- A. + (addition) has a higher order of precedence than * (multiplication)
- **B. || has a higher order of precedence than +(addition)**
- C. AND and OR have the same order of precedence in a condition
- D. Operators are evaluated before conditions.
- **E. NOT has a higher order of precedence than AND and OR in a condition.**

Answer: B,E

* In logical operations, NOT is evaluated first, followed by AND and then OR.

* Option E: || has a higher order of precedence than +(addition).

* The string concatenation operator || has a higher precedence than the arithmetic + operator.

Options A, C, and D are incorrect because:
