HPE7-A01 Braindump Free | HPE7-A01 New Test Materials

P.S. Free & New HPE7-A01 dumps are available on Google Drive shared by Itcertkey: https://drive.google.com/open?id=1dZrGck_xlha9deNYG4AUQfsjOaffc6E9

If you feel nervous in the exam, and you can try us, we will help you relieved your nerves. HPE7-A01 Soft test engine can stimulate the real exam environment, so that you can know the procedure for the exam, and your confidence for the exam will also be strengthened. In addition, HPE7-A01 exam materials are high quality and accuracy, and we can help you pass the exam just one time if you choose us. We have online and offline chat service stuff, and if you have any questions about HPE7-A01 Exam Dumps, just contact us, we will give you reply as soon as possible.

HP HPE7-A01 Exam is intended for individuals who want to enhance their skills in designing and deploying wireless networks using Aruba products and technologies. Aruba Certified Campus Access Professional Exam certification program offers a comprehensive curriculum that prepares candidates to handle different scenarios and challenges that may arise in the process of deploying and managing wireless networks.

HPE7-A01 exam covers a range of topics related to Aruba networks, including network architecture, security, troubleshooting, and wireless technologies. HPE7-A01 exam also covers the installation and configuration of Aruba devices, as well as the integration of Aruba products with other networking technologies. Candidates will be required to demonstrate their understanding of these concepts through a combination of multiple-choice and scenario-based questions.

The ACCP certification validates the knowledge and skills required to design, implement, and manage Aruba wireless networks in enterprise environments. It demonstrates that the certified professional has a deep understanding of Aruba wireless products and technologies, as well as the ability to troubleshoot and optimize Aruba wireless networks.

HPE7-A01 New Test Materials, Valid Exam HPE7-A01 Practice

We provide free demo for you to have a try before buying HPE7-A01 exam braindumps. Free demo will help you have a better understanding of what you are going to buy, and we also recommend you try the free demo before buying. Moreover, HPE7-A01 exam braindumps of us will offer you free update for one year, and you can get the latest version of the exam dumps if you choose us. And the update version for HPE7-A01 Exam Dumps will be sent to your email automatically, and you just need to receive them.

HP Aruba Certified Campus Access Professional Exam Sample Questions (Q117-Q122):

NEW QUESTION # 117
You are troubleshooting an issue with a pair of Aruba CX 8360 switches configured with VSX Each switch has multiple VRFs. You need to find the IP address of a particular client device with a known MAC address You run the "show arp" command on the primary switch in the pair but do not find a matching entry for the client MAC address.
The client device is connected to an Aruba CX 6100 switch by VSX LAG.

Which action can be used to find the IP address successfully?

- A. □
- B. □
- C. □
- D. □

Answer: B

Explanation:
Explanation
The show arp command displays the ARP table for a specific VRF or all VRFs on the switch. The ARP table contains the IP address to MAC address mappings for hosts that are directly connected to the switch or reachable through a gateway. If the client device is connected to another switch by VSX LAG, the ARP entry for the client device will not be present on the primary switch unless it has communicated with it recently.
Therefore, to find the IP address of the client device, the administrator should run the show arp command on the secondary switch in the VSX pair, specifying the VRF name that contains the client device's subnet.

NEW QUESTION # 118
Which feature supported by SNMPv3 provides an advantage over SNMPv2c?

- A. Community strings
- B. GetBulk
- C. Transport mapping
- D. Encryption

Answer: D

Explanation:
Encryption is a feature supported by SNMPv3 that provides an advantage over SNMPv2c.
Encryption protects the confidentiality and integrity of SNMP messages by encrypting them with a secret key. SNMPv2c does not support encryption and relies on community strings for authentication and authorization, which are transmitted in clear text and can be easily intercepted or spoofed. Transport mapping, community strings, and GetBulk are features that are common to both SNMPv2c and SNMPv3.

NEW QUESTION # 119
Your Aruba CX 6300 VSF stack has OSPF adjacency over SVI 10 with LAG 1 to a neighboring device.
The following configuration was created on the switch:
□

- A. □
- B. □
- C. □
- D. □

Answer: C

Explanation:
The correct configuration for OSPF adjacency over SVI 10 with LAG 1 to a neighboring device is shown in Option C.
The configuration includes the following steps:
* Create a VLAN 10 and assign it a name and an IP address.
* Create a LAG 1 and assign it a name and a mode of dynamic or static.
* Add member ports to LAG 1 and enable the LAG interface.
* Assign VLAN 10 as the untagged VLAN for LAG 1.
* Enable OSPF on the switch and assign it a router ID.
* Create an OSPF area 0 and add SVI 10 as an interface in that area.
Option A is incorrect because it does not enable OSPF on the switch or create an OSPF area. Option B is incorrect because it assigns VLAN 10 as the tagged VLAN for LAG 1, which is not compatible with SVI 10.

Option D is incorrect because it does not add member ports to LAG 1 or enable the LAG interface.

NEW QUESTION # 120

Which method is used to onboard a new UXI in an existing environment with 802.1X authentication? (The sensor has no cellular connection)

- A. Use the CLI via the serial cable and adjust the initial configuration.
- B. Use the Aruba installer app on your smartphone to scan the barcode
- C. Use the UXI app on your smartphone and connect the UXI via Bluetooth
- D. Connect the new UXI from an already installed one and adjust the initial configuration.

Answer: C

Explanation:
To onboard a new UXI in an existing environment with 802.1X authentication, you need to use the UXI app on your smartphone and connect the UXI via Bluetooth. The UXI app allows you to scan the QR code on the UXI sensor and configure its network settings, such as SSID, password, IP address, etc. The Bluetooth connection allows you to communicate with the UXI sensor without requiring any network access or cellular connection. The other options are incorrect because they either do not use the UXI app or do not use Bluetooth.

NEW QUESTION # 121

What is the order of operations tor Key Management service for a wireless client roaming from AP1 to AP2?

Answer:

Explanation:
