures only authorized users can see PHI.

E . Set Health Details to Controlled by Parent or Private

Health Details contain sensitive clinical data.

Must be restricted at the OWD level to prevent exposure to non-Health Cloud users.

Why not the others?

C . Set Account and Contract to Private

Regular business Accounts/Contracts are part of Service Cloud, not typically where PHI resides. Restricting them isn't required for PHI protection.

D . Set Contact to Controlled by Parent

Contacts in Health Cloud are often caregivers or providers, not patients (who are Person Accounts).

PHI protection centers around Person Accounts + Clinical Objects + Health Details, not Contacts.

Salesforce Health Cloud Reference:

Salesforce Health Cloud Security and Sharing Guide:

"For HIPAA and other PHI compliance, set Person Accounts and Health Cloud clinical objects to Private or Controlled by Parent."

"Ensure Health Details are not exposed via default sharing."

#### NEW QUESTION # 94

Prior to go-live for Bloomington Caregivers, a consultant loads the future system users into Salesforce.

Which two permission set licenses should the consultant assign to the users to give them access to Health Cloud?

Choose 2 answers

- A. Health Cloud Standard permission set license
- B. Health Cloud Foundation permission set license
- C. Health Cloud permission set license
- D. Health Cloud Platform permission set license

**Answer: C,D**

#### NEW QUESTION # 95
