## C\_WME\_2506考古題 & C\_WME\_2506測試

隨著C\_WME\_2506考試的變化，NewDumps已經跟新了考試問題和答案，包括一些新增的問題，通過使用更新版本的SAP C\_WME\_2506考古題，您可以輕鬆快速的通過考試，還節約寶貴的時間。獲得C\_WME\_2506認證之後，您的職業生涯也將開始新的輝煌時期。購買我們的SAP C\_WME\_2506題庫資料可以保證考生一次性通過考試，這是值得大家信賴的題庫網站，可以幫大家減少考試成本，節約時間，是上班族需要獲取C\_WME\_2506認證的最佳選擇。

## SAP C\_WME\_2506 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.</li></ul>

主題 2	<ul style="list-style-type: none"> <li>Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.</li> </ul>
主題 3	<ul style="list-style-type: none"> <li>Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.</li> </ul>

## 最新的 SAP Certified Associate C\_WME\_2506 免費考試真題 (Q36-Q41):

### 問題 #36

When adding new users to an account on a platform, admins must select their permission levels. The company gets a lot of support tickets about users asking what each permission level means or asking to adjust permission levels because they were set up incorrectly. The company already has a help article that lists out all of the permission level definitions, but it isn't used often. Which of these options would be the best solution to create with WalkMe?

- A. Launcher next to the field that activates a Resource
- B. Smart Walk-Thru navigating users to the help Resource
- C. Validation SmartTip
- D. ShoutOut every time admins begin adding a new user

答案: A

### 解題說明:

The issue is that admins frequently submit support tickets due to confusion about permission levels, despite an existing help article. The best WalkMe solution is a Launcher next to the field that activates a Resource, which links directly to the help article. This approach provides context-sensitive access to the documentation exactly where admins need it—near the permission level field—encouraging its use and reducing support tickets without disrupting the workflow.

The other options are less effective:

- \* ShoutOut every time admins add a user(A) is intrusive and not directly tied to the permission field.
- \* Validation SmartTip(B) is for enforcing input rules, not linking to help content.
- \* Smart Walk-Thru to the help Resource(C) is overly complex for simply accessing documentation.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.3: Launchers): "Launchers placed next to form fields can activate Resources, such as help articles, providing instant access to relevant documentation to reduce user errors and support tickets." The course Getting Started with Building WalkMe Solutions states: "For underutilized help content, place a Launcher near the relevant field to trigger a Resource, ensuring users access guidance in context to resolve confusion efficiently." Option D is the best solution to reduce support tickets by leveraging the existing help article.

### References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.3: Launchers.

Course: Getting Started with Building WalkMe Solutions, Module 11: Reducing Support Tickets.

### 問題 #37

You're getting ready to plan your next build. What data/section in Insights can you use to help you determine which content your end users may need you to build next?

- A. Activity Log
- B. Text and Multilanguage
- C. What Users Are Searching For
- D. Total Menu Opens

答案: C

解題說明:

The WalkMe Insights platform is designed to provide actionable data to optimize digital adoption by identifying user behavior and content needs. The "What Users Are Searching For" section in Insights specifically tracks search terms entered by end users in the WalkMe Menu, revealing what content or guidance they are seeking. This data is critical for planning future builds because it highlights gaps in existing content or areas where users need additional support. For example, if many users search for "profile settings" but find no relevant content, this indicates a need to build guidance for that process.

In the context of the question, "What Users Are Searching For" directly informs the WalkMe Builder about user pain points and content demands, unlike the other options:

\* Total Menu Open shows how often the WalkMe Menu is accessed, not what users are looking for.

\* Activity Log provides a record of user interactions with WalkMe content but doesn't specifically highlight search behavior or content needs.

\* Text and Multilanguage relates to content localization settings, not user behavior or content planning.

