### HP Aruba Certified Network Security Professional - HPE7-A02 Free Exam Questions

**QUESTION NO: 1**  
A company uses HPE Aruba networking ClearPass Policy Manager (CPPM) as a TACACS+ server to authenticate managers on its AOS-CX switches. You want to assign managers to groups on the AOS-CX switch by name. How do you configure this setting in a CPPM TACACS+ enforcement profile?

- A. Add the Shell service and set subcmd to the group name.
- B. Add the Shell service and set priv to the group name.
- C. Add the Aruba Common service and set Aruba-Admin-Role to the group name.
- D. Add the Aruba Common service and set Aruba-Priv-Admin-User to the group name.

Hide answer/explanation Discussion 0

**Correct Answer: C**  Vote an answer

To assign managers to groups on the AOS-CX switch by name using HPE Aruba networking ClearPass Policy Manager (CPPM) as a TACACS+ server, you SHOULD add the Aruba service to the TACACS+ enforcement profile and set the Aruba-Admin-Role to the group name. This configuration ensures that the appropriate administrative roles are assigned to managers based on their group membership, allowing for role-based access control on the AOS-CX switches.

---

**QUESTION NO: 2**  
You are using OpenSSL to obtain a certificate signed by a Certification Authority (CA). You have entered this command:  
openssl req -new -out file1.pem -newkey rsa:2048 -keyout file2.pem  
Enter PEM pass phrase: \_\_\_\_\_  
Verifying - Enter PEM pass phrase: \_\_\_\_\_  
Country Name (2 letter code) [AU]: US  
State or Province Name (full name) [some-state]: California  
Locality Name (eg, city) [San Francisco]:  
Organization Name (eg, company) [Internet Widgits Pty Ltd]: example.com  
Organizational Unit Name (eg, section) [Infrastructure]:  
Common Name (e.g. server FQDN or YOUR name) [radius.example.com]:  
What is one guideline for continuing to obtain a certificate?

- A. You should use a third-party tool to encrypt file2.pem before sending it and file1.pem to the CA.
- B. You should concatenate file1.pem and file2.pem into a single file, and submit that to the desired CA to sign.
- C. You should submit file1.pem, but not file2.pem, to the desired CA to sign.
- D. You should submit file2.pem, but not file1.pem, to the desired CA to sign.

Hide answer/explanation Discussion 0

**Correct Answer: C**  Vote an answer

When using OpenSSL to obtain a certificate signed by a Certification Authority (CA), you should submit the Certificate Signing Request (CSR) file, which is file1.pem, to the CA. The CSR contains the information about the entity requesting the certificate and the public key, but not the private key, which is in file2.pem. The CA uses the information in the CSR to create and sign the certificate.  
1. CSR Submission. The CSR (file1.pem) includes the public key and the entity information required by the CA to issue a certificate.

2026 Latest BraindumpQuiz HPE7-A02 PDF Dumps and HPE7-A02 Exam Engine Free Share: [https://drive.google.com/open?id=1cMsWNmwQ2z0vyT4\\_84k9yhPp-Evd4DGs](https://drive.google.com/open?id=1cMsWNmwQ2z0vyT4_84k9yhPp-Evd4DGs)

We boost a professional expert team to undertake the research and the production of our HPE7-A02 learning file. We employ the senior lecturers and authorized authors who have published the articles about the test to compile and organize the HPE7-A02 prep guide dump. Our expert team boosts profound industry experiences and they use their precise logic to verify the test. They provide comprehensive explanation and integral details of the answers and questions. Each question and answer are researched and verified by the industry experts. Our team updates the HPE7-A02 Certification material periodically and the updates include all the questions in the past thesis and the latest knowledge points. So our service team is professional and top-tanking.

HP HPE7-A02 certification exam covers a wide range of topics, including network security policy, access control, firewalls, intrusion prevention, and more. It is designed to test an IT professional's knowledge of both theory and practical implementation of network security concepts. HPE7-A02 exam is also designed to be challenging, and passing it requires a deep understanding of the subject matter.

To prepare for the HPE7-A02 exam, candidates can attend training courses offered by HPE or study on their own using resources such as books, practice exams, and online tutorials. Passing the exam requires a thorough understanding of network security concepts and hands-on experience with security technologies. Earning the ACNSP certification can help IT professionals advance their careers and demonstrate their expertise in network security to potential employers.

HP HPE7-A02 Exam covers a range of topics related to network security, including firewall technologies, intrusion detection and

prevention, secure access technologies, and advanced authentication and authorization. HPE7-A02 exam is designed to test the candidate's ability to design, implement, and manage secure networks using Aruba products and technologies.

## HPE7-A02 Exam Question & Free Download HPE7-A02 Free Exam Promise You to Purchase Safely and Easily

As is known to all, HPE7-A02 practice guide simulation plays an important part in the success of exams. By simulation, you can get the hang of the situation of the real exam with the help of our free demo. Simulation of our HPE7-A02 training materials make it possible to have a clear understanding of what your strong points and weak points are and at the same time, you can learn comprehensively about the HPE7-A02 Exam. By combining the two aspects, you are more likely to achieve high grades.

### HP Aruba Certified Network Security Professional Exam Sample Questions (Q31-Q36):

#### NEW QUESTION # 31

You are setting up HPE Aruba Networking SSE to prohibit users from uploading and downloading files from Dropbox. What is part of the process?

- A. Deploying a connector that can reach Dropbox
- B. Installing the HPE Aruba Networking SSE root certificate on clients
- C. Deploying a connector that can reach the remote users
- D. Adding a web category that includes Dropbox

**Answer: D**

Explanation:

Comprehensive Detailed Explanation

To prohibit users from uploading and downloading files from Dropbox using HPE Aruba Networking SSE (Secure Service Edge), you need to configure web access policies. This typically involves:

\* Adding a web category to the SSE configuration that includes Dropbox.

