Varieties of GIAC GICSP Exam Practice Test Questions

You may be also one of them, you may still struggling to find a high quality and high pass rate Global Industrial Cyber Security Professional (GICSP) study question to prepare for your exam. Your search will end here, because our study materials must meet your requirements. Our product is elaborately composed with major questions and answers. Our study materials are choosing the key from past materials to finish our GICSP Torrent prep. It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the GICSP exam torrent. Then, you will have enough confidence to pass it. So start with our GICSP torrent prep from now on. We can succeed so long as we make efforts for one thing.

We are well-known for our wonderful performance on pushing more and more candidates to pass their GICSP exams and achieve their dreaming certifications. There is no exaggeration to say that with our GICSP study materials for 20 to 30 hours, you will be ready to pass your GICSP Exam. Since our GICSP exam torrent is designed on the purpose to be understood by our customers all over the world, it is compiled into the simplest language to save time and efforts.

Free PDF 2026 GIAC Newest GICSP: Global Industrial Cyber Security Professional (GICSP) Valid Test Dumps

From the moment you decide to contact with us for the GICSP exam braindumps, you are enjoying our fast and professional service. Some of our customers may worry that we are working on certain time about our GICSP study guide. In fact, you don't need to worry at all. You can contact us at any time. The reason why our staff is online 24 hours is to be able to help you solve

problems about our GICSP simulating exam at any time. We know that your time is very urgent, so we do not want you to be delayed by some unnecessary trouble.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q53-Q58):

NEW QUESTION # 53
An attacker has a goal of obtaining information stored in an ICS. Why might the attacker focus his efforts on the operating system rather than the ICS application?

- A. The ICS is more likely to have vendor-provided security hardening guidance than the operating system will
- B. The operating system will have fewer vulnerabilities than the ICS application
- C. Control of the operating system offers access to applications running on it
- D. Organizations generally do not define a role or responsibility for dealing with operating systems, leaving them neglected and vulnerable

Answer: C

Explanation:
In ICS environments, attackers often target the operating system (OS) rather than the ICS application itself because the OS controls and supports the applications running on it. Gaining control over the OS gives attackers the capability to:
Access all files and data processed by applications
Install malware or tools that operate beneath or alongside ICS applications Manipulate or intercept data without detection While hardening guidance may exist for both OS and applications, the OS is a more fundamental layer and usually presents a broader attack surface. Therefore, controlling the OS (D) effectively provides access to all applications, making it a strategic target for attackers seeking sensitive information.
This approach aligns with the GICSP's focus on understanding layered defenses and attack vectors at all levels of the ICS stack, including the operating system.

NIST SP 800-82 Rev 2, Section 5.6 (System and Communication Protection) GICSP Training Module on OS Hardening and ICS Attack Vectors

NEW QUESTION # 54
During a plant upgrade an architect needs to connect legacy lEDs to a new TCP/IP instrumentation LAN. The lEDs only have RS-232 communication interfaces available. What would best be used to connect the lEDs?

- A. Data diode
- B. Industrial switch
- C. Communications Gateway
- D. Engineering workstation

Answer: C

Explanation:
Legacy devices using RS-232 interfaces require a communications gateway (C) to translate between the serial communication protocol and the new TCP/IP network.
A data diode (A) is a unidirectional security device, not a protocol translator.
An engineering workstation (B) is a computer, not a protocol conversion device.
An industrial switch (D) operates at the Ethernet layer and does not perform protocol conversion.
GICSP emphasizes gateways as essential for integrating legacy ICS devices into modern IP networks while maintaining protocol integrity.

NEW QUESTION # 55

Which type of device is the following configuration setting from?
deny modbus function write-multiple-holdingregisters

- A. Network firewall
- B. SIEM
- C. Application firewall
- D. NIDS

Answer: C

Explanation:
The configuration line denies a specific Modbus function code, which is a command-level filter for industrial protocols.
This type of control is typical of an application firewall (D) designed to understand and filter industrial control system protocols at the application layer.
A network firewall (A) typically filters traffic based on IP addresses, ports, and protocols, but not protocol function codes.
NIDS (B) detects and alerts on suspicious traffic but does not usually enforce blocking rules.
SIEM (C) collects and analyzes logs, not real-time blocking.
GICSP emphasizes the role of application-layer firewalls in protecting ICS protocols like Modbus.
Reference:

NIST SP 800-82 Rev 2, Section 5.5 (Application Layer Security)
GICSP Training on ICS Protocol Security Controls

NEW QUESTION # 56
Which control helps prevent threats to Integrity?