Extract from Official WalkMe Documentation:

According to the WalkMe Insights User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 3.2: Analytics and Reporting):

"The 'What Users Are Searching For' report in Insights displays the search terms entered by end-users in the WalkMe Menu, along with metrics such as the percentage of searches resulting in no action. This report helps Builders identify content gaps and prioritize new builds based on user demand." Additionally, the course *Advancing Your Skills in Building WalkMe Solutions* emphasizes: "Leveraging Insights data, particularly the 'What Users Are Searching For' section, enables Builders to align content creation with user needs, ensuring proactive digital adoption support." This confirms that option C is the correct choice, as it directly correlates with determining future content needs based on user search behavior.

Course: *Advancing Your Skills in Building WalkMe Solutions*, Module 4: Using Insights for Content Planning.

### 問題 #38

Your company has a reporting page with features that have always been available. They recently added the ability for users to create their own reports. Not everyone uses the reporting tools, but they want to announce the new report creation feature for those who do use it. They will use a ShoutOut for this and only want to show it to users who use the tool. Under the ShoutOut's engagement tab, which auto-play option would be best?

- A. Off (activate via a launcher)
- B. Play once a day
- C. Auto-play
- D. Play according to a rule

答案: D

解題說明:

To target a ShoutOut to users who actively use the reporting tools, the best approach is to use the *Play according to a rule* option in the ShoutOut's engagement tab. This allows Builders to define a segmentation rule (e.g., based on user behavior, such as having accessed the reporting page) to ensure the ShoutOut only appears to the relevant audience. This targeted approach avoids annoying non-users and maximizes the announcement's effectiveness for the intended group.

The other options are less suitable:

\* Auto-play (B) displays the ShoutOut to all users on page load, regardless of their interaction with the reporting tools.

\* Play once a day (C) also lacks targeting and may show to irrelevant users.

\* Off (activate via a launcher) (D) requires manual user action, which may reduce visibility for the announcement.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.9: ShoutOuts):

"The 'Play according to a rule' option in the ShoutOut engagement tab allows targeting specific user segments based on behavior or attributes, ensuring relevant delivery of announcements." The course *Getting Started with Building WalkMe Solutions* explains: "For announcements like new feature releases to specific user groups, use 'Play according to a rule' to segment the audience, such as users who have interacted with a particular tool." Option A is the best auto-play option for this targeted ShoutOut.

### 問題 #39

Which of the following is a way to initiate a Smart Walk-Thru? Note: There are 3 correct answers to this question.

- A. Survey
- B. Builder Assistant
- C. Auto-play
- D. Activate from the Menu
- E. Normalink

答案: C,D,E

解題說明:

Smart Walk-Thrus can be initiated in several ways to guide users through processes. The correct methods include:

\* Normalink(A): A Normalink is a URL-based trigger that starts a Smart Walk-Thru when a user accesses a specific link or page.

\* Auto-play(D): Auto-play initiates a Smart Walk-Thru automatically based on predefined rules, such as page load or user segmentation.

\* Activate from the Menu(E): Users can start a Smart Walk-Thru by selecting it from the WalkMe Menu.

The other options are incorrect:

\* Builder Assistant(B) is a tool for creating content, not initiating Smart Walk-Thrus.

\* Survey(C) collects user feedback but cannot trigger a Smart Walk-Thru directly.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2:

Smart Walk-Thrus):

"Smart Walk-Thrus can be initiated via Normalinks (URL-based triggers), Auto-play (rule-based automatic start), or user selection from the WalkMe Menu, providing flexible options to engage users." The course Advancing Your Skills in Building WalkMe Solutions states:

"Configure Smart Walk-Thrus to start through Normalinks for direct access, Auto-play for automated guidance, or Menu activation for user-driven initiation, depending on the use case." Options A, D, and E are valid ways to initiate a Smart Walk-Thru.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2: Smart Walk-Thrus.

WalkMe Editor User Guide, "Initiating Smart Walk-Thrus" Section.

Course: Advancing Your Skills in Building WalkMe Solutions, Module 6: Smart Walk-Thru Triggers.

### 問題 #40

You are analyzing your Smart Walk-Thru steps and see significant drop-off following a Wait For step.

What should you investigate to try to get to the root of the issue?

- A. Remove the step completely.
- B. Look at your Wait For condition rules.
- C. Update your step triggers.
- D. Look at your Smart Walk-Thru step initiators.

答案: B

### 問題 #41