\* The SSE solution uses category-based filtering to block access to specific applications or services, such as Dropbox, based on their classification.

Other Options:

\* B. Installing the SSE root certificate is required for enabling SSL inspection, but this does not directly control access to Dropbox.

\* C and D. Deploying a connector is not necessary for this purpose as the enforcement is done via SSE policies, not by directly interfacing with Dropbox or remote users.

References

\* Aruba Networking SSE documentation on web filtering policies.

\* HPE Aruba SSE Application Control Best Practices Guide.

#### NEW QUESTION # 32

You need to use "Tips:Posture" conditions within an 802.1X service's enforcement policy.

Which guideline should you follow?

- A. Enable profiling in the service's general settings.
- B. Enable caching roles and posture attributes from previous sessions in the service's enforcement settings.
- C. Create rules that assign postures in the service's role mapping policy.
- D. Select the Posture Policy type for the service's enforcement policy.

**Answer: B**

Explanation:

When using "Tips

" conditions within an 802.1X service's enforcement policy, you should enable caching roles and posture attributes from previous sessions in the service's enforcement settings. This ensures that ClearPass retains posture information from previous authentications, which is necessary for making decisions based on the current posture state of an endpoint. By caching these attributes, ClearPass

can apply appropriate enforcement actions based on the device's posture status.

### NEW QUESTION # 33

A company wants HPE Aruba Networking ClearPass Policy Manager (CPPM) to respond to Syslog messages from its Check Point firewall. You have added the firewall as an event source and set up an event service. However, test Syslog messages are not triggering the expected actions.

What is one CPPM setting that you should check?

- A. The CoA delay value is set to 0 on the server.
- **B. Ingress Event Dictionaries for Check Point messages are enabled.**
- C. ClearPass Device Insight integration is disabled.
- D. The Check Point Extension is installed through ClearPass Guest.

**Answer: B**

Explanation:

To ensure that HPE Aruba Networking ClearPass Policy Manager (CPPM) responds correctly to Syslog messages from a Check Point firewall, you need to check that the Ingress Event Dictionaries for Check Point messages are enabled. These dictionaries are necessary for CPPM to properly interpret and respond to the Syslog messages received from the firewall.

1.Event Dictionaries: Ingress Event Dictionaries allow CPPM to understand the specific format and content of Syslog messages from various sources, such as Check Point firewalls.

2.Message Interpretation: Without these dictionaries enabled, CPPM may not correctly interpret the Syslog messages, leading to a failure in triggering the expected actions.

3.Configuration Check: Ensuring that the dictionaries are enabled is crucial for the proper functioning of the event service and accurate response to security events.

### NEW QUESTION # 34

A company uses HPE Aruba Networking ClearPass Device Insight (CPDI) (the standalone application option). In the details for a generic device cluster, you see a recommendation for "Windows 8/10" with 70% accuracy.

What does this mean?

- A. CPDI has grouped this cluster with similar classified devices. 70% of those classified devices are "Windows 8/10."
- B. CPDI has matched these devices against several, conflicting system rules. 70% of those rules are for "Windows 8/10" devices.
- C. CPDI has used MAC OUI to group these devices together. The average device's MAC address matches 70% of the "Windows 8/10" OUI.
- **D. CPDI has detected that these devices match about 70% of the system rule for defining "Windows 8/10" devices.**

**Answer: D**

Explanation:

When HPE Aruba Networking ClearPass Device Insight (CPDI) shows a recommendation for "Windows 8 /10" with 70% accuracy for a generic device cluster, it means that CPDI has detected that these devices match about 70% of the system rule criteria for defining "Windows 8/10" devices. This percentage indicates the confidence level based on the observed characteristics and behavior of the devices, helping administrators understand the likelihood that these devices are indeed running Windows 8 or 10.

### NEW QUESTION # 35

What is a use case for running periodic subnet scans on devices from HPE Aruba Networking ClearPass Policy Manager (CPPM)?

- A. Using WMI to collect additional information about Windows domain clients
- B. Detecting devices that fail to comply with rules defined in CPPM posture policies
- C. Identifying issues with authenticating and authorizing clients
- **D. Using DHCP fingerprints to determine a client's device category and OS**

**Answer: D**

#### Explanation:

Running periodic subnet scans on devices from HPE Aruba Networking ClearPass Policy Manager (CPPM) can be used to gather DHCP fingerprints, which help determine a client's device category and operating system. DHCP fingerprints are unique patterns in DHCP request packets that provide valuable information about the device type and OS, assisting in device profiling and policy enforcement.

1. DHCP Fingerprinting: This technique captures specific details from DHCP packets to identify the type and operating system of a device.
2. Device Profiling: By running subnet scans, CPPM can continuously update its device database with accurate profiles, ensuring that policies are applied correctly based on the device type.
3. Network Visibility: Regular scanning helps maintain up-to-date visibility of all devices on the network, improving security and management.

#### NEW QUESTION # 36

.....

We are aware that taking the HP HPE7-A02 certification exam may be quite expensive. To save you money, we provide you with up to 1 year of free HPE7-A02 exam questions updates. Moreover, you can check out the features of our BraindumpQuiz's HPE7-A02 practice exam material by downloading a free demo. We provide you with a Free HPE7-A02 Exam Questions demo to assist you in making a decision that is well-informed. We are sure that by preparing with updated our HP HPE7-A02 exam questions you can get success and save both time and money.