- A. Centralized LDAP authentication
- B. Logging IDS alerts
- C. Implementing digital signatures
- D. Firewall egress filtering

Answer: C

Explanation:
Integrity in cybersecurity ensures that data and systems are not altered or tampered with in an unauthorized manner. To protect integrity, controls must verify that data originates from a trusted source and has not been changed.
Digital signatures (D) provide cryptographic proof of data origin and integrity by enabling recipients to verify that the data has not been altered since it was signed.
Firewall egress filtering (A) limits outbound traffic but primarily protects confidentiality and availability, not directly integrity.
Logging IDS alerts (B) supports detection and auditing but is reactive rather than preventive.
Centralized LDAP authentication (C) manages user authentication and access control, mainly protecting confidentiality and accountability.
GICSP highlights digital signatures as a core control to maintain data integrity, especially for firmware, configuration files, and critical commands within ICS.

NIST SP 800-82 Rev 2, Section 6.5 (Information Integrity Controls)
GICSP Training on Cryptographic Controls and Data Integrity

NEW QUESTION # 57
Which of the following statements best describes how a security policy should be written?

- A. It should be direct, concise, and easily readable by those expected to follow it
- B. It should be written in formal, legal language similar to a business contract between two parties
- C. It should be as comprehensive as possible, and cover every possible contingency in as much detail as possible

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A good security policy must be clear, concise, and easily understandable by its audience (A). This ensures compliance and effective implementation.

Writing in overly formal legal language (B) can create barriers to understanding and practical application.

Overly comprehensive policies (C) risk being ignored due to complexity.

GICSP stresses that policies must balance completeness with clarity to be effective governance tools.

NEW QUESTION # 58

......

Regardless of your weak foundation or rich experience, GICSP exam torrent can bring you unexpected results. In the past, our passing rate has remained at 99%-100%. This is the most important reason why most candidates choose GICSP test guide. Failure to pass the exam will result in a full refund. But as long as you want to continue to take the Global Industrial Cyber Security Professional (GICSP) exam, we will not stop helping you until you win and pass the certification. In this age of the Internet, do you worry about receiving harassment of spam messages after you purchase a product, or discover that your product purchases or personal information are illegally used by other businesses? Please do not worry; we will always put the interests of customers in the first place, so GICSP Test Guide ensure that your information will not be leaked to any third party.

Latest GICSP Exam Pdf: https://www.prep4away.com/GIAC-certification/braindumps.GICSP.ete.file.html

By using our dumps, you can prepare for your GICSP exam in the right dimension without wasting your time and effort, the most functions of our Latest GICSP Exam Pdf - Global Industrial Cyber Security Professional (GICSP) exam dumps are to help customers save more time, and make customers relaxed, GIAC GICSP Valid Test Dumps They have been designed especially keeping in view your actual exam requirements, This function is conductive to pass the GICSP exam and improve you pass rate.

This means you can choose which of those two features GICSP Test Sample Online you want to control, In this era of remote work, Chrome device deployment has become even more widespread, By using our dumps, you can prepare for your GICSP Exam in the right dimension without wasting your time and effort.

GICSP Practice Questions: Global Industrial Cyber Security Professional (GICSP) & GICSP Exam Dumps Files

the most functions of our Global Industrial Cyber Security Professional (GICSP) exam dumps are to help customers Free GICSP Download save more time, and make customers relaxed, They have been designed especially keeping in view your actual exam requirements.

This function is conductive to pass the GICSP exam and improve you pass rate, The content of our GICSP practice engine is based on real exam by whittling down superfluous GICSP knowledge without delinquent mistakes rather than dropping out of reality.
